Introduction

Thank you for taking the time to complete this ACORNS Phase II Progress Report (lue Month Day, 2017). Your responses help guide the CRIHB ACORNS team's assistance to your ACORNS Program's chronic disease prevention and management strategies.

This ACORNS Report focuses on the following strategies, which have the potential to bring about sustainable Policy, Systems, and Environmental (PSE) changes:

- Preventing Commercial Tobacco Use and Exposure;
- Increasing Access to Healthy Eating and Local Foods;
- Increasing Access to Exercise and Physical Activity; and
- Increasing Community-Clinical Linkages

Click the Next button below to move to the next page.

Instructions

For the following questions, please provide responses that apply to your ACORNS Program's chronic disease prevention and management strategies.

Also, in the spaces provided, please share additional thoughts or comments. If not applicable, please type Not Applicable.

The survey will automatically save responses after you complete a given page and click the Next button (or the Done button on the final page). You can edit your responses at any time (even after submitting the report) by using the link originally sent to your email and working from the same computer.

If you need assistance or have questions, please contact Andrew Stutman, ACORNS Program Evaluator at andrew.stutman@crihb.org or (916) 929-9761 ext. 1515.

Strategy to Increase Access to Exercise and Physical Activity

Please select one (or more than one, if applicable) of the following choices that describes your ACORNS strategy to increase access to exercise and physical activity. Please select all of the following that apply:
Walking and/or biking paths, routes, and trails
Bike sharing program
Parks, playgrounds, public recreational areas, wellness centers
Allowing the use of school and/or tribal government buildings and recreational/exercise facilities by the public during non-school and/or non-business hours (e.g., joint use agreements: formal agreements between separate government entities, setting forth the terms and conditions for shared use of public property or facilities)
Supporting clubs, teams, and/or groups (e.g., walking, biking, hiking, dance, sports) to encourage physical activity (e.g., among employees, among community members)
Physical activity policies in the workplace (e.g., providing flexible work arrangements or break times for employees to engage in physical activity)
Encouraging non-motorized commutes (e.g., walk, bike) to school and/or work
Promoting stairwell use (e.g., make stairs appealing, post motivational signs near stairs to encourage physical activity)
Providing access to an on-site fitness center, gymnasium, or physical activity classes
Providing access to an off-site workout facility or subsidized membership to local fitness facility
Banning using or withholding physical activity as punishment in schools
Adopting a physical education curriculum for all students; requiring that students are physically active during the majority of time in physical education class
Providing access to a broad range of competitive and noncompetitive physical activities that help to develop the skills needed to participate in lifetime physical activities
Providing street traffic calming measures (e.g., road narrowing, central islands, roundabouts, speed bumps) to make areas safer where people are or could be physically active (e.g., playgrounds, parks, bike lanes, walking paths, neighborhoods)
Adopting strategies (e.g., neighborhood crime watch, lights) to enhance personal safety in areas where people are or could be physically active (e.g., playgrounds, parks, bike lanes, walking paths, neighborhoods)
Assessing patients' physical activity and providing regular counseling about the value of physical activity as part of a written checklist or screening used in all routine office visits
Implementing a referral system to help patients access community-based resources or services for physical activity
Other (please describe)

Strategies to Increase Community-Clinical Linkages?

Is your ACORNS Program developing and/or implementing policies or programs related to increasing **community-clinical linkages** (e.g., increasing community-clinical linkages to support chronic disease prevention and self-management, increasing access to Community Health Representatives who link patients to community resources such as Talking Circles and lactation support, increasing use of teambased care strategies, etc.)? Please select Yes or No.

Yes

O No

No strategies to Increase Community-Clinical Linkages			
THESE QUESTIONS WILL ONLY APPEAR IN SURVEY MONKEY IF YOU INDICATE "NO" TO THE PRIOR QUESTION.			
You selected that your ACORNS Program is not developing and/or implementing policies or programs to increase community-clinical linkages. Is this an area your ACORNS Program would like to work on in the future? Please select Yes or No.			
○ Yes			
○ No			
Please use the following space to share any comments relating to strategies to increase community-clinical linkages:			

Strategies to Increase Community-Clinical Linkages

Please select one (or more than one, if applicable) of the following choices that describes your ACORNS Program's strategy to increase community-clinical linkages. Please select all that apply:				
Implementing a referral system to help patients access community-based resources or services to support the prevention, self-management, and treatment of diabetes, heart disease, hypertension, and obesity (e.g., nutrition and/or physical activity support)				
Increasing the use of team-based care strategies, including the use of health care extenders such as Community Health Representatives, pharmacists, public health nurses, case managers, patient navigators, and community health workers who link patients to community resources that promote the prevention and self-management of diabetes, heart disease, hypertension, and obesity (e.g., Talking Circles, Weight Watchers, CDC's National Diabetes Prevention Program, lactation support)				
Adopting strategies to educate the community, employees, and/or students on the importance of obesity prevention, controlling blood sugar or insulin levels, controlling high blood pressure, and controlling cholesterol				
Adopting a plan or process to increase patient adherence to chronic disease treatment (e.g., for diabetes, heart disease)				
Provide routine screening, follow-up counseling, and education to help address chronic diseases and related risk factors (e.g., poor nutrition, physical inactivity, hypertension, high cholesterol, elevated blood sugar levels, tobacco use and exposure)				
Providing access to an on-site occupational health nurse and/or an on-site medical clinic to monitor and address chronic diseases and related risk factors (e.g., high blood pressure, high cholesterol, elevated blood sugar levels)				
Providing paid time off to attend health promotion programs or classes				
Providing employee insurance coverage for preventive services and quality medical care				
Providing access to a free or low cost employee health risk appraisal or health screenings				
Meeting the nutritional needs of students with special health care or dietary requirements (e.g., diabetes, allergies, physical disabilities)				
Ensuring immediate and reliable access to prescribed medications (e.g., inhaler, insulin, epinephrine pen) for chronic disease management throughout the day (e.g., in schools, in the workplace)				
Having a district health group (e.g., school health council) comprised of school personnel, parents, students, and community partners that help plan and implement district health activities				
Providing opportunities to raise awareness of the signs and symptoms of heart attack and stroke (e.g., in schools, in the workplace)				
Ensuring students and staff are aware of the importance of calling 9-1-1 for emergencies				
Ensuring cardiopulmonary resuscitation (CPR) training is made available to students and staff				
Engaging families in the development of school plans (e.g., school diabetes management plans) to effectively manage students with chronic diseases or conditions				
Other (please describe)

Please select the stage of the policy process that best describes the current status of your ACORNS strategy to increase community-clinical linkages. Please select one of the following:
Problem definition - clearly define the problem and seek community agreement that the problem exists
Agenda setting - an identified decision-maker defined and included a proposed solution on the policy agenda
Policy formulation - leaders make a decision about what should be done about the problem and proposals are formed and drafted for policy
Policy adoption - working to get enough support from other decision-makers for a proposal to be adopted as a policy
Implementation - putting the adopted policy into action
Please explain the status/progress of your ACORNS strategy to increase community-clinical linkages:
Please describe any factors that assist in the success of your ACORNS strategy to increase community-clinical linkages: Please describe any challenges and/or barriers that affect the success of your ACORNS strategy to increase community-clinical linkages:
Please share any additional comments about your ACORNS strategy to increase community-clinical linkages:

Increasing Access to Health Education Resources?

Does your ACORNS Program include a strategy to increase access to**health education resources** that improve health beliefs, attitudes, and behaviors through integration with strategies to:

- prevent commercial tobacco use and exposure;
- increase access to healthy eating and local foods;
- increase access to exercise and physical activity, and/or
- increase community-clinical linkages?

No Increasing Access to Health Education Resources				
THESE QUESTIONS WILL ONLY APPEAR IN SURVEY MONKEY IF YOU INDICATE "NO" TO THE PRIOR QUESTION.				
You selected that your ACORNS Program does not include a strategy to increase access to health				
education resources through integration with strategies relating to commercial tobacco use and exposure,				
healthy eating and local foods, exercise and physical activity, and/or community-clinical linkages. Is this an				
area your ACORNS Program would like to work on in the future? Please select Yes or No.				
Yes				
○ No
