SUMMARY

1. Why a Medicaid statistics report just for American Indians and Alaska Natives (AIAN)?

American Indians and Alaska Natives (AIAN) who are federally recognized have legal rights to health care that are *not* based on their race but on the federal trust responsibility. This unique relationship stems from government-to-government relationships that have been given substance through numerous treaties, legislation, executive orders and Supreme Court decisions. Federally recognized tribes of American Indians and corporations of Alaska Natives are published in the Federal Register. Other federally recognized descendants of American Indians have legal rights to health care as well. For these people, AIAN is a political designation that is distinct from any racial designation. In Table A they are the first listed group of AIAN: **Tribal AIAN**.

Table A. Definitions of American Indians and Alaska Natives (AIAN) relevant to CMS data.*

Definition	Who is Included	How Inclusion Determined
Tribal AIAN	Member of federally recognized Tribe	Tribes
Indian Health Service 'IHS AIAN'	Member of federally recognized Tribe or their descendants who use an IHS funded facility (Table B)	Federal IHS
Census AIAN	Race is AIAN either as the only Race or in addition to any other Races, regardless of any Ethnicity	Selected by Person completing Census

*Source: CMS AIAN Strategic Plan, 2006.

The Indian Health Service (IHS) was developed by the United States government to implement the federal trust responsibility for AIAN health care. IHS became independent of the Bureau of Indian Affairs in 1955. The IHS provides health care and public health services to AIAN living on or near tribal lands, and in some urban areas. This includes members or descendants of federally recognized tribes who live on or near a tribal land (or Urban Indian clinic) and use an IHS funded facility. In Table A they are the second listed group of AIAN: **IHS AIAN**. IHS facilities have developed over the years to include three types of health care providers: 1) facilities owned by IHS or tribes but operated by the IHS (IHS providers, **I**), 2) facilities owned and operated by tribes (Tribal providers, **T**), and 3) facilities

owned and operated by Urban Indians (Urban providers, U). The federal IHS has a National Patient Information Reporting System that helps determine which users of I/T/U providers qualifies as an 'IHS AIAN.' The numbers of AIAN in the IHS service population have grown from 1.3 million in 1995 to more than 1.8 million in 2006.

Centers for Medicare and Medicaid Services (CMS) became part of the federal trust responsibility financing health care to AIAN in the Indian health system when Congress authorized Medicaid and Medicare payment for services delivered by IHS and Tribal facilities in 1976. CMS payments are critical to Indian health care, as they provide 90 percent of third party revenues for I/T/U providers. CMS funds are important because IHS funding to I/T/U providers nationally to provide care to AIAN is only about 51 percent of the level funded by the federal government to provide employees a basic package of health care benefits.

Table B. Definitions of IHS-funded 'I/T/U' provider organizations relevant to Medicaid, with examples of services and facility types.

Label	Providers Included	Examples of Services	Facilities 2006
Indian Health Service (I)	IHS Direct Service Providers	Primary Care (Medical, Dental, Vision), Ancillary (laboratory, pathology, imaging, emergency transportation), Behavioral Health, Limited Hospital and some Specialty services	33 Hospitals 52 Health Centers 38 Health Stations 2 School Health Centers
Tribal (T)	Tribally Operated Health Programs	Primary Care (Medical, Dental), Ancillary (Limited laboratory, pathology, emergency transportation), Behavioral Health, Tribal Hospital may have some Specialty services	15 Hospitals, 216 Health Centers 162 Alaska Village Clinics 97 Health Stations 9 School Health Centers
Urban Indian (U)	Urban Indian Health Organizations (Most are in IHS system, some are also FQHC)	Primary Care, Ancillary (Limited laboratory, pathology), Behavioral Health	34 Urban clinic programs

The Department of Health and Human Services adopted a Tribal Consultation Policy in 2005. The policy required that its operating units, including CMS, share in the responsibility of coordinating, communicating, and consulting with Indian Tribes on issues that affect them. CMS established a

Technical Tribal Advisory Group to support both Medicaid and Medicare programs in implementing its responsibilities for AIAN health care.

The Technical Tribal Advisory Group needs on-going information from CMS on AIAN beneficiaries and I/T/U providers to:

- ❖ Identify issues that impact AIAN and the I/T/U;
- ❖ See that AIAN beneficiaries have the option to use their local tribal or IHS facilities, and that those facilities are paid for services provided;
- ❖ Assure that proposed administrative, regulatory, and legislative changes are analyzed in advance for their likely impact on AIAN beneficiaries and the I/T/U system;
- ❖ Monitor how changes in eligibility rules, benefits packages, cost-sharing requirements, provider payment rates, and financing impact AIAN beneficiaries and the I/T/U system;
- ❖ Aid CMS in pursuit of its core goals:
 - Promoting quality services
 - Promoting responsiveness to beneficiaries, health care professionals, and CMS partners (including the Indian Health Service)

CMS maintains extensive data systems that could provide valuable information for Medicaid program and policy decisions that affect AIAN and the Indian health system they rely on. The CMS data systems, however, have not been designed to disseminate the information that is needed. The systems do not have consistent protocols for identifying AIAN beneficiaries or I/T/U providers as designated by the Tribal Technical Advisory Group (Tables A and B). The CMS State Children's Health Insurance Program (SCHIP) does not identify AIAN beneficiaries or I/T/U providers at all. At a minimum, CMS data systems should be capable of providing program enrollment, health service utilization, and payment data for AIAN and I/T/U providers. Such data is fundamental for program planning and evaluation, policy impact analysis, and service performance measurement to execute the federal trust responsibility of these programs.

The lack of CMS information on AIAN beneficiaries and I/T/U providers for program and policy planning is a serious barrier to upholding the federal trust responsibility. A number of critical program and policy issues have developed in recent years because Medicaid was unfamiliar with the federal trust responsibility for AIAN health care. For example, Medicaid managed care plans were widely circulated throughout the country with no special provisions made for AIAN who rely on I/T/U providers. As a

result, many AIAN were made members of distant plans with distant providers without the appropriate cultural competency needed to address AIAN health issues. Had there been a data base of IHS AIAN relying on both Medicaid and I/T/U providers, CMS could have been able to identify in advance the location, demographics, enrollment groups, and services that needed attention to avoid the enormous disruption that occurred for AIAN who relied on the Indian health care system. We have reported in detail about these data gaps and their implications in a comprehensive report for the CMS Tribal Technical Advisory Group (*Gaps and Strategies to improve American Indian and Alaska Native Data in Medicare, Medicaid and SCHIP Data Bases*, August 2007).

2. What is the purpose of this report?

This report is the first systematic attempt to report on AIAN and I/T/U providers using available CMS data. It relies on Medicaid data currently available online to assess what can be learned from that data. It is meant to demonstrate from the perspective of AIAN and I/T/U providers, both the informative content of the currently available Medicaid data and its frustrating limitations as well. We first describe the Medicaid data available online for AIAN and I/T/U providers, and how it will be used and presented in this report. We then apply the Medicaid definition for AIAN Eligibles in that data, and compare their data to All Other Eligibles within each state and to the average for AIAN Eligibles across all states in the 12 IHS Areas.

The report provides Maps of the IHS Area States included in each of the 12 separate IHS Areas. We then provide data for Medicaid, the Medicaid portion of SCHIP, and then Medicaid and Medicaid SCHIP data combined for IHS Programs. The data is first reported for all states with data in the IHS Area States combined, and then state-by-state for each state in the IHS Area States with the national average for all IHS Area States on the same page for comparison. For the Medicaid and Medicaid SCHIP and for the Medicaid and Medicaid SCHIP data of the IHS Programs, we present their enrollment Demographic, Basis of Eligibility, and health care Services and Payment data - all of which are useful for program and policy reports. Finally, the report provides a summary of the three major findings about currently available Medicaid data from the perspective of the AIAN and I/T/U providers, and recommendations on how to improve Medicaid data for program and policy reporting relevant to the execution of the federal trust responsibility for health care of AIAN.

3. What is the currently available Medicaid data for this report?

The data source for this report is a web version of the Medicaid Statistical Information System (MSIS) which is called the State Summary Data Mart. The Data Mart is developed from information submitted by each state from their Medicaid eligibility and claims records systems in a standardized format. MSIS contains information on everyone who is enrolled in Medicaid in each state during the year, the basis of their eligibility, the services they use, and the payments made by the state and federal program for those services. Data in this report are from the federal fiscal year 2005 (October 1, 2004 to September 30, 2005), the most recent year available on the MSIS State Summary Data Mart.

There are a number of reasons to explore the currently available Medicaid data in the online Data Mart. Although the federal Medicaid program is made up of 50 different state Medicaid programs that vary considerably in their enrollment, services and payments, the Data Mart contains data that is collected from the state programs in a standardized way, including standardized definitions of data fields and data codes. Furthermore, the data that is reported by the states is compiled and audited by the federal Medicaid program before being made available to data users online. Audit checks include range and consistency checks on the data that is reported. Data is refined with states until it passes tolerance limits set by the audit. Non-compliance with data standards can affect the federal payments to states; therefore there are incentives for states to provide quality data.

AIAN in Online Medicaid Data

In this report AIAN is restricted to the only available Medicaid definition of AIAN: the single and only race indicated for the Eligible is American Indian or Alaska Native and the ethnicity indicated is non-Hispanic. Once the Medicaid data is restricted to data from IHS Programs in the last section of this report, however, the “AIAN” racially defined by the Medicaid definition is similar to the “IHS AIAN” definition in Table A: that is, the AIAN are members of federally recognized Tribes or their descendants who use an IHS funded facility. (See, “Medicaid & SCHIP IHS Program Data” section for more explanation).

Geographic Areas in Online Medicaid Data

IHS Area States. Data in this report are restricted to the 35 states included in part or full in the 12 administrative Areas served by the IHS. These states have at least one county that is listed in the Contract Health Service Delivery Area (CHSDA) of at least one IHS Area. AIAN must live in these

counties to qualify for Contract Health Services funded by the IHS. Each county has a designated IHS or Tribal (I/T) provider service unit responsible for managing those Contract Health Services. These counties are used to estimate the service population of each IHS or Tribal (I/T) provider service unit.

IHS Areas. IHS funded health care facilities that are located on or near tribal lands are organized for administrative purposes into 12 IHS Areas. These 12 areas are aggregates of counties (or parts of counties) in one or more states. There are some states that have counties belonging to more than one IHS Area, and there are some counties that are shared between two IHS Areas. Because the online Medicaid data is only available for the whole state and all its counties, we can currently only present Medicaid data for states and not for IHS Areas. Availability of county data would be an improvement, since county data could be selected based on a county's IHS area (or lack thereof). Medicaid data by Service Unit would be ideal, since there are numerous counties that are shared between more than one IHS Area (see IHS Area Mapped: Arizona state counties for an example).

Medicaid Program Online Data

Medicaid Data. For Medicaid data in this report is presented exclusive of any State Child Health Insurance Program (SCHIP) data. While MSIS and the Data Mart include data from both the Medicaid program (funded by Title XIX) and the Medicaid portion of the SCHIP (also funded by Title XIX), we have removed the SCHIP data to present it separately. All 35 IHS Area states have Medicaid data.

Medicaid SCHIP Data. For SCHIP data in this report we present only the Medicaid portion of SCHIP data that states are obligated to report to MSIS. The Medicaid program seeks to include in MSIS the data on SCHIP Eligibles whose services were funded with Medicaid Title XIX funds, and to separate any data on SCHIP Eligibles whose services were funded through a non-Medicaid, state-only SCHIP funded by Title XXI funds. Some states have only Medicaid SCHIP, some only state-only SCHIP, some have a combination of both, and some have neither. Some states change the programs they have. A few states with both types of SCHIP were not successful in separating out Medicaid data from their non-Medicaid data in 2005. Of the 35 IHS Area States 21 states had SCHIP Medicaid-expansion or Combination Medicaid-expansion and state programs.

IHS Program Data. In the online Data Mart, the IHS Program data is Medicaid and Medicaid SCHIP data for services that are covered by Medicaid or Medicaid SCHIP and are covered by the IHS agency. To qualify for Medicaid or Medicaid SCHIP payment, the services are to be provided by IHS direct

service providers (I) or Tribally Operated Health Programs (T) to AIAN who are eligible for Medicaid or Medicaid SCHIP as well as IHS ('IHS AIAN') (see Tables A and B). Since 1996 for IHS providers, and 2003 for tribal providers, the federal Medicaid program is supposed to pay 100% of the covered services provided to AIAN by these providers, and the state Medicaid programs are required to pay nothing. Thus IHS Area states have an incentive to work with their IHS Area offices to identify which of their Medicaid Eligibles are 'IHS AIAN,' and which of their service claims were filed by I/T providers to recoup payments they made for these IHS Program services. Yet, only 23 of the IHS Area states had IHS Program data in the Data Mart for 2005.

IHS Program data includes both Medicaid and Medicaid SCHIP data. The SCHIP data is included because it cannot be separated from Medicaid data in the IHS Program data in the online Data Mart. The SCHIP data in IHS Program data may include not only Medicaid SCHIP data but some state-only SCHIP data that was reported by a few states in 2005. There were 14 states that had State-Only Medicaid SCHIP Programs in 2005. One state switched from a state-only SCHIP program to a Combination program in the final quarter of FY 2005.

MAJOR FINDINGS

Medicaid data has three major drawbacks from the point of view of AIAN and their Indian health system providers. These drawbacks occur in part because of the way data is compiled in the online MSIS State Summary Data Mart, as well as the way data is collected and compiled from states.

1. Medicaid data does not identify 'Tribal AIAN,' 'IHS AIAN,' or even race and ethnicity as indicated in 'Census AIAN'

'AIAN' in Medicaid data is a race-ethnicity code that does not meet the criteria of the 'Census AIAN' race code. Medicaid data classifies AIAN only by a combined race-ethnicity code in which a person's only race indicated in the record can be 'American Indian or Alaska Native' and the ethnicity indicated in the record cannot be 'Hispanic.' 'Census AIAN' on the other hand is a multi-race code without regard to ethnicity (see Table A). Unlike Census AIAN, people whose records indicated more than one race are not included in the AIAN group, nor are AIAN whose records indicated AIAN as the only race but also indicated Hispanic ethnicity. While there are sufficient race and ethnicity data elements in MSIS Medicaid eligibility electronic files (5 race data fields) to create a 'Census AIAN'

population, race and ethnicity data elements in the online State Summary Data Mart data have been combined such that only AIAN who meet the race-ethnicity combined definition can be retrieved.

- ❖ **The impact of the Medicaid AIAN race-ethnicity code is that some federally recognized AIAN are not identified as AIAN.** This single race code combined with the ethnicity code excludes federally recognized AIAN who are multiracial, and those who are Hispanic. Of the five major racial groups in the US Census, AIAN reported more than any other group that they are of more than one race (see Reference by Jones 2005). There are several AIAN in the Southwest who also consider themselves Hispanic (or Latino) – and many federally recognized US AIAN have Hispanic last names. Some health programs use software that interpret last names to more fully determine Eligibles of Hispanic ethnicity.

‘IHS AIAN’ in Medicaid data is approximated by the determination of Medicaid Eligibles Served in ‘IHS Program.’ To determine Medicaid Eligibles receiving IHS Program services, a state must arrange with the regional IHS Area (or Areas, see Finding #3) to link the I/T provider registration files for their AIAN beneficiaries with the state Medicaid enrollment files. ‘IHS AIAN’ are defined as the I/T/U provider registered AIAN, which means if the linkages are accurate then the IHS Area linkage with each state Medicaid program eligibility file should yield an accurate list of IHS AIAN who are enrolled that year in Medicaid. That list of Medicaid Eligibles is then used to find their claims for services covered by IHS and provided by I/T providers. Urban providers are not included because they have not been included in the 1996 and 2003 policy changes that included Tribal providers as well as IHS Direct Service providers. This subgroup of Medicaid Eligibles identified as receiving IHS covered services through I/T providers is a subgroup of all IHS AIAN defined in the Table A.

- ❖ **The main problem with IHS AIAN defined through the Medicaid data linkage process with IHS Areas is that there is no audit of the consistency or completeness of Medicaid Eligibles identified through this linkage by CMS or any other agency.** States that reported no IHS Program data in 2005 include Alabama, Connecticut, Florida, Indiana, Iowa, Louisiana, Michigan, New York, Pennsylvania, Rhode Island, Utah, and Wisconsin. These 12 states have at least one county included in an IHS Program service area, but did not report any AIAN receiving IHS Program services in 2005. There were 4 states (Kansas, Massachusetts, South Carolina, and Texas) who reported that there were less than 20 AIAN receiving IHS Program services. Furthermore, we cannot know whether the 23 states reporting AIAN IHS Program services in 2005 used

standardized definitions to classify all ‘IHS Program’ providers and the ‘IHS Program services’ they provide. While the IHS Program data improved significantly in 2003 when these data were used in the calculation for the baseline estimates for repayments to states of their contributions to these services by federal CMS as outlined in the Medicare Modernization Act of 2003, the data have never been audited across states.

- ❖ **Another problem with IHS AIAN defined through the Medicaid data linkage process is that only their use of IHS Program providers and services is identified in Medicaid data bases.** For specialty and emergency care, both outpatient and inpatient, low income IHS AIAN must rely on non-I/T/U providers paid directly by Medicaid. These claims are not marked as those of an IHS AIAN Medicaid Eligible, and therefore this valuable information on use of non-IHS services is lost to AIAN and CMS.

‘Tribal AIAN’ definition is not used by the federal CMS and the information (if collected) by any states is not included in Medicaid data. While some tribes might object to having the Medicaid program collect statistics on their members using Medicaid services, other tribes are urging Medicaid to do just that. These large tribes want to be able to retrieve program and policy statistics relevant to their tribes.

2. Medicaid data does not identify I/T/U Provider Types

IHS Direct Service Providers (I) and Tribal Providers (T) are not identifiable as Medicaid provider types, but some of their claims information is presented as IHS Program data. Both I and T provider facilities and their health professional staff provide services to Medicaid Eligibles, and many T provider facilities do so not only for AIAN but for low income non-AIAN as well.

The problem with IHS Program data is that there is no identification of whether the IHS program provider was an I or T type provider:

- ❖ There is no way to identify services provided by I or T type providers to non-AIAN.
- ❖ There is no way to identify services covered by Medicaid that are not covered by IHS and yet provided by I or T providers.

Urban Indian Health Organization providers (U) are not identifiable as Medicaid provider types.

Many Urban Indian Health Organization providers (as well as some I and T providers) are also Federally Qualified Health Centers (FQHC) for which there is service data like that of the IHS Program data. In FQHC service data, however, I/T/U provider data is overwhelmed by the sheer volume of data from other types of providers. Their claims data is not separable from that of other FQHC, let alone separable as I, T and U provider data.

3. Medicaid data does not identify IHS Areas

In the Medicaid State Summary Data Mart available online, the IHS Program data of I/T provider services provided to AIAN is only available for an entire state. Service areas of I/T providers, however, are based on communities that are on or near tribal lands, not state borders. The IHS has organized I/T providers in service delivery areas that are based on counties (Contract Health Service Delivery Area, CHSDA counties). The CHSDA counties of an IHS area are usually only a part of a state, and the counties of one IHS Area may be in more than one state. Therefore using statewide data does not allow representation of IHS Program data, or Medicaid or Medicaid SCHIP data for that matter, for a single IHS Area. We outline the problems in using statewide data to represent each IHS Area (see IHS Areas Mapped in this report).

CONCLUSIONS AND RECOMMENDATIONS

Currently available AIAN Medicaid data does not identify:

- ❖ All AIAN using the race-ethnicity coding they now use for AIAN
- ❖ AIAN who are relevant to the federal trust responsibility, that is ‘IHS AIAN’ and ‘Tribal AIAN’
- ❖ IHS Direct Service providers, Tribal providers and Urban Indian providers (I/T/U)
- ❖ IHS Program data in a way that allows identification of the IHS Area from which the data comes

How could AIAN Medicaid data be improved?

- 1. Medicaid should collect data on multiple races for its Eligibles, and keep race and ethnicity data separate.** In the original Medicaid state MSIS data file there is space for states to report more

than one race for its Eligibles. The accuracy and completeness of the collection at enrollment of self-reported race data and its inclusion in state reported MSIS data needs to be audited and compared with relevant Census race data. Data available for analysis should indicate all races an Eligible self-reports, and should allow all groups to be analyzed by race with and without ethnicity data included.

2. **Medicaid needs to see that more IHS Area states link their enrollment data with state Medicaid enrollment and claims data and that all IHS Area states produce quality IHS Program data.**
3. **Medicaid data should capture more information that arises out of the state linkages with IHS Area data.**
 - ❖ For AIAN Eligibles who are linked, 'IHS AIAN' information should be included in MSIS data
 - ❖ For claims that are linked to the IHS AIAN Eligible lists, to identify IHS Program service claims: the classification of the provider facility as I/T or U information should be included in MSIS data
 - ❖ For Tribes that want Medicaid data, 'Tribe' information should be included in MSIS data and provided by I/T/U providers who serve those tribes
 - ❖ For all AIAN Eligibles and I/T/U providers identified by the linkage, the name of the IHS Area in which they were enrolled and provided services should be included in MSIS data
4. **Medicaid should work with IHS and Medicaid data at the national level to improve state linkages and the information to be retained from state linkages.**
 - ❖ CMS and IHS should establish a formal Business Partner arrangement with the T-TAG Research contractor to demonstrate potential uses of IHS and Medicaid national data files, check the completeness and accuracy of selected state and IHS Area linkages, and to identify and improve ways in which more information from these linkages relevant to program and policy data can be retained and used in a ways that are compliant with statute and regulation.

TERMS DEFINED

Active User – American Indians/Alaskan Natives who have had a reportable medical or dental visit within the last three fiscal years to the last Service Unit they used, regardless of any other Service Units that provided a third-party covered service to the user.

AIAN – American Indian or Alaskan Native according to Medicaid. AIAN in the MSIS data are defined as those Medicaid enrolled people whose Medicaid eligibility records indicate their race as ‘AIAN only,’ and their ethnicity ‘not Hispanic.’ AIAN whose records indicated more than one race are not included, and AIAN whose records indicated AIAN and Hispanic ethnicity are not included.

Basis of Eligibility – Categories of age, disability and family status of Medicaid Eligibles that when taken together with their Maintenance Assistance Status classify their current eligibility for Medicaid benefits: Aged, Blind & Disabled, Children, Adults, Children of Unemployed Parents, Unemployed Adults, Foster Care, Breast Cancer, and Unknown.

Contract Health Services (CHS) – Services not available directly from IHS or Tribes that are purchased under contract from community providers, including hospitals and clinical practitioners.

Contract Health Service Delivery Area (CHSDA) – Counties that are in or near tribal lands served by IHS Service Units in which AIAN must live to be eligible for Contract Health Services.

Eligibles – People who apply and are determined to be eligible for a Medicaid program for at least one month during the year.

Eligibles Served – Eligibles who use a health care service with at least one Medicaid paid claim at any time during the year

IHS AIAN – American Indian or Alaskan Native enrolled members, or their descendants, of federally recognized tribes. AIAN in the National Patient Information Registry System (NPIRS) of the IHS are AIAN registered locally with IHS health care program providers on or near a tribal land, or in an urban Indian clinic.

IHS Areas – 12 areas of the U.S. made up of all or part of 35 states that include federally recognized tribes and their tribal lands served by IHS Service Units. Since IHS Administrative Areas are built around tribal lands, they frequently cross state and county boundaries.

IHS Area States – The 35 states of which any part is included in one or more of the 12 IHS Administrative Areas.

IHS Program – An IHS funded set of services provided by IHS, Tribal, and Urban owned and operated health facilities to American Indians and Alaska Natives. These services are either delivered directly through IHS facilities, purchased by IHS through contractual arrangements with providers in the private sector, or delivered through tribally operated programs and urban Indian health programs.

Maintenance Assistance Status – Categories of financial and other material assistance for which Medicaid Eligibles have established eligibility that, taken together with their Basis of Eligibility, classify their current eligibility for Medicaid benefits.

Medicaid – A joint federal and state program that helps with medical costs for some people with low incomes and limited resources. Medicaid programs are established by states with federal guidelines. Medicaid programs vary from state to state.

MSIS – Medicaid Statistical Information System. States submit Medicaid eligibility and claims data electronically to this CMS data system with standardized data definitions and formats. The state level data is then made available to authorized users online.

SCHIP – The State Children's Health Insurance Program that expanded health care coverage to the nation's uninsured children, and some families. The Social Security Act authorizes multiple waiver and demonstration authorities to allow states flexibility in operating SCHIP programs as expansions of Medicaid (Title XIX) or as separate state (Title XXI) programs, or both. The 3 types of state SCHIP programs thus have different data reporting requirements depending on whether they are funded with Title XIX funds only (Medicaid SCHIP); Title XXI funds only (non-Medicaid State-only SCHIP), or combination Title XIX and Title XXI funds (Medicaid expansion and a non-Medicaid State-only SCHIP):

Medicaid SCHIP programs must report all Medicaid SCHIP program data to the Medicaid State Information System (MSIS) which is then included in the online State Summary Data Mart.

Non-Medicaid, State-only SCHIP programs do not have to report state-only SCHIP program data to MSIS.

Combination (Medicaid Expansion SCHIP and Non-Medicaid, State-only SCHIP) programs must report the Medicaid SCHIP program data to the Medicaid State Information System (MSIS), but do not have to report state-only SCHIP program data to MSIS.

Service Units – The local administrative units of health care providers funded by the Indian Health Services that are on or near tribal lands.

TERMS FOR MEDICAID BASIS OF ELIGIBILITY

Medicaid eligibility is determined by factors related to age, disability, family, employment and medical status, and the financial income and assets. In the body of this report we present Medicaid Eligible data for AIAN and IHS Programs compiled by Basis of Eligibility (BOE) categories: Aged, Blind/Disabled, Children, Children of Unemployed Adults, Adults, Unemployed Adults, Foster Care, and Breast Cancer patients. Below are the Eligibles in each BOE category subdivided by their possible government financial or medical benefit status (Maintenance Assistance Status, MAS). Each BOE category title below is followed by the legal definitions of MAS groups included in the category.

Legal statute of the Code of Federal Regulations (CFR) or Public Law (PL) is cited wherever available. 'The Act' refers to the Social Security Act of which Title XIX Medicaid is a part.

AGED**Poverty-related categories for people with Social Security Income**

1. Aged individuals receiving Social Security Insurance (SSI), eligible spouses or persons receiving SSI pending a final determination of disposal of resources exceeding SSI dollar limits; and persons considered to be receiving SSI under Section §1619(b) of the Social Security Act;
2. Aged individuals who meet more restrictive requirements than SSI and who are either receiving or not receiving SSI; or who qualify under Section §1619 of the Social Security Act;
3. Aged individuals receiving mandatory State supplements;
4. Aged individuals who receive a State supplementary payment (but not SSI) based on need.

Poverty-related categories for people with Medicare

1. Qualified Medicare Beneficiaries (QMB) who are entitled to Medicare Part A, whose income does not exceed 100% of the Federal poverty level, and whose resources do not exceed twice the SSI standard. §§1902(a)(10)(E)(I) and 1905(p)(1) of the Act, PL 100-203, §4118(p)(8), PL 100-360, §301(a) & (e), PL 100-485, §608(d)(14), PL 100-647, §8434.
2. Specified Low-Income Medicare Beneficiaries (SLMB) who meet all of the eligibility requirements for QMB status, except for the income in excess of the QMB income limit, but not exceeding 120% of the Federal poverty level. §4501(b) of OBRA 90, as amended in §1902(a)(10)(E) of the Social Security Act.
3. Qualifying individuals having higher income than allowed for QMB or SLMB. Section §1902(a)(10)(E)(iv) of the Social Security Act.

Medically Needy

1. Aged individuals who would be ineligible if not enrolled in a Health Maintenance Organization, see legal code 42 CFR 435.326. Categorically needy individuals are covered under legal code 42 CFR 435.212, and the same rules apply to medically needy individuals.
2. Aged as defined in legal code sections 42 CFR 435.320 and 42 CFR 435.330.

Other Aged Eligibles

1. Aged individuals who meet more restrictive requirements than SSI and who are either receiving or not receiving SSI; or who qualify under §1619 of the Social Security Act. 42 CFR 435.121, §1619(b)(3) of the Social Security Act, §1902(f) of the Social Security Act, PL 99-643, §7.
2. Aged individuals who are ineligible for optional State supplements or SSI due to requirements that do not apply under Title XIX of the Social Security Act. 42 CFR 435.122.
3. Aged essential spouses considered continuously eligible since 12/73; and some spouses who share hospital or nursing facility rooms for 6 months or more. 42 CFR 435.131.
4. Institutionalized aged individuals who have been continuously eligible since 12/73 as inpatients or residents of Title XIX facilities. 42 CFR 435.132.
5. Aged individuals who would be SSI/SSP eligible except for the 8/72 increase in OASDI benefits. 42 CFR 435.134.
6. Aged individuals who would be eligible for SSI but for Title II cost-of-living adjustment(s). 42 CFR 435.135.
7. Aged aliens who are not lawful, permanent residents or who do not have PRUCOL status, but who are otherwise qualified, and who require emergency care. PL 99-509, §9406.

Managed Care Waiver Aged Eligibles

1. Aged individuals made eligible under the authority of a §1115 waiver due to poverty-level related eligibility expansions. §1115(a)(1), (a)(2) & (b)(1) of the Act, §1902(a)(10), and §1903(m) of the Act.

BLIND/DISABLED**Poverty-related categories for people with Social Security Income**

1. Blind or Disabled individuals receiving Social Security Insurance (SSI), eligible spouses or persons receiving SSI pending a final determination of blindness, disability, and/or disposal of resources exceeding SSI dollar limits; and persons considered to be receiving SSI under Section §1619(b) of the Medicaid law;
2. Blind or Disabled individuals who meet more restrictive requirements than SSI and who are either receiving or not receiving SSI; or who qualify under Section §1619;
3. Blind or Disabled individuals receiving mandatory State supplements;
4. Blind or Disabled individuals who receive a State supplementary payment (but not SSI) based upon need.

Poverty-related categories for people with Medicare

1. Qualified Medicare Beneficiaries (QMB) who are entitled to Medicare Part A, whose income does not exceed 100% of the Federal poverty level, and whose resources do not exceed twice the SSI standard. §§1902(a)(10)(E)(I) and 1905(p)(1) of the Act, PL 100-203, §4118(p)(8), PL 100-360, §301(a) & (e), PL 100-485, §608(d)(14), PL 100-647, §8434.
2. Specified Low-Income Medicare Beneficiaries (SLMB) who meet all of the eligibility requirements for QMB status, except for the income in excess of the QMB income limit, but not exceeding 120% of the Federal poverty level. §4501(b) of OBRA 90 as amended in §1902(a)(10)(E)(I) of the Act.
3. Qualifying individuals having higher income than allowed for QMB or SLMB. §1902(a)(10)(E)(iv) of the Act.
4. Qualified Disabled Working Individuals (QDWI) who are entitled to Medicare Part A. §§1902(a)(10)(E)(ii) and 1905(s) of the Act.
5. Disabled individuals not described in §1902(a)(10)(A)(1) of the Act, with income below the poverty level and resources within state limits, which are entitled to full Medicaid benefits. §§1902(a)(10)(A)(ii)(X), 1902(m)(1) and (3) of the Act, P.L. 99-509, §§9402 (a) and (b).

Medically Needy

1. Blind and/or disabled individuals who would be ineligible if not enrolled in an HMO. Categorically needy individuals are covered under 42 CFR 435.212 and the same rules apply to medically needy individuals. 42 CFR 435.326.
2. Blind/Disabled 42 CFR 435.322, 42 CFR 435.324, 42 CFR 435.330.
3. Blind and/or disabled individuals who meet all Medicaid requirements except current blindness and/or disability criteria, and have been continuously eligible since 12/73 under the State's requirements. 42 CFR 435.340.

Other Blind or Disabled Eligibles

1. Blind and/or disabled individuals who meet more restrictive requirements than SSI, including both those receiving and not receiving SSI payments 42 CFR 435.121, §1619(b)(3) of the Act, §1902(f) of the Act, PL 99-643, §7.

2. Blind and/or disabled individuals who are ineligible for optional State supplements or SSI due to requirements that do not apply under title XIX. 42 CFR 435.122.
3. Blind and/or disabled essential spouses considered continuously eligible since 12/73; and some spouses who share hospital or nursing facility rooms for 6 months or more. 42 CFR 435.131.
4. Institutionalized blind and/or disabled individuals who have been continuously eligible since 12/73 as inpatients or residents of Title XIX facilities. 42 CFR 435.132.
5. Blind and/or disabled individuals who would be SSI/SSP, eligible except for the 8/72 increase in OASDI benefits. 42 CFR 435.134.
6. Blind and/or disabled individuals who would be eligible for SSI but for title II cost-of-living adjustment(s). 42 CFR 435.135, §503 PL 94-566.
7. Blind and/or disabled aliens who are not lawful, permanent residents or who do not have PRUCOL status, but who are otherwise qualified, and who require emergency care. PL 99-509, §9406.
8. Blind and/or disabled individuals who meet all Medicaid requirements except current blindness, or disability criteria, who have been continuously eligible since 12/73 S42 CFR 435.133

Managed Care Waiver Blind or Disabled Eligibles

1. Blind and/or disabled individuals made eligible under the authority of a §1115 waiver due to poverty-level-related eligibility §1115(a)(1), (a)(2) & (b)(1) of the Act, §1902(a)(10), and §1903(m) of the Act.

CHILDREN

Poverty-related categories for Families and Children who are Legally Adult

1. Low Income Families with Children qualified under Section §1931 of the Medicaid law;
2. Children age 18 who are regularly attending a secondary school or the equivalent of vocational or technical training.

Poverty-related categories for Children

1. Infants and children up to age 6 with income at or below 133% of the Federal Poverty Level (FPL). §§1902(a)(10)(A)(I)(IV) & (VI), 1902(l)(1)(A), (B), & (C) of the Act, PL 100-360, §302(a)(1), PL 100-485, §608(d)(15).
2. Children under age 19 (born after 9/30/83) whose income is at or below 100% of the Federal poverty level within the State's resource requirements. §1902(a)(10)(A)(I) (VII) of the Act.
3. Infants under age 1 whose family income is below 185% of the poverty level and who are within any optional State resource requirements. §§1902(a)(10)(A)(ii) (IX) and 1902(l)(1)(D) of the Act, PL 99-509, §§9401(a) & (b), PL 100-203, §4101.
4. Children made eligible under the more liberal income and resource requirements as authorized under §1902(r)(2) of the Act when used to disregard income on a poverty-level-related basis. §1902(r)(2) of the Act.
5. Children made eligible by a Title XXI Medicaid expansion under the State Child Health Insurance Program (SCHIP) P.L. 105-100.

Medically Needy

1. Individuals under age 18 who, but for income and resources, would be eligible. §1902(a)(10)(C)(ii)(I) of the Act, PL 97-248, §137.

2. Infants under the age of 1 and who were born after 9/30/84 to and living in the household of medically needy women. §1902(e)(4) of the Act, PL 98-369, §2362.
3. Other financially eligible individuals under age 18-21, as specified by the State. 42 CFR 435.308.
4. Children who would be ineligible if not enrolled in an HMO. Categorically needy individuals are covered under 42 CFR 435.212 and the same rules apply to medically needy individuals. 42 CFR 435.326.

Other Child Eligibles

1. Children of families receiving up to 12 months of extended Medicaid benefits (for those eligible after 4/1/90). §1925 of the Act, PL 100-485, §303.
2. "Qualified children" under age 19 born after 9/30/83 or at an earlier date at State option, who meet the State's §§1902(a)(10)(A)(I)(III) and 1905(n) of the Act, AFDC income and resource requirements. PL 98-369, §2361, PL 99-272, §9511, PL 100-203, §4101.
3. Children of individuals who are ineligible for AFDC related Medicaid because of requirements that do not apply under title XIX. 42 CFR 435.113.
4. Children of individuals who would be eligible for Medicaid under §1931 of the Act (Low income families with children) except for the 7/1/72 (PL 92-325) OASDI increase and were entitled to OASDI and received cash assistance in 8/72. 42 CFR 435.114.
5. Children whose mothers were eligible for Medicaid at the time of childbirth, and are deemed eligible for one year from birth as long as the mother remained eligible, or would have if pregnant, and the child remains in the same household as the mother. 42 CFR 435.117, §1902(e)(4) of the Act, PL 98-369, §2362.
6. Children of aliens who are not lawful, permanent residents or who do not have PRUCOL status, but who are otherwise qualified, and who require emergency care. PL 99-509, §9406.
7. Children who meet income and resource requirements for AFDC, SSI, or an optional State supplement 42 CFR 435.210, §1902(a)(10)(A)(ii) and §1905 of the Act.
8. Children who would be eligible for AFDC, SSI, or an optional State supplement if not in a medical institution. 42 CFR 435.211, §1902(a)(10)(A)(ii) and §1905(a) of the Act.
9. Children who have become ineligible who are enrolled in a qualified HMO or "§1903(m)(2)(G) entity" that has a risk contract. 42 CFR 435.212, §1902(e)(2) of the Act, PL 99-272, §9517, PL 100-203, §4113(d).
10. Children of individuals who elect to receive hospice care, and who would be eligible if in a medical institution. §1902(a)(10)(A)(ii)(VII), PL 99-272, §9505.
11. Children who would be eligible for AFDC if work-related child care costs were paid from earnings rather than received as a State service. 42 CFR 435.220.
12. Children of individuals who would be eligible for AFDC if the State used the broadest allowable AFDC criteria. 42 CFR 435.223, §§1902(a)(10)(A)(ii) and 1905(a) of the Act.
13. Children who solely because of coverage under a home and community based waiver, are not in a medical institution, but who would be eligible if they were. 42 CFR 435.217, §1902(a)(10)(A)(ii)(VI) of the Act.
14. Children not described in §1902(a)(10)(A)(I) of the Act, "Ribikoff Kids", who meet AFDC income and resource requirements, and are under a State-established age (18-21). §§1902(a)(10)(A)(ii) and 1905(a)(I) of the Act, PL 97-248, §137.

Managed Care Waiver Child Eligibles

1. Children made eligible under the authority of a §1115 waiver due to poverty-level-related eligibility §1115(a)(1), (a)(2) & (b)(1) of the Act, §1902(a)(10), and §1903(m) of the Act.

ADULTS**Poverty-related categories for people with Incomes Below 100% of the Federal Poverty Level**

1. Adults deemed essential for well-being of a recipient qualified for Medicaid under Section §1931 of the Medicaid law;
2. Pregnant women who have no other eligible children and Other adults in "adult only" units.

Poverty-related categories for people with Incomes Above 100% of the Federal Poverty Level

1. Pregnant women with incomes at or below 133% of the Federal Poverty Level. §1902(a)(10)(A)(I), (IV) and (VI); §1902(l)(1)(A), (B), & (C) of the Act, PL 100-360, §302(a)(1), PL 100-485, §608(d)(15).
2. Women who are eligible until 60 days after their pregnancy, and whose incomes are below 185% of the FPL and have resources within any optional State resource requirements. §§1902(a)(10)(A)(ii)(IX) and 1902(l)(1)(D) of the Act, PL 99-509, §§9401(a) & (b), PL 100-203, §4101.
3. Caretaker relatives and pregnant women made eligible under more liberal income and resource requirements of §1902(r)(2) of the Act when used to disregard income on a poverty-level related basis. §1902(r)(2) of the Act.
4. Adults made eligible by a Title XXI Medicaid expansion under the State Child Health Insurance Program (SCHIP). Title XXI of the Social Security Act.

Medically Needy

1. Pregnant women. 42 CFR 435.301.
2. Caretaker relatives who, but for income and resources, would be eligible. 42 CFR 435.310.
3. Adults who would be ineligible if not enrolled in an HMO. Categorically needy individuals are covered under 42 CFR 435.212 and the same rules apply to medically needy individuals. 42 CFR 435.326.

Other Adult Eligibles

1. Families receiving up to 12 months of extended Medicaid benefits (if eligible on or after 4/1/90). §1925 of the Act, PL 100-485, §303.
2. Qualified pregnant women whose pregnancies have been medically verified and who meet the State's AFDC income and resource requirements. §§1902(a)(10)(A)(I)(III) and 1905(n) of the Act, PL 98-369, §2361, PL 99-272, §9511, PL 100-203 §4101.
3. Adults who are ineligible for AFDC-related Medicaid because of requirements that do not apply under title XIX. 42 CFR 435.113.
4. Adults who would be eligible for Medicaid under §1931 of the Act (Low income families with children) except for the 7/1/72 (PL 92-325) OASDI increase; and were entitled to OASDI and received cash assistance in 8/72. 42 CFR 435.114.
5. Women who were eligible while pregnant, and are eligible for family planning and pregnancy related services until the end of the month in which the 60th day occurs after the pregnancy §1902(e)(5) of the Act, PL 98-369, PL 100-203, §4101, PL 100-360, §302(e).
6. Adult aliens who are not lawful, permanent residents or who do not have PRUCOL status, but who are otherwise qualified, and who require emergency care. PL 99-509, §9406.
7. Adults who meet the income and resource requirements for AFDC, SSI, or an optional State Supplement. 42 CFR 435.210, §§1902(a)(10)(A)(ii) and 1905 of the Act.
8. Adults who would be eligible for AFDC, SSI, or an optional State Supplement if not in a medical institution. 42 CFR 435.211, §§1902(a)(10)(A)(ii) and 1905(a) of the Act.

9. Adults who have become ineligible who are enrolled in a qualified HMO or "§1903(m)(2)(G) entity" that has a risk contract. 42 CFR 435.212, §1902(e)(2)(A) of the Act, PL 99-272, §9517, PL 100-203, §4113(d).
10. Adults who solely because of coverage under a home and community based waiver, are not in a medical institution, but who would be eligible if they were. 42 CFR 435.217, §1902(a)(10)(A)(ii)(VI) of the Act.
11. Adults who elect to receive hospice care, and who would be eligible if in a medical institution. §1902(a)(10)(A)(ii), (VII); PL 99-272, §9505.
12. Adults who would be eligible for AFDC if work-related child care costs were paid from earnings rather than received as a State service. 42 CFR 435.220.
13. Pregnant women who have been granted presumptive eligibility. §§1902(a)(47) and 1920 of the Act, PL 99-509, §9407.
14. Adults who would be eligible for AFDC if the State used the broadest allowable AFDC criteria. 42 CFR 435.223, §§1902(a)(10)(A)(ii) and 1905(a) of the Act.

Managed Care Waiver Blind or Disabled Eligibles

1. Caretaker relatives, pregnant women and/or adults without dependent children made eligible under the authority of a §1115 waiver due to poverty-level-related eligibility §1115(a)(1), (a)(2) & (b)(1) of the Act, §1902(a)(10), and §1903(m) of the Act.

FOSTER CARE

Other Eligibles

1. Children for whom the State makes adoption assistance or foster care maintenance payments under Title IV-E. 42 CFR 435.145, §1902(a)(10)(A)(i)(I) of the Act.
2. Children with special needs covered by State foster care payments or under a State adoption assistance agreement which does not involve Title IV-E. §1902(a)(10)(A)(ii) (VIII) of the Act, PL 99-272, §9529.
3. Children leave foster care due to age. Foster Care Independence Act of 1999.

TERMS FOR MEDICAID SERVICES AND PAYMENTS

Outpatient Services – Outpatient services include preventive, diagnostic, therapeutic, rehabilitative, and palliative services, furnished by a facility that is licensed or formally approved as a hospital to people not admitted to stay in the facility. The most common services used by AIAN Eligibles served through Medicaid are outpatient services.

Clinic Services – Clinic services include preventive, diagnostic, therapeutic, rehabilitative, and palliative items or services that are provided to outpatients by a facility that is not part of a hospital but is organized and operated to provide medical care to people who do not stay in any clinical facility.

Physicians' Services – Physician services are those services provided within the scope of practice of medicine or osteopathy as defined by state law by a licensed individual whether furnished in a physician's office, a recipient's home, a hospital, a nursing facility, or elsewhere. Services provided

by dentists within the scope of their practice are included if allowed by state law. Services provided under the personal supervision of such an individual are also included.

Prescribed Drugs – Prescribed drugs include filled prescriptions for medications for the cure, mitigation, or prevention of disease or for health maintenance that are prescribed by a physician or other licensed practitioner within the scope of professional practice as defined and limited by federal and state law on a written prescription that is recorded and maintained in the pharmacist's or practitioner's records; and dispensed by licensed pharmacists and licensed authorized practitioners in accordance with the State Medical Practice Act.

Inpatient Hospital Services – Inpatient hospital services are ordinarily furnished in a hospital for the care and treatment of people who are admitted to stay for treatment for disorders other than mental diseases under the direction of a physician or dentist. The facility is licensed or formally approved (as for Outpatient Services above) and has in effect a utilization review plan applicable to all Medicaid patients unless a waiver has been granted by the Secretary of Health and Human Services.

Laboratory and Imaging Services – Laboratory and imaging services in this category are professional or technical laboratory or imaging services (X-rays, CAT scans, MRI, etc) that are provided by a facility *other than a hospital inpatient or outpatient department or clinic*. Laboratory and imaging services provided within I/T hospitals, outpatient departments and clinics thus are not included, only those services ordered from outside laboratories. X-ray services provided by dentists are reported under dental services.

Dental Services – Dental services include diagnostic, preventive, or corrective procedures provided by or under the supervision of a dentist in the practice of his or her profession, including treatment of the teeth and associated structures of the oral cavity; and disease, injury, or an impairment that may affect the oral or general health of the recipient. A dentist is an individual licensed to practice dentistry or dental surgery. Dental services include dental screening and dental clinic services and services related to providing and fitting dentures as dental services. Dental services included in this Medicaid category do not include services provided as part of inpatient hospital, outpatient hospital, non-dental clinic, or laboratory services and billed by the hospital, non-dental clinic, or laboratory or services.

Home Health Services – These are services provided at the patient's place of residence, in compliance with a physician's written plan of care. Mandatory services include nursing services provided on a part-time or intermittent basis by a home health agency (a public or private agency or organization, or part of any agency or organization that meets the requirements for participation in Medicaid). If there is no agency in the area, it is mandatory that the services be provided by a registered nurse who is licensed to practice in the State, receives written orders from the patient's physician, documents the care and services provided; and has had orientation to acceptable clinical and administrative record keeping from a health department nurse. Services must also include home health aide services provided by a home health agency; and medical supplies, equipment, and appliances suitable for use in the home. Other services are optional: physical therapy, occupational therapy, or speech pathology and audiology services.

Intermediate Care Facilities Services – These are services provided in an institution for mentally retarded persons or persons with related conditions if the primary purpose of the institution is to provide health or rehabilitative services to such individuals.

Nursing Facilities Services – These are services provided in an institution (or a distinct part of an institution) which is primarily engaged in providing to residents: 1) Skilled nursing care and related services for residents who require medical or nursing care; 2) Rehabilitation services for the rehabilitation of injured, disabled, or sick persons, or 3) health-related care and services to individuals who, because of their mental or physical condition, require care and services on a regular basis above the level of room and board) which can be made available to them only through institutional facilities.

Mental Health Facility Services – An institution for mental diseases is a hospital, nursing facility, or other institution that is primarily engaged in providing diagnosis, treatment or care of individuals with mental diseases, including medical care, nursing care, and related services.

Other Care – Transportation, abortion, and other services do not meet the definitions of any of the previously described service categories. They may include, but are not limited to, Prosthetic devices, Eyeglasses, and Home and Community-Based Waiver services (for example, community homes for the disabled and adult day care).

Other Licensed Practitioners' Services – These are medical or remedial care or services, other than physician services or services of a dentist, provided by licensed practitioners within the scope of practice as defined under State law who can file claims for their services with the state Medicaid program. The category “Other Licensed Practitioners' Services” is different than the “Other Care” category. Examples of other practitioners (if covered under State law) include: Chiropractors; Podiatrists; Psychologists; and Optometrists. Speech therapists, audiologists, opticians, physical therapists, and occupational therapists are not included within Other Licensed Practitioners' Services. Other Licensed Practitioners' Services do not include prosthetic devices billed by physicians, laboratory or X-ray services provided by other practitioners, or services of other practitioners that are included in inpatient or outpatient hospital bills. These services are counted under the related type of service as appropriate. Devices billed by providers not included under the listed types of service are counted under Other Care.

Capitated Care – Capitated care Eligibles and capitated payments for the plan types defined in Health Maintenance Organization (HMO) and Prepaid Health Plans contracted to provide capitated comprehensive and less than comprehensive services. A Prepaid Health Plan is an entity that provides a non-comprehensive set of services on either capitated risk or non-risk basis or the entity provides comprehensive services on a non-risk basis.

Primary Care Case Management – The State contracts directly with primary care providers who agree to be responsible for the provision and/or coordination of medical services to Medicaid recipients under their care. Currently, most such programs pay the primary care physician a monthly case management fee. Where the fee includes services beyond case management, the Eligibles and fees are reported under prepaid health plans.

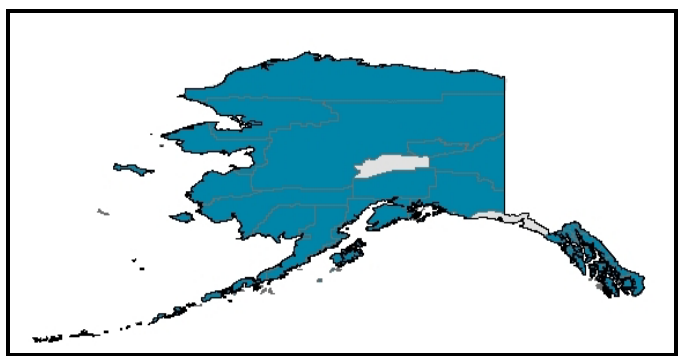

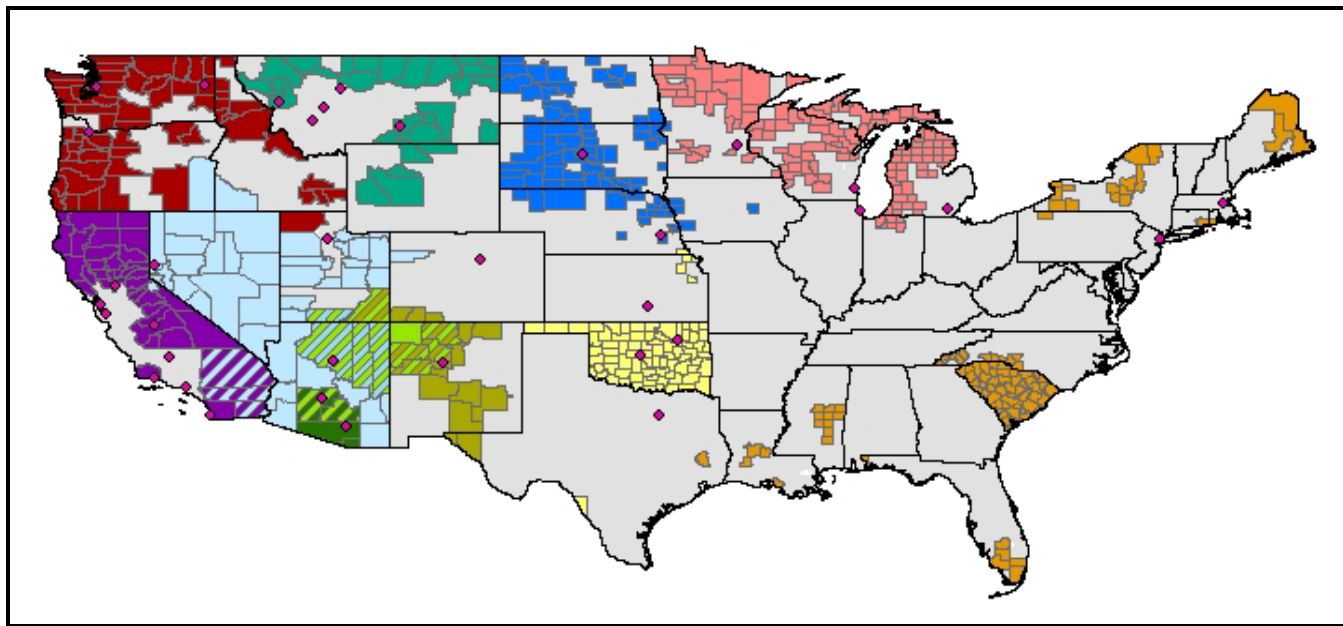

Personal Support Services – This service category includes services furnished to an individual who is not an inpatient or resident of a hospital, nursing facility, intermediate care facility for the mentally retarded, or institution for mental disease that are authorized for an individual usually in accordance with an approved service plan. The services include Personal Care Services, Targeted Case Management Services, and Rehabilitative Services, Physical Therapy, Occupational Therapy, and Services for Individuals with Speech, Hearing, and Language Disorders, Hospice Services, Nurse

Midwife, Nurse Practitioner, Private Duty Nursing, and Religious Non-Medical Health Care Institutions.

Sterilizations – Sterilizations are medical procedures, treatments, or operations for the purpose of rendering an individual permanently incapable of reproducing.

IHS AREAS MAPPED

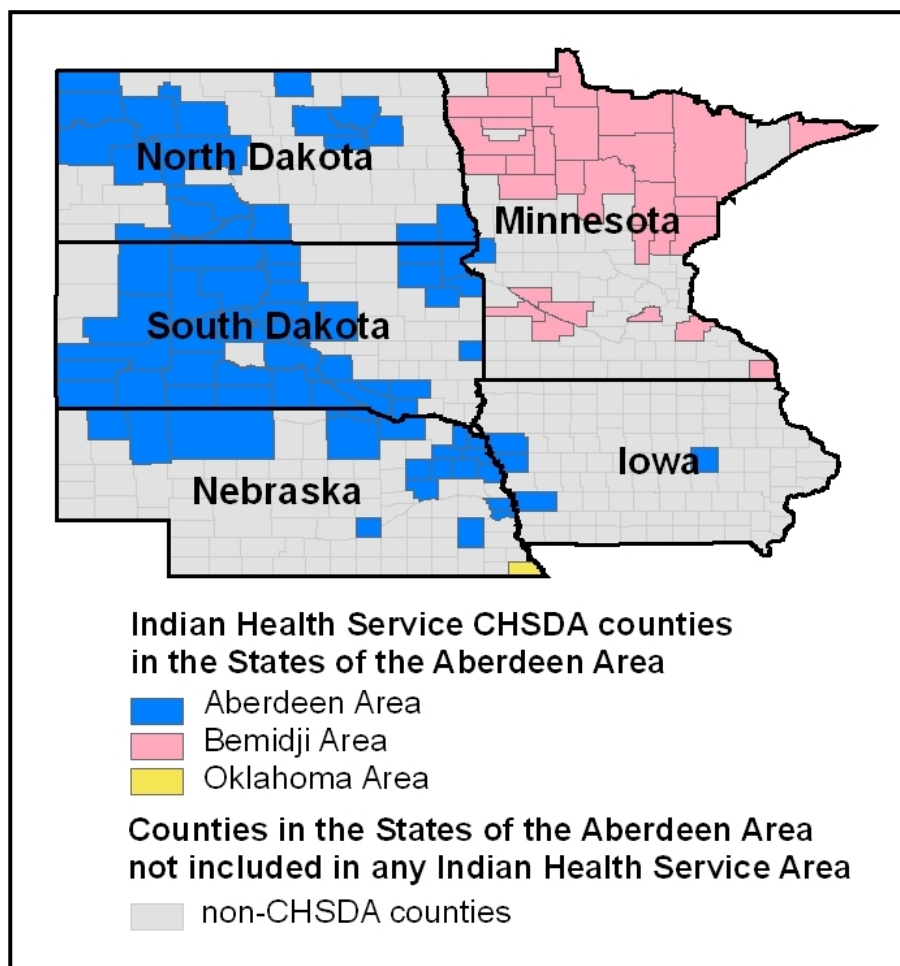

12 Indian Health Service (IHS) Areas and Urban Centers in the United States

- Aberdeen
- Albuquerque
- Billings
- Bemidji
- California
- Nashville
- Navajo
- Oklahoma
- Phoenix
- Portland
- Tucson
- Urban Centers
- Alaska

ABERDEEN AREA

The Aberdeen IHS Area has CHSDA counties in 5 states. Of the 408 counties in these 5 states, 83 (20%) are Aberdeen CHSDA counties. There are 29 CHSDA counties (7%) that belong to other IHS Areas in two of the Aberdeen Area states (Minnesota and Nebraska).

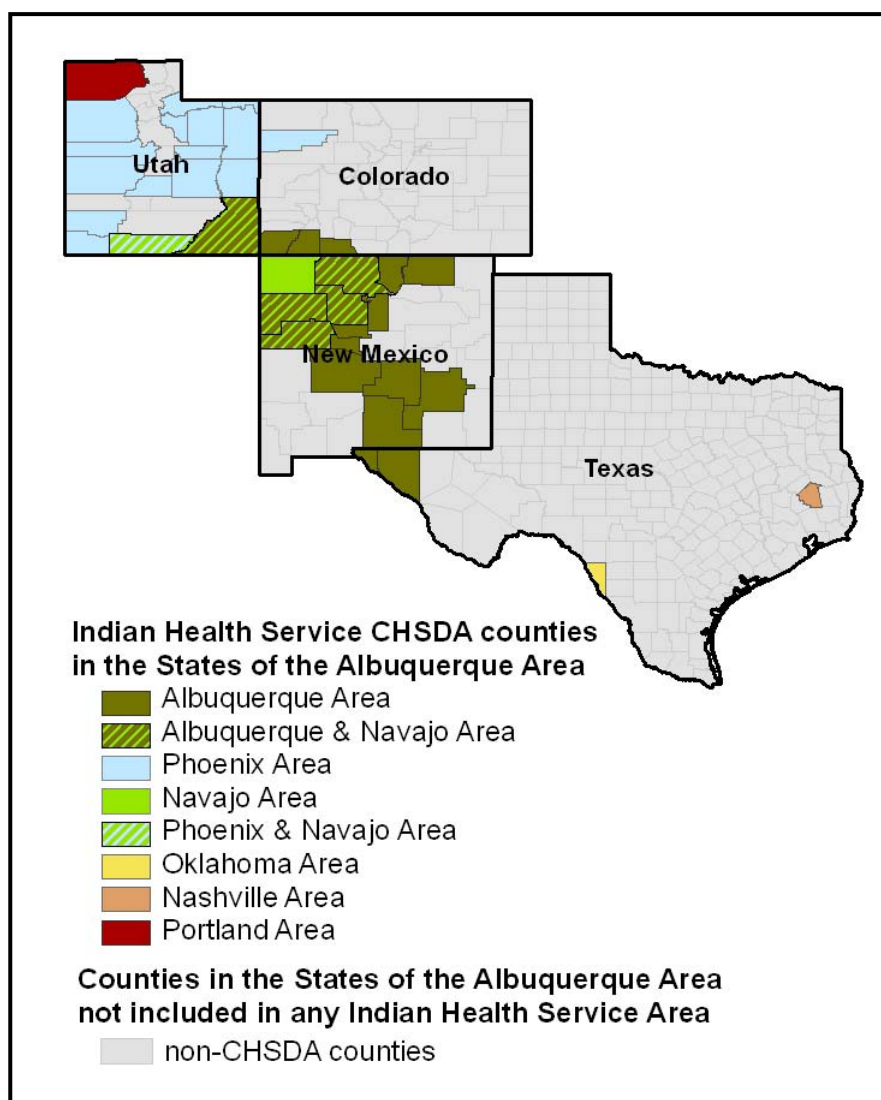

ALASKA AREA

The Alaska IHS Area has CHSDA counties in one state. Of the 27 boroughs/geographical census areas in the state of Alaska, 25 (93%) are Alaska CHSDA counties. The remaining 2 boroughs/geographical census areas are not in an IHS area.

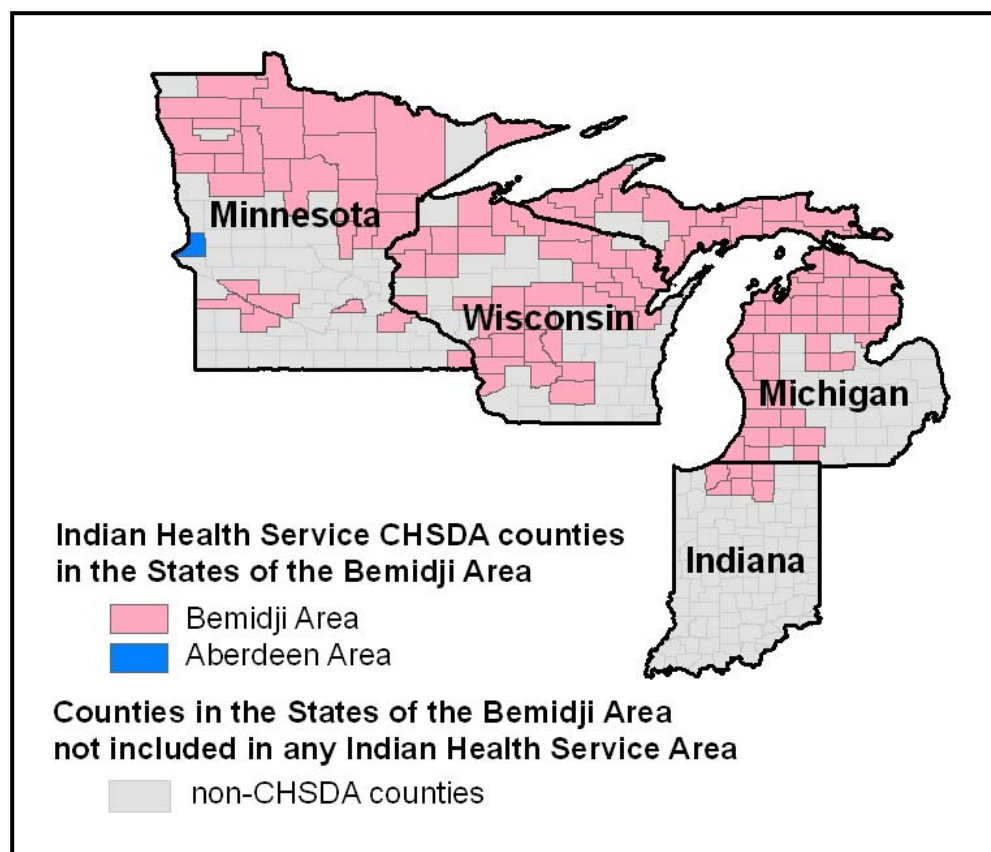

ALBUQUERQUE AREA

The Albuquerque IHS Area has CHSDA counties in 4 states. Of the 380 counties in these 4 states, 20 (5%) are Albuquerque CHSDA counties. There are 24 CHSDA counties (6%) that belong to other IHS Areas in all 4 states of the Albuquerque Area. Utah has 1 CHSDA county that is shared between the Albuquerque IHS Area and the Navajo IHS Area.

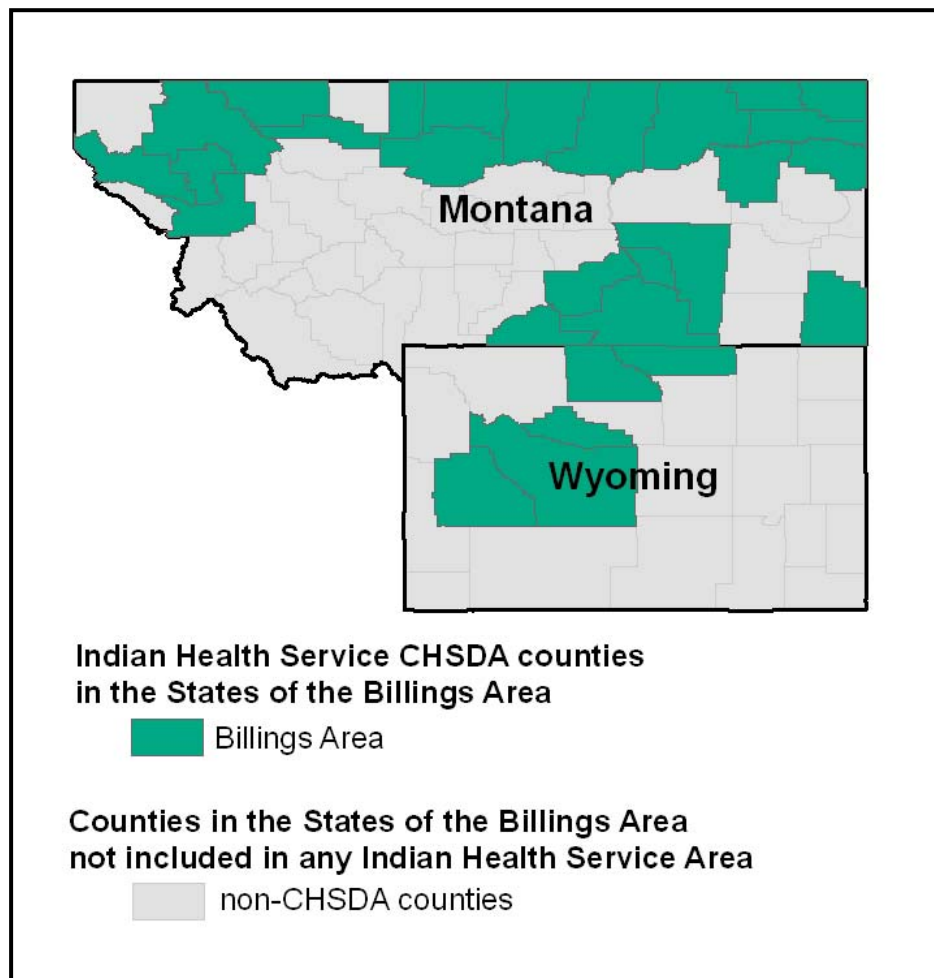

BEMIDJI AREA

The Bemidji IHS Area has CHSDA counties in 4 states. Of the 334 counties in these 4 states, 119 (36%) are Bemidji CHSDA counties. There is 1 CHSDA county that belongs to another IHS Area.

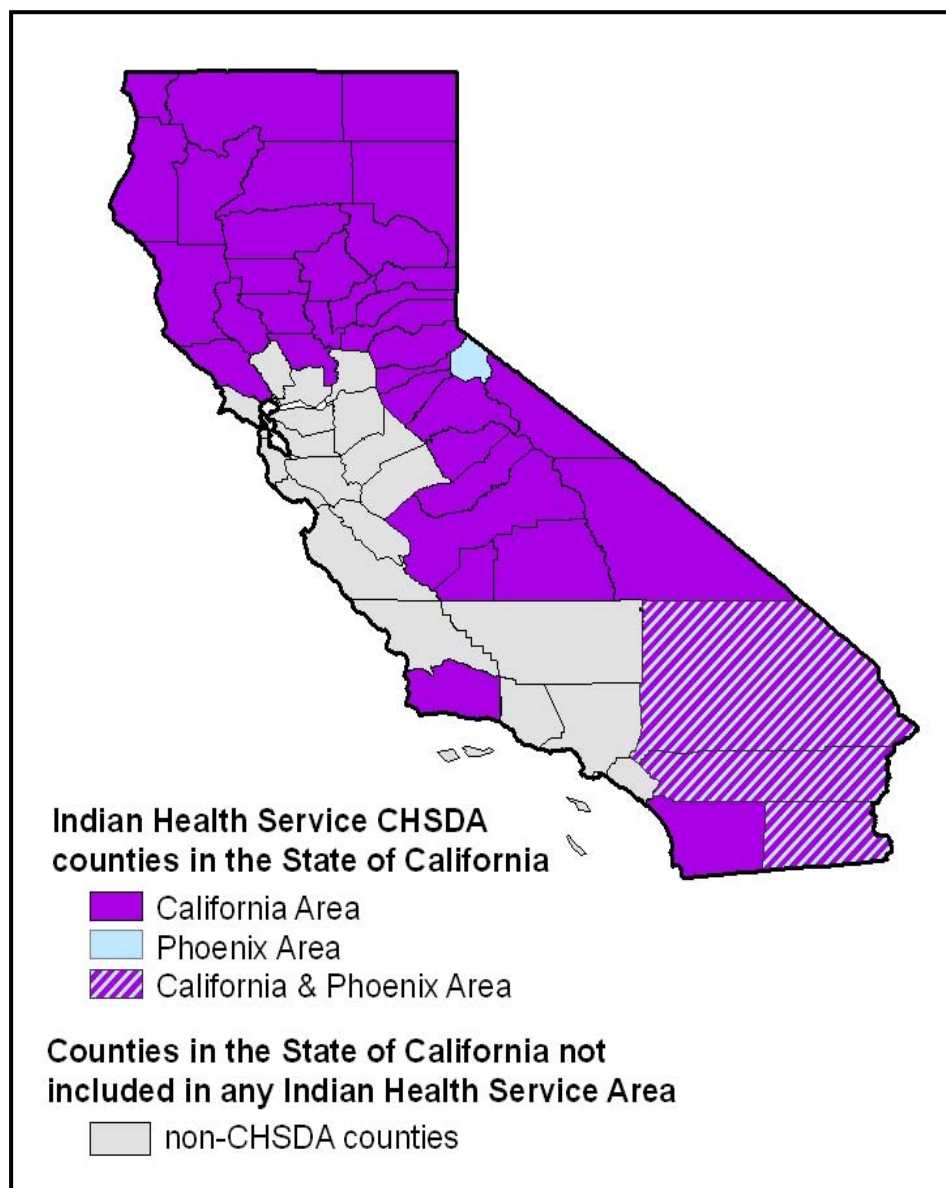

BILLINGS AREA

The Billings IHS Area has CHSDA counties in 2 states. Of the 79 counties in these 2 states, 28 (35%) are Billings CHSDA counties.

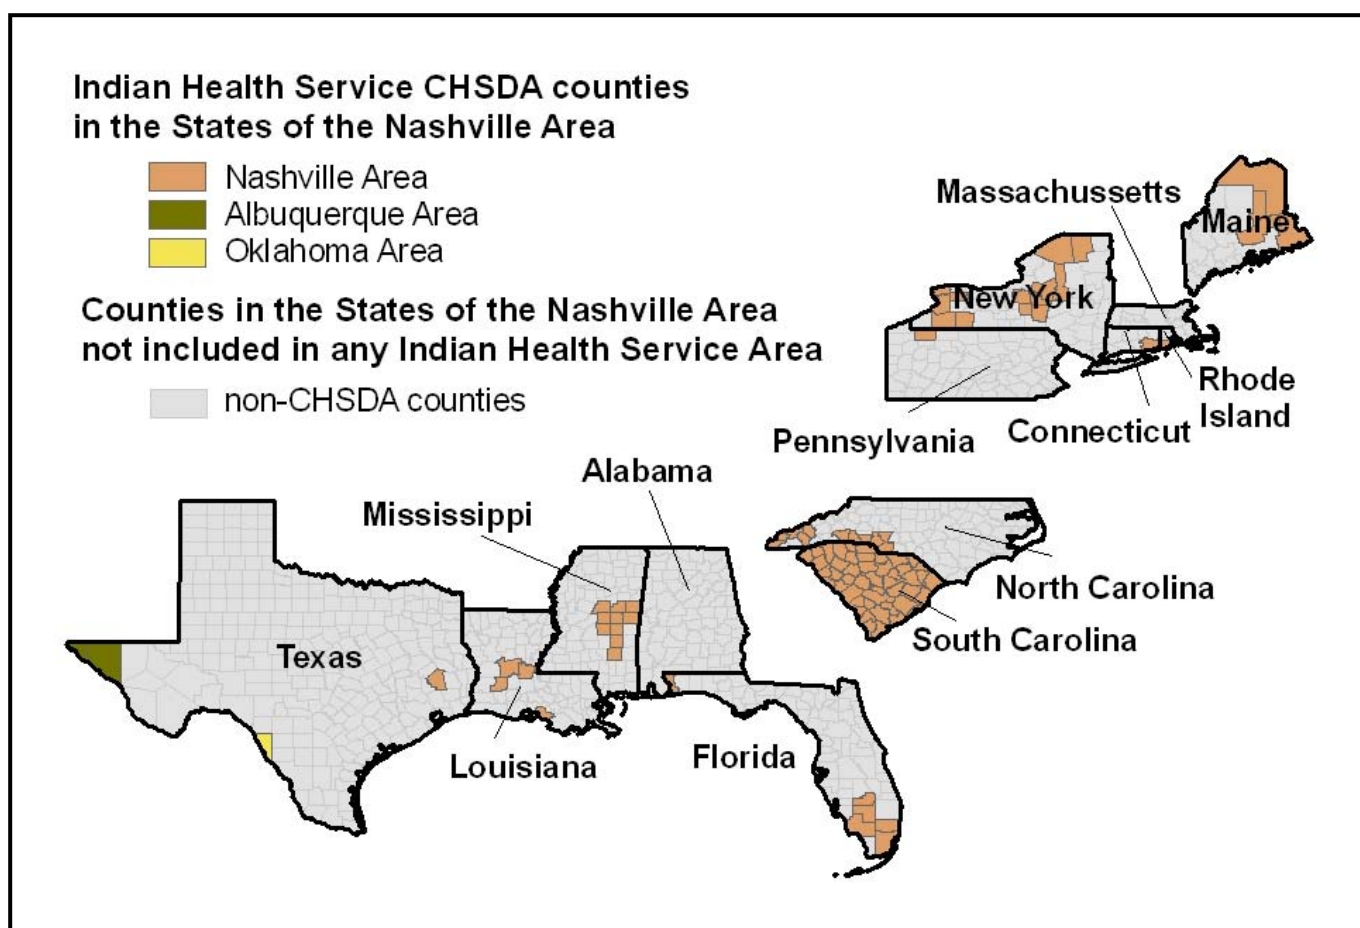

CALIFORNIA AREA

The California IHS Area has CHSDA counties in the state of California. Of the 58 counties in California, 37 (64%) are California CHSDA counties. There is 1 CHSDA counties that belongs to another IHS Area, and 3 CHSDA counties are shared between the California IHS Area and the Phoenix IHS Area. The remaining 20 counties of California are not in an IHS Area.

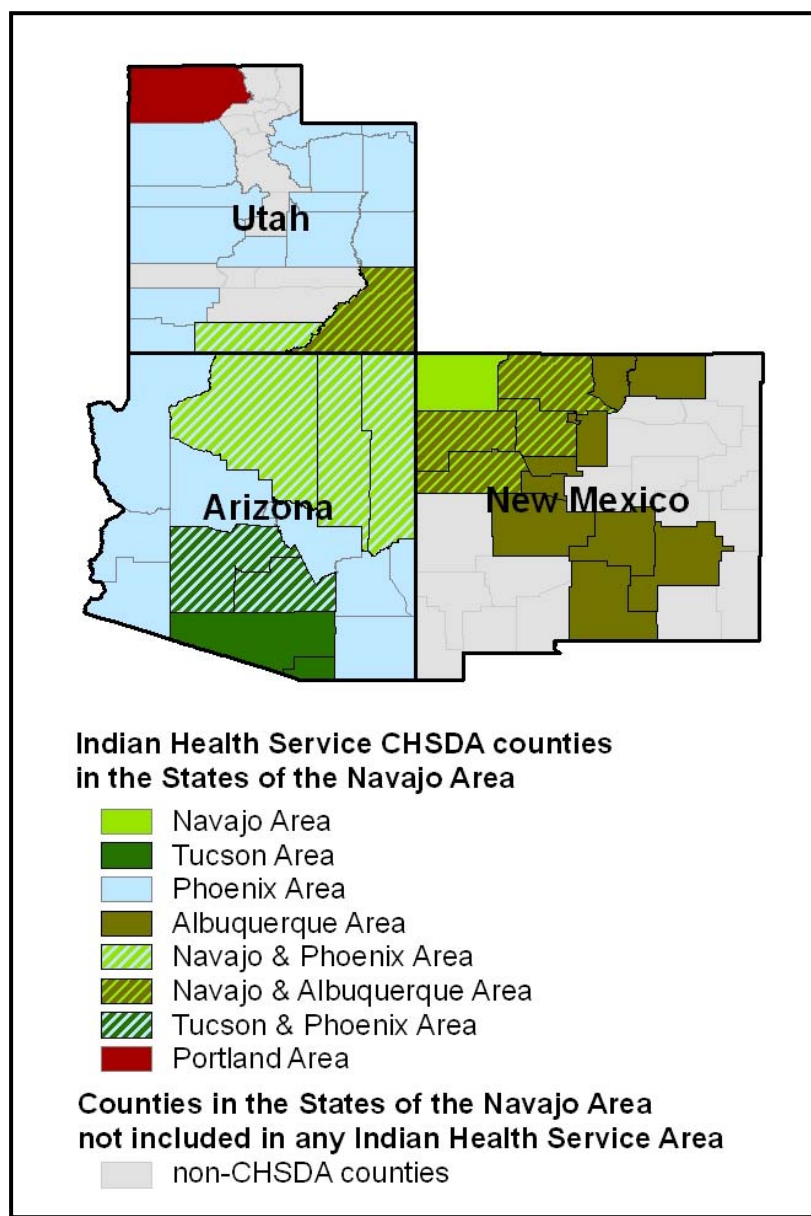

NASHVILLE AREA

The Nashville IHS Area has CHSDA counties in 13 states. Of the 848 counties in these 13 states, 103 (12%) are Nashville CHSDA counties. Texas has 3 counties that belong to two other IHS Areas. Every county in the state of South Carolina is a Nashville Area CHSDA county; it is one of only three states where state-level Medicaid data is appropriate.

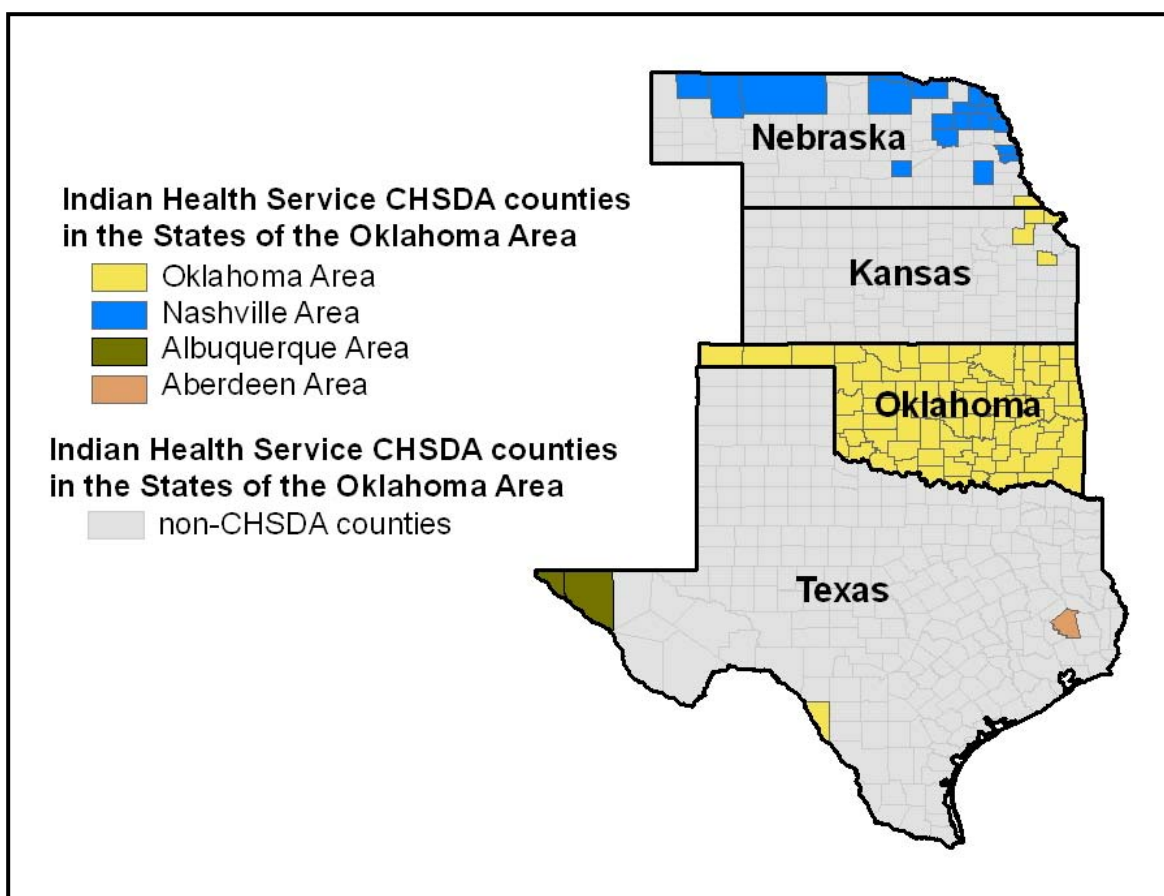

NAVAJO AREA

The Navajo IHS Area has CHSDA counties in 3 states. Of the 77 counties in these 3 states, 10 (13%) are Navajo CHSDA counties. There are 37 CHSDA counties (48%) that belong to other IHS areas in all 3 of the Navajo Area states. All of the states include counties that are shared between 2 IHS Areas.

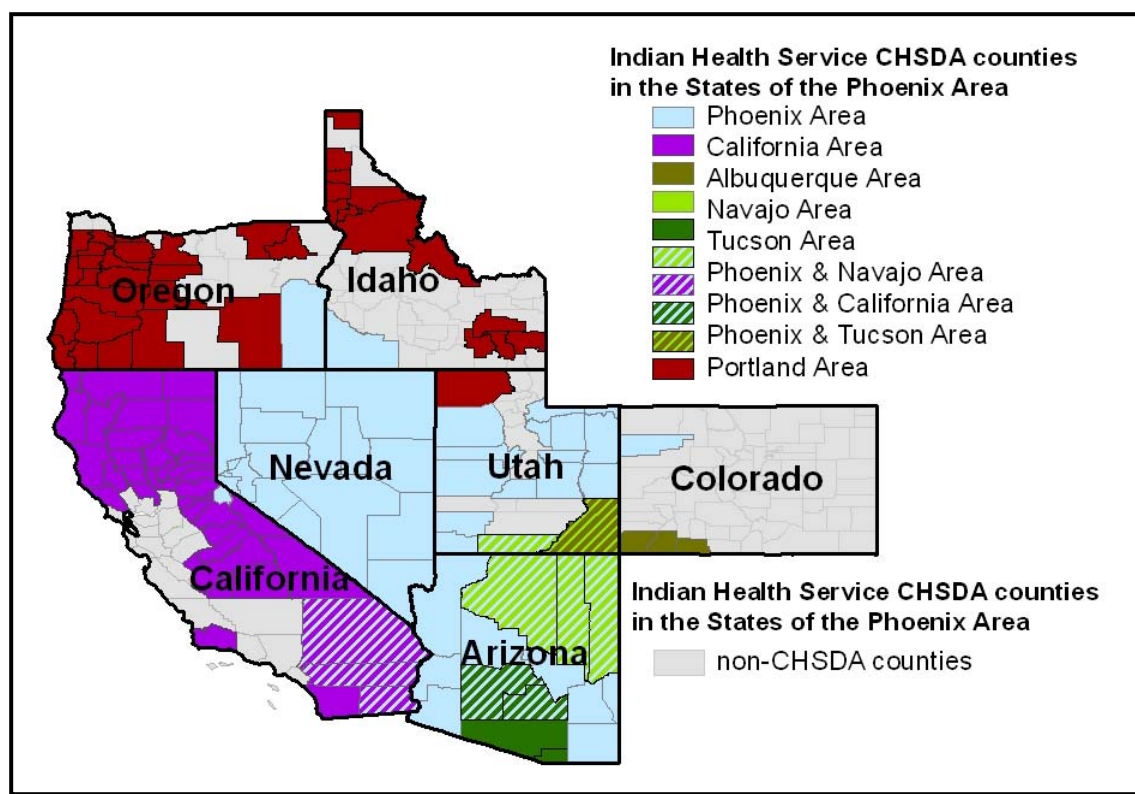

OKLAHOMA AREA

The Oklahoma IHS Area has CHSDA counties in 4 states. Of the 529 counties in these 4 states, 83 (16%) are Oklahoma CHSDA counties. There are 24 CHSDA counties (5%) that belong to other IHS Areas in 2 of the Oklahoma Area states. Every county in the state of Oklahoma is an Oklahoma Area CHSDA county; it is one of only three states where state-level Medicaid data is appropriate.

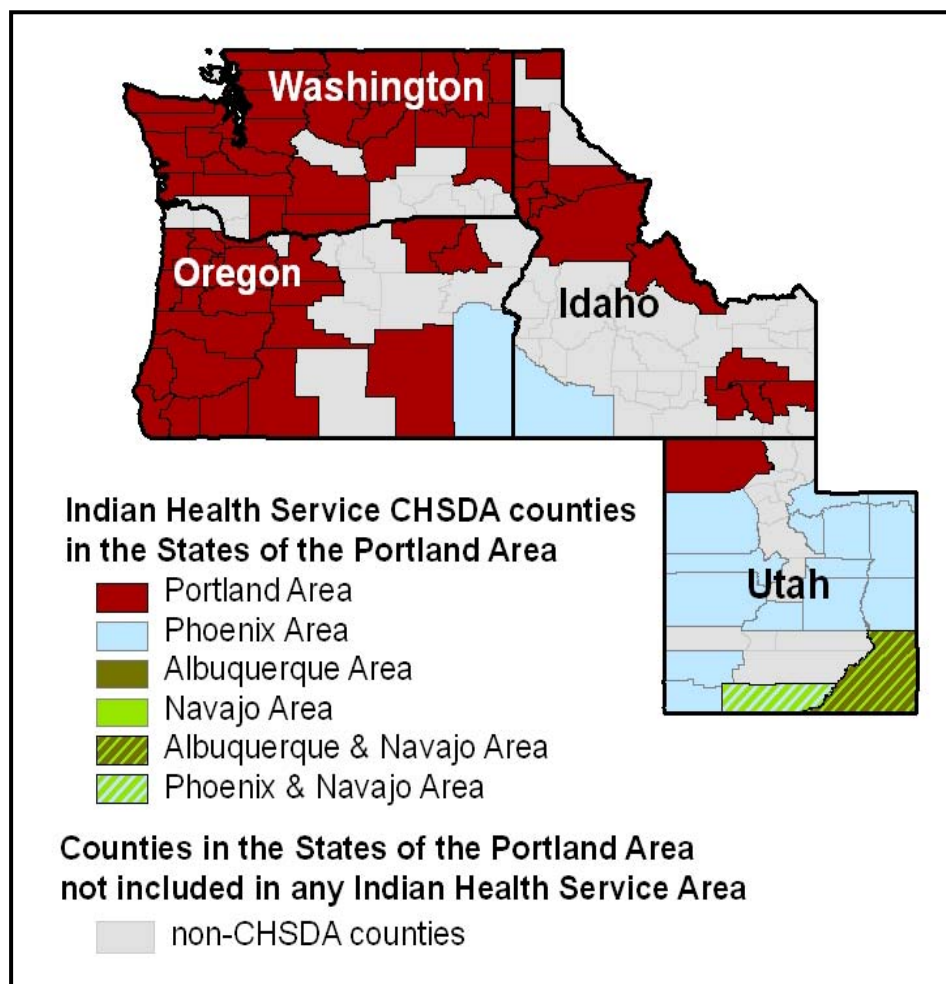

PHOENIX AREA

The Phoenix IHS Area has CHSDA counties in 7 states. Of the 263 counties in these 7 states, 52 (20%) are Phoenix CHSDA counties. Six states in the Phoenix Area have counties that belong to more than one IHS Area. Three of the states have Phoenix CHSDA counties that are shared with other IHS Areas. Every county in the state of Nevada is a Phoenix Area CHSDA county; it is one of only three states where state-level Medicaid data is appropriate.

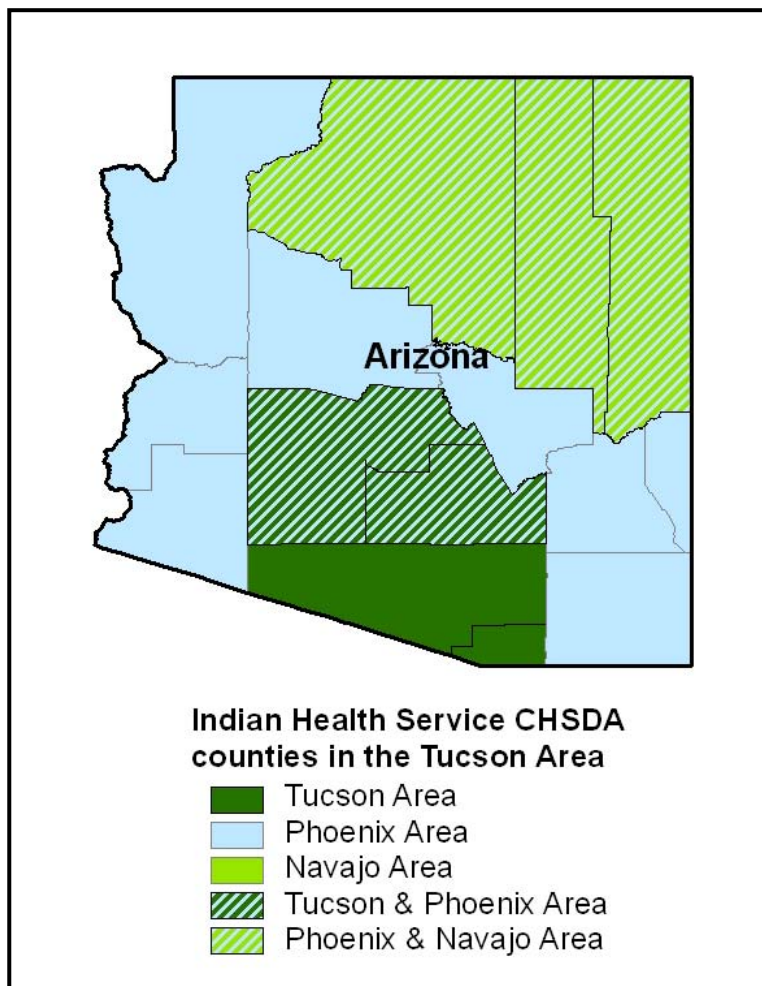

PORTLAND AREA

The Portland IHS Area has CHSDA counties in 4 states. Of the 148 counties in these 4 states, 64 (43%) are Portland CHSDA counties. Three of the states in this area have counties that belong to more than one IHS Area, and one state has CHSDA counties that are shared with other IHS Areas.

TUCSON AREA

The Tucson IHS Area has CHSDA counties in 1 state. Of the 15 counties in these Arizona, 4 (27%) are Tucson CHSDA counties. The remaining counties are in other IHS Areas. Some of the Tucson CHSDA counties are shared with other IHS Areas.

MEDICAID DATA

IHS AREA STATES

In the Medicaid tables and highlights that follow the label “AIAN” means that the Medicaid data system had a single race indicated for the person on their application for Medicaid that was American Indian or Alaska Native (AIAN), and there was no Hispanic ethnicity indicated. This is **not** the same as the Census or IHS definition for AIAN as explained in the Major Findings. As shown in the IHS Program data tables after the Medicaid and Medicaid SCHIP tables, this Medicaid definition of AIAN, as well as problems in obtaining race-ethnicity data in the system, contribute to low numbers of AIAN in these Medicaid data tables.

Medicaid data in the tables and highlights is statewide and includes all counties, **not** just IHS service delivery area counties (CHSDA) as explained in the Major Findings. Therefore the table with the National data is not restricted to IHS service delivery area (CHSDA) counties, but includes statewide data for 35 states. All 35 states with at least one county in an IHS Area reported Medicaid data for AIAN.

HIGHLIGHTS FOR THE 35 IHS AREA STATES

- Medicaid Data was reported for nearly 735,720 AIAN determined to be eligible for Medicaid (called Eligibles in the tables).
- Nationally more AIAN Medicaid Eligibles were female (57%) than male (43%), similar to other Eligibles of any other race-ethnicity code.
- More AIAN Medicaid Eligibles were children (57%) than adults (38%) or elders (5%).
- A larger portion of AIAN Medicaid Eligibles were children (57%) than other Eligibles (49%).
- A smaller portion of AIAN Medicaid Eligibles were elders (5%) than other Eligibles (10%).

- The Medicaid Basis of Eligibility for most AIAN Eligibles were children-based eligibility criteria, rather than the criteria of the aged, blind & disabled, adults or foster care programs.
- Some 88% of AIAN determined to be eligible for Medicaid (735,720) received at least one paid service from Medicaid and are called Eligibles Served in the table (650,502).
- About half of AIAN Eligibles with services paid by Medicaid (52%) received hospital outpatient services, compared to only about one-quarter (27%) of the other Eligibles and the average payment was nearly three times as high for AIAN.
- Though the number of AIAN Eligibles receiving mental health facility services is small (2,919), the percent of AIAN Eligibles (0.4%) is twice that of all others (0.2%) and the average amount paid per Eligible is nearly 50% higher (\$24,794 compared to \$16,666).
- Proportionately half as many AIAN Eligibles (1.3%) receive home health services as other Eligibles (2.6%), and nearly one-third as many AIAN Eligibles (1.1%) receive Nursing Facilities services as other Eligibles (2.8%) with lower average payments.

MEDICAID SCHIP DATA

IHS AREA STATES

The statewide SCHIP data in the tables that follow has been restricted to SCHIP programs that are expansions of state Medicaid programs (Medicaid SCHIP). Wherever possible State-only SCHIP program data is excluded from these tables because State-only SCHIP data it is not uniformly reported to Medicaid by all states. If State-only SCHIP program data were included it would not be comparable between states.

Of the 35 IHS Area states, only 21 had only Medicaid SCHIP programs either as only a Medicaid expansion program (9 states) or a Medicaid expansion program in combination with a state program (11 states) as of 2005 (Kaiser Family Foundation, <http://www.statehealthfacts.org/comparecat.jsp?cat=4>). One state (Montana) with only an SCHIP-Medicaid Expansion program did not report any SCHIP data and is excluded from these tables. One state (Massachusetts) had a Combination of Medicaid SCHIP and State-Only SCHIP programs, but the state reported data separately for the two programs. These tables only include data from the Medicaid SCHIP program for Massachusetts. Two states (Minnesota and Alaska) had only an SCHIP-Medicaid Expansion program, but reported both Medicaid SCHIP and SCHIP Unknown data. These data were combined within for each state. New York switched from a state-only SCHIP program to a Combination program in the final quarter of the 2005 Fiscal Year; it is included in the tables. States that had only a State-only SCHIP program are not included in the tables.

Medicaid SCHIP data in the tables is statewide and is *not* restricted to IHS service delivery area counties (CHSDA). Please see Appendix A for CHSDA counties within IHS Areas and states.

In the Medicaid SCHIP tables and highlights that follow, the label “AIAN” means that the Medicaid SCHIP data system had a single race indicated for the person on their application for the Medicaid SCHIP program that was American Indian or Alaska Native (AIAN), and there was no Hispanic ethnicity indicated. This is the same as in the Medicaid Data in the preceding tables. This is *not* the same as the Census or IHS definition for AIAN as explained in the Summary. As shown in the IHS Program data tables after the Medicaid and Medicaid SCHIP tables, this Medicaid definition of AIAN, as well as problems in obtaining race-ethnicity data in the system, contribute to low numbers of AIAN in these Medicaid data tables.

HIGHLIGHTS FOR THE 20 IHS AREA STATES

- Nationally Medicaid SCHIP data was reported for 25,185 AIAN who were determined eligible for the program (Eligibles)
- Half of the AIAN Medicaid SCHIP Eligibles were female (50%) and half were male (50%), similar to all other Eligibles
- A larger portion of AIAN Medicaid SCHIP Eligibles were children (94%) than other Eligibles (78%)
- The SCHIP Basis of Eligibility for most AIAN Eligibles were the children-based eligibility criteria (94%), rather than the adult criteria (6%)
- 92% of AIAN Medicaid SCHIP Eligibles (25,185) received at least one paid service from Medicaid and are called Eligibles Served in the tables (23,149).
- Nearly half of AIAN Eligibles (54%) received hospital outpatient services, compared to less than one-quarter (27%) of the other Eligibles, and the average payment was nearly twice as high for AIAN (\$691) as others (\$356).
- Slightly more AIAN Eligibles (27%) received clinic services compared to other Eligibles (22%), and the average payment was more than twice as high for AIAN (\$850) as others (\$402).
- Two-thirds of AIAN Medicaid SCHIP Eligibles (72%) were in capitated care plans compared to less than half of other Eligibles (58%), and the average payment was one fourth as much for AIAN (\$243) as other Eligibles (\$984).
- The portion of AIAN Eligibles that received hospital inpatient services (3.9%) is 40% higher than that of all others (2.8%), though the average payment per Eligible were about the same (\$5,345 compared to \$5,409 per Eligible).

MEDICAID & SCHIP IHS PROGRAM DATA

IHS AREA STATES

In the combined Medicaid and Medicaid SCHIP data in the tables and highlights that follow for IHS Program services provided by IHS funded providers, the label “AIAN” means that the Medicaid data system had a single race indicated for the person who was determined to be eligible for Medicaid that was American Indian or Alaska Native (AIAN), and there was no Hispanic ethnicity indicated. To generate IHS Program data in the Medicaid data system, a list of Medicaid Eligibles in each state is linked to a list of AIAN determined by the national IHS, and given by the national IHS to the regional IHS Area office. The AIAN in the IHS list meet the criterion of the IHS definition for AIAN as explained in the Major Findings. Thus all Medicaid Eligibles in IHS Program data *meet the criteria of “IHS AIAN”* described in the Major Findings.

Of the national total of Medicaid and SCHIP Eligibles listed as AIAN by the IHS Program (444,267), *32% were classified in Medicaid race-ethnicity categories other than AIAN* (“All Others” 142,919). The two most likely reasons for the difference between IHS classification and the Medicaid classification of AIAN are the misclassification of AIAN by Medicaid race-ethnicity categories, and inaccurate linkages between the IHS list of AIAN and Medicaid Eligibles. Since two states account for 63% of “All Other” Eligibles in the national IHS Program data,, and the linkage procedures are more likely to vary by state than the problems with race-ethnicity categorization, the latter explanation is more likely to be the primary source of the differences between Medicaid “AIAN” race-ethnicity and IHS AIAN for IHS Program data in the Medicaid data system.

The IHS Program data in these tables and highlights is statewide and *not* limited to IHS Service delivery area counties (CHSDA counties) because as with the other Medicaid and SCHIP data, IHS program data available online in the Medicaid MSIS data system is statewide. The problem in only having access to *statewide IHS Program data* is that we cannot provide data for the 12 IHS Areas. Some states include IHS Programs from more than one IHS Area: Arizona, California, Colorado, Idaho, Minnesota, Nebraska, New Mexico, Oregon, Texas, and Utah. Furthermore, there are only three states where the entire state is comprised of CHSDA counties, thus making state-level data appropriate for only three states: Nevada, Oklahoma, and South Carolina. We will perform analyses of research data files *in the future* that allow can be narrowed to CHSDA counties within states.

Of the 35 IHS Area states, only 23 states reported any data, and 4 of those states reported data for less than 100 Medicaid Eligible people with at least one paid service from an IHS Program. States with no data for “AIAN” included: Alabama, Connecticut, Indiana, Iowa, Louisiana, Michigan, Pennsylvania, Rhode Island, Utah, and Wisconsin. States with data for less than 20 “AIAN” Eligibles Served included: Kansas, Massachusetts, South Carolina and Texas.

HIGHLIGHTS FOR THE 23 IHS AREA STATES

- IHS Program data was reported for 301,348 AIAN eligible for the IHS Program and Medicaid or SCHIP, and for 142,919 Eligibles classified as some other race-ethnicity but eligible for IHS Program services as well. All 444,267 of these Medicaid and SCHIP Eligibles with IHS Programs met the criteria of “IHS AIAN” Even though 68% (301,348) were classified by Medicaid as “AIAN” and 32% (142,919) as some other race or ethnicity.
- More Eligibles who were classified as “AIAN” by Medicaid were female (59%) than male (41%), which was not unlike all other Eligibles (61% females, 39% males).
- More Eligibles classified as “AIAN” by Medicaid were children (64%) than adults (31%) or elders (5%).
- A larger portion of Eligibles classified as “AIAN” by Medicaid were children (64%) when compared to all other Eligibles (51%).
- A smaller portion of Eligibles classified as “AIAN” by Medicaid were elders (5%) than other Eligibles (10%).
- The Medicaid Basis of Eligibility for most Eligibles classified as “AIAN” by Medicaid were children-based eligibility criteria (61%), rather than the criteria of the aged, blind & disabled, adults or foster care programs.
- The total number of Medicaid and SCHIP Eligibles Served with at least one paid service claim according to IHS Program data was 387,697 people or 87% of the total Eligibles (444,267). The

total amount paid to IHS Programs for IHS services was \$580.6 million for “AIAN” and \$91.0 million for all others:

- The number of Eligibles Served who were classified as “AIAN” by Medicaid was 299,234 or 77% of the total Eligibles Served. The total amount paid to IHS Programs for “AIAN” is obtained by multiplying the Average Payment per Eligible Served (\$1,940) times the number of Eligibles Served (299,234), or about \$580.6 million.
- The number of Eligibles Served who were classified by Medicaid in other race-ethnicity categories was 88,463 or 23% of the total Eligibles Served by IHS Programs. When the total amount paid for them is obtained by multiplying the Average Payment per Eligible Served (\$1,029) times the number of Eligibles Served (88,463), the total amount paid is about \$91.0 million.
- More than three-fifths (63%) of the Eligibles Served who were classified by Medicaid in race-ethnicity categories other than “AIAN” (88,463) came from just two states Arizona (27,163) and California (28,243).
- The largest fractions of “AIAN” Eligibles Served received hospital outpatient services (57%), prescribed drugs (21%), and clinic services (19%). Some 6% of these Eligibles Served who were classified as “AIAN” by Medicaid received hospital inpatient services, and 5% had Capitated Care (all Medicaid managed care in New Mexico).
- The largest fractions of all other Eligibles Served received clinic services (48%) and hospital outpatient services (47%). Only 2% of these Eligibles Served who were classified as “AIAN” by Medicaid received hospital inpatient services, and less than one percent had Capitated Care (all Medicaid managed care in New Mexico).

APPENDIX A: IHS AREA CHSDA COUNTIES IN EACH STATE

Some states have counties that are shared by 2 IHS Areas, and non-CHSDA county percentages are not given, so totals will not add up to 100%. Please see Appendix B for county split percentages for split CHSDA counties.

Aberdeen Area CHSDA Counties

States	Counties			Counties		
	All	Aberdeen CHSDA	% Aberdeen Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Iowa	99	4	4%	---	---	---
Minnesota	97	1	1%	Bemidji	28	29%
Nebraska	93	21	23%	Oklahoma	1	1%
North Dakota	53	20	38%	---	---	---
South Dakota	66	37	56%	---	---	---

Alaska Area CHSDA Counties

State	Counties			Counties		
	All	Alaska CHSDA	% Alaska Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Alaska*	27	25	93%	---	---	---

*Alaska has 27 boroughs/geographical census areas

Albuquerque Area CHSDA Counties

States	Counties			Counties		
	All	Albuquerque CHSDA	% Albuquerque Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Colorado	64	3	5%	Phoenix	1	2%
New Mexico	33	14	42%	Navajo	5	15%
Texas	254	2	<1%	Nashville	1	<1%
				Oklahoma	1	
Utah	29	1	3%	Navajo	2	7%
				Phoenix	15	52%
				Portland	1	3%

Bemidji Area CHSDA Counties

States	Counties			Counties		
	All	Bemidji CHSDA	% Bemidji Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Indiana	92	6	7%	---	---	---
Michigan	83	52	63%	---	---	---
Minnesota	87	28	32%	Aberdeen	1	1%
Wisconsin	72	33	46%	---	---	---

Billings Area CHSDA Counties

States	Counties			Counties		
	All	Billings CHSDA	% Billings Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Montana	56	23	41%	---	---	---
Wyoming	23	5	23%	---	---	---

California Area CHSDA Counties

States	Counties			Counties		
	All	California CHSDA	% California Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
California	58	37	64%	Phoenix	4	7%

Nashville Area CHSDA Counties

States	Counties			Counties		
	All	Nashville CHSDA	% Nashville Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Alabama	67	4	6%	---	---	---
Connecticut	8	1	13%	---	---	---
Florida	67	6	9%	---	---	---
Louisiana*	64	4	6%	---	---	---
Maine	16	3	19%	---	---	---
Massachusetts	14	1	7%	---	---	---
Mississippi	82	10	12%	---	---	---
New York	58	14	24%	---	---	---
North Carolina	100	11	11%	---	---	---
Pennsylvania	67	1	1%	---	---	---
Rhode Island	5	1	20%	---	---	---
South Carolina	46	46	100%	---	---	---
Texas	254	1	<1%	Albuquerque Oklahoma	2 1	1%

*There are 64 Parishes in the state of Louisiana.

Navajo Area CHSDA Counties

States	Counties			Counties		
	All	Navajo CHSDA	% Navajo Area CHSDA	Other IHS Areas	Other Area CHSDA	% Other Area CHSDA
Arizona	15	3	20%	Phoenix	13	87%
				Tucson	4	31%
