## Programs

Highlighting grantee accomplishments, this addition to the CDC website offers summaries and profiles of CDC-funded programs and projects. The profiles feature grantee contact information, goals, and achievements (injury-related research, publications, and conferences).

## Mass Trauma

CDC's mass casualty website provides information and tools to help the public, public health professionals, and clinicians respond to and prepare for mass casualty events. The website offers fact sheets about topics such as brain injuries, burns, and coping with mass casualties; preparedness tools such as the casualty predictor; response tools such as rapid assessment of injuries; research information; and resources.

## E-mail List

The challenge of reducing the burden of injury is too large for anyone to tackle alone. One way CDC's Injury Center reaches out to partners is through its announcement e-mail list. E-mail list subscribers receive notification of funding announcements, career opportunities, and updates about Injury Center activities. To stay informed, subscribe online.
