Tribal/Urban Indian Local Dental Pilot Project

Jan Carver, MSHS, RDH
Dental Project Coordinator
Project Goals

- **Overall:** To increase oral health prevention, address caries risk assessment and disease management, and continuity of care among children.

- **Long term:** Decrease proportion of restorative treatment to preventive services.
Project Goals

- Increase # of children age 0–20 who:
  - Access dental services compared to previous year.
  - Receive oral health education via tandem well-child oral health visits.
  - Receive fluoride varnish applications.
  - Have a Caries Risk Assessment (CRA) on file.

- Increase knowledge and competency of motivational interviewing/case management skills.
**Targets**

- Additional children age 0–20 receiving dental care via a referral from primary care by January 1, 2021.
- These are NEW dental patients, which is defined as patients who have not been seen in the dental clinic for at least three years.

The Oral Health Care Coordinator (OHCC) will be able to work in the medical clinic whenever there is a well-child visit (age 0–20) for a child with Medi-Cal.

- This time can be limited to certain hours during the week to make it easier for scheduling other duties.

The OHCC may work their regular job when they do not have a well-child patient.

The time required for the oral health part of the well-child visit is 5–15 minutes and can be worked around the primary care clinician’s presence.
The OHCC needs to have time to attend the monthly webinars, which are recorded for later viewing if she cannot attend at the time of occurrence.

The OHCC is also responsible for ensuring that referred children get needed dental care, so they will need to spend some time following up with them.

Attendance at Case Management Training.

Submission of monthly data.
Emphasis is on increasing oral health access for Medi–Cal beneficiary children.

Not required to do an oral health screening, the CRA, or fluoride varnish.

However, the CRA might be a good jumping-off point to begin a discussion of the importance of dental care for each individual child.
Medical Clinic Responsibilities

- Create standing orders allowing fluoride varnish and CRAs to be performed as part of the well-child visits.
- Allow the OHCC 5–15 minutes to see the target children at well-child visits.
- Optional: Primary care providers complete the trainings in the resources section on children’s oral health, CRAs, and fluoride varnish.
- Send quarterly invoice for reimbursement for OHCC salary.
Tracking—OHCC (Monthly)

- Number of hours present in primary care
- Number of Medi-Cal children age 0–20 who was referred for dental services
- Number of Medi-Cal children age 0–20 who received dental services as a result of your efforts
- Number of Medi-Cal children age 0–20 to who was provided oral health education
- Number of fluoride varnish applications performed *in tandem with medical appointment* by the OHCC
- Number of Caries Risk Assessments (CRA) performed *in tandem with medical appointment*
- Number of completed dental treatment plans
Tracking—OHCC Head Start/WIC (monthly)

- Number of Medi-Cal children age 0–6 who was referred for dental services
- Number of Medi-Cal children age 0–6 who received dental services as a result of your referral
- Number of completed dental treatment plans
- Number of enrolled Head Start children
Tracking—Medical Records (Quarterly)

- Number of Medi-Cal children with documented CRA (ages 1–6)
- Number of Medi-Cal children with documented CRA (ages 0–20)
- % of dental/primary care integration—annually
  - Numerator: Number of Medi-Cal children (ages 0–20) who received an oral health service in primary care
  - Denominator: Number of unduplicated Medi-Cal children (ages 0–20) who received any care at the Tribal Health Program
Tracking—Dental Records (Annually)

- Number of Medi-Cal children (0–20) who received dental services
- Number of Medi-Cal children (0–20) who used the emergency room for dental related reasons
- Number of Medi-Cal children (0–20) who received dental treatment under general anesthesia
Restorative to preventive treatment ratio—DTI Challenge incentives paid

- Numerator: Number of Medi-Cal children (ages 0–20) enrolled in Medi-Cal for at least 90 continuous days who received caries treatment
- Denominator: Number of Medi-Cal children (ages 0–20) enrolled in Medi-Cal for at least 90 continuous days who received a preventive dental service (D1000–D1999)
Documentation

- D0601 – CRA, low risk
- D0602 – CRA, moderate risk
- D0603 – CRA, high risk
- D0140 – Limited oral evaluation, problem focused
- D0145 – Oral evaluation for patient under 3 years of age and counseling with primary caregiver
- D1310 – Nutritional counseling for the control of dental disease
- D1330 – Oral hygiene instruction
- D9993 – Motivational Interviewing
- D1206 – Topical application of fluoride varnish

If bringing a child back for an additional fluoride varnish application, may also bill for an office visit (99211) as well as the fluoride varnish (D1206)
