Globally, COVID-19 cases have surpassed 800,000 with more than 40,000 deaths.

The California Area Indian Health Service (IHS) has reported that 14 California IHS patients have tested positive for COVID-19.

The total number of cases in the U.S. increased from 140,904 as reported on Monday 3/30/2020 to 163,539 reported today. The number of deaths increased from 2,405 to 2,860.

**COVID-19: U.S. at a Glance**
- Total cases: 163,539
- Total deaths: 2,860
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Puerto Rico, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands)

* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**Public Health Laboratory Testing**
As of the evening of March 30, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 94. This includes one or more PHL in 50 states plus DC, Guam and Puerto Rico.
As of March 30, 2020, there are a total of 6,932 positive cases and 150 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 73 cases
- Age 18-49: 3,529 cases
- Age 50-64: 1,765 cases
- Age 65 and older: 1,531 cases
- Unknown/Missing: 34 cases

Gender of all confirmed positive cases:
- Female: 3,155 cases
- Male: 3,666 cases
- Unknown: 111 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health’s Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

The Indian Health Service (IHS) California Area as of 7:00 p.m. EDT 03/30/2020 reports that 340 IHS patients in the California Area have been tested for COVID-19. Of these, 14 patients have tested positive for COVID-19 and 205 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY
CURRENT AS OF 12PM ON MARCH 31, 2020

Counties with Most Reported Cases*
1. Los Angeles: 3,011
2. Santa Clara: 848
3. San Diego: 603
4. Orange: 464
5. San Fransisco: 397

Counties with Community Transmission (n=40)
1. Alameda
2. Butte
3. Contra Costa
4. City of Berkeley
5. City of Long Beach
6. City of Pasadena
7. El Dorado
8. Fresno
9. Humbolt
10. Imperial
11. Kern
12. Los Angeles
13. Marin
14. Mendocino
15. Mono
16. Monterey
17. Napa
18. Nevada
19. Orange
20. Placer
21. Riverside
22. Sacramento
23. San Benito
24. San Bernardino
25. San Diego
26. San Francisco
27. San Joaquin
28. San Luis Obispo
29. San Mateo
30. Santa Barbara
31. Santa Cruz
32. Santa Clara
33. Siskiyou
34. Solano
35. Sonoma
36. Stanislaus
37. Tulare
38. Ventura
39. Yolo
40. Yuba

*Note: County-level case and death counts are reported based on data found on county websites as of 1pm on days reported. Some case counts include presumptive cases.
COUNTIES WITH COMMUNITY TRANSMITTED CASES

This map shows community transmission cases reported to the county. The locations of Tribal Health Programs and Urban Indian Health Programs are being shown as reference only.

Tribal Health Programs
1. Cabazon Band of Mission Indians
