

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #15 APRIL 1, 2020

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 820,000 with more than 40,700 deaths. The United States now makes up 22% of the global cases.

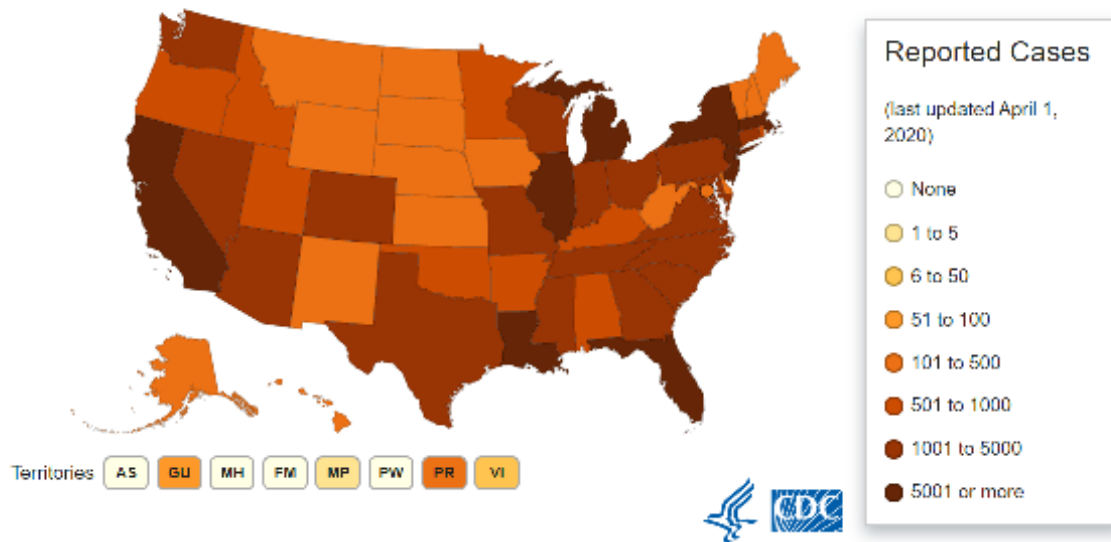

On April 2, 2020, the White House, Department of Health and Human Services and the Indian Health Service will host the 5th weekly Indian Country COVID-19 update call with Admiral Weahkee. This week, the call time has been adjusted from 3:30 p.m.–5:00 p.m. to 4:00 p.m.–5:30 p.m. (EST) so as not to interfere with Tribal consultation being hosted by the Department of the Interior and the Department of Treasury regarding CARES Act funding. This week, the conference call will feature updates from the Indian Health Service (IHS) and other components of the Department of Health and Human Services.

The California Area IHS has reported that 15 California IHS patients have tested positive for COVID-19.

The total number of cases in the U.S. increased from 163,539 as reported on Tuesday 3/31/2020 to 186,101 reported today. The number of deaths increased from 2,860 to 3,603.

## UNITED STATES

### States Reporting Cases of COVID-19 to CDC\*

### COVID-19: U.S. at a Glance\*

- Total cases: 186,101
- Total deaths: 3,603
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Puerto Rico, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands)

\* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### Public Health Laboratory Testing

As of the evening of March 31, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 95. This includes one or more PHL in 50 states plus DC, Guam and Puerto Rico.

## CALIFORNIA

As of March 31, 2020, there are a total of 8,155 positive cases and 171 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 90 cases
- Age 18-49: 4,137 cases
- Age 50-64: 2,131 cases
- Age 65 and older: 1,764 cases
- Unknown/Missing: 33 cases

Gender of all confirmed positive cases:

- Female: 3,753 cases
- Male: 4,267 cases
- Unknown: 135 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

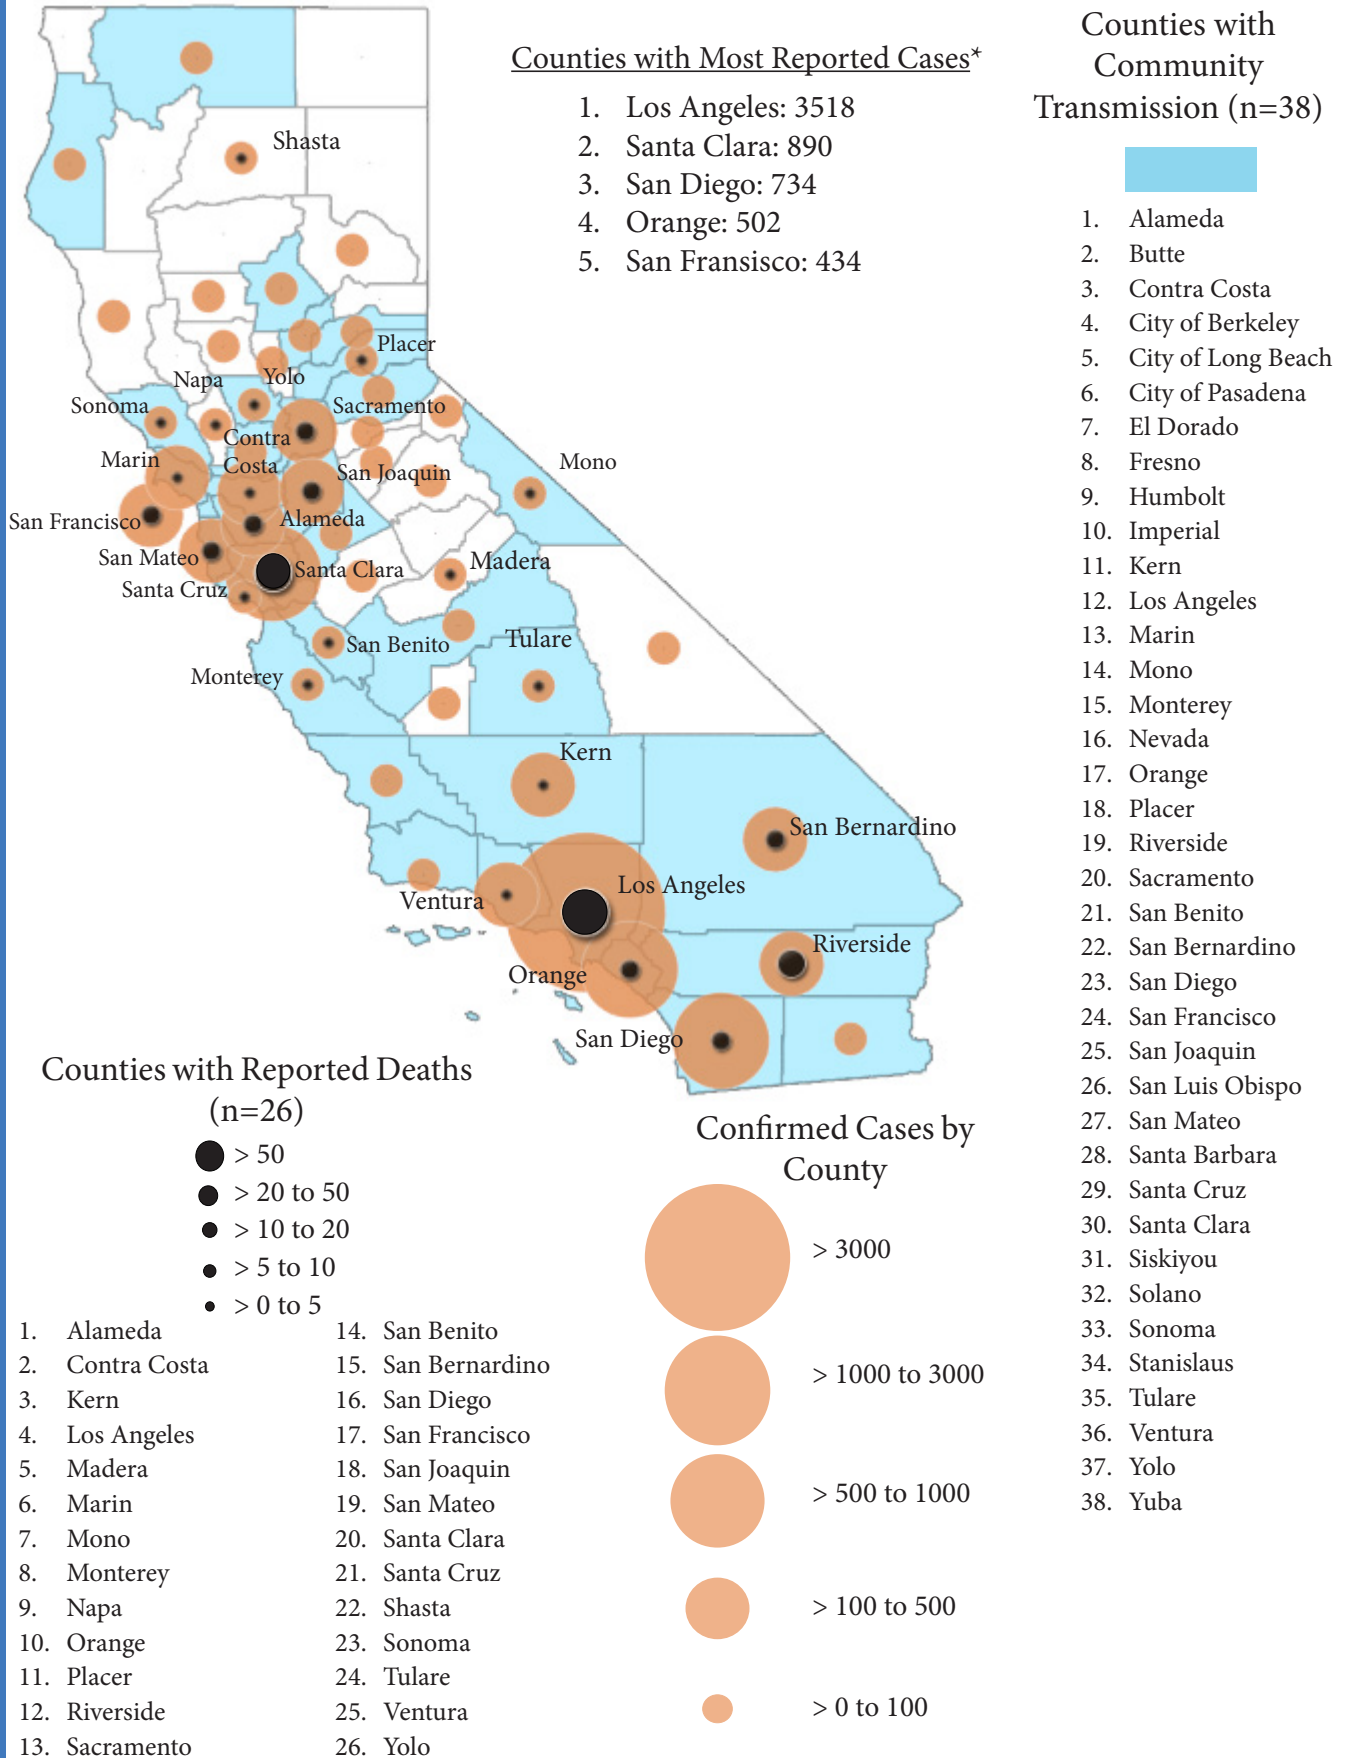

## INDIAN HEALTH SERVICE CALIFORNIA AREA

The Indian Health Service (IHS) California Area as of 7:00 p.m. EDT 03/31/2020 reports that 359 IHS patients in the California Area have been tested for COVID-19. Of these, 15 patients have tested positive for COVID-19 and 226 have tested negative for COVID-19.
