Globally, COVID-19 cases have surpassed 970,000 with more than 50,000 deaths.

U.S. Surgeon General Jerome Adams is suggesting the best way to prevent the continuation of the COVID-19 is for those in the United States to stay home.

President Trump has extended the COVID-19 guidelines for America until April 30th.

The California Area Indian Health Service (IHS) has reported that 18 California IHS patients have tested positive for COVID-19.

The total number of cases in the U.S. increased from 213,144 as reported on Thursday 4/2/2020 to 239,279 reported today. The number of deaths increased from 4,513 to 5,443.

**COVID-19: U.S. at a Glance**
- Total cases: 239,279
- Total deaths: 5,443
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Puerto Rico, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands)

* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**Public Health Laboratory Testing**
As of the evening of April 2, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 95. This includes one or more PHL in 50 states plus DC, Guam and Puerto Rico.
As of April 2, 2020, there are a total of 10,701 positive cases and 237 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 120 cases
- Age 18-49: 5,302 cases
- Age 50-64: 2,879 cases
- Age 65 and older: 2,342 cases
- Unknown/Missing: 58 cases

Gender of all confirmed positive cases:
- Female: 5,015 cases
- Male: 5,547 cases
- Unknown: 139 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health’s Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

The Indian Health Service (IHS) California Area as of 4/3/2020 reports that 392 IHS patients in the California Area have been tested for COVID-19. Of these, 18 patients have tested positive for COVID-19 and 250 have tested negative for COVID-19.

If you have any questions or concerns, please contact: Vanessa Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
CONFIRMED CASES AND DEATHS BY COUNTY
CURRENT AS OF 12PM ON APRIL 3, 2020

Counties with Reported Deaths (n=31)
1. Alameda
2. Contra Costa
3. Imperial
4. Kern
5. Los Angeles
6. Madera
7. Marin
8. Mendocino
9. Mono
10. Monterey
11. Napa
12. Nevada
13. Orange
14. Placer
15. Riverside
16. Sacramento
17. San Benito
18. San Bernardino
19. San Diego
20. San Francisco
21. San Joaquin
22. San Mateo
23. Santa Clara
24. Santa Cruz
25. Shasta
26. Solano
27. Sonoma
28. Sutter
29. Tulare
30. Ventura
31. Yolo

Counties with Most Reported Cases*
1. Los Angeles: 4566
2. Santa Clara: 1019
3. San Diego: 966
4. Orange: 711
5. San Francisco: 497

*Note: County-level case and death counts are reported based on data found on county websites as of 1pm on days reported. Some case counts include presumptive cases.
