

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #27 APRIL 17, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 2.07 million with more than 139,000 deaths.

The total number of cases in the U.S. increased from 632,220 as reported on Thursday, 4/17/2020 to 661,712 reported today. The number of deaths increased from 27,012 to 33,049.

The Tribal Emergency Preparedness and Response Program (TEPRP) provides technical assistance and training to Tribes and Tribal Health Programs on hazard emergency preparedness planning and response. Tribal leaders and clinic administrators may contact Corinne.Chavez@dhcs.ca.gov.

Project N95 is serving as a volunteer-run clearinghouse for vetted Personal Protective Equipment (PPE) suppliers and medical equipment requests. You can access medical equipment requests received from California healthcare institutions and access a list of vetted suppliers. They have a volunteer data team standing by to assist. For more information: <https://www.projectn95.org/>

United States of Care are shifting their resources to provide immediate support for state and federal government and public response needs, leveraging their expertise, capacity, network, and resources to support effective responses to the COVID-19 pandemic. For more information: <https://unitedstatesofcare.org/covid-19/>

The California Area Indian Health Service (IHS) has reported that 43 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 4/15/2020.

California Tribal Nation Grant Fund

The California Tribal Nation Grant Fund COVID-19 Emergency Grant is available to eligible tribes to prepare for and respond to COVID-19. These grant funds may be used to fund programs, supplies, and actions taken in response to guidance of public health officials to address the threat of COVID-19, so long as those initiatives are not otherwise funded or provided by sources outside of the Tribal Nation Grant Fund.

For more information: http://www.tngf.ca.gov/covid_grant.html

National Indian Council on Aging (NICOA)

NICOA is convening weekly calls with all Title VI grantees about COVID-19 to provide updates to tribal programs and provide an opportunity for tribes to discuss the impact of COVID-19 in communities. Administration for Community Living (ACL) staff will be on all calls, as will resource centers from NIEJI, the University of Alaska, the University of Hawaii and the University of North Dakota.

Weekly on Fridays at 3:00 pm EST.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 661,712 (660,430 confirmed; 1,282 probable)
- Total deaths: 33,049 (28,823 confirmed; 4,226 probable)
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Public Health Laboratory Testing

As of the evening of April 16, the total number of public health laboratories that have completed verification and are offering testing is 97. This includes one or more PHL in 50 states plus DC, Guam and Puerto Rico.

| ALASKA | 531 | 10 | 1,188 |
| TUCSON | 423 | 7 | 524 |

*as of 7PM EST April 15, 2020

CALIFORNIA

As of April 16, 2020, there are a total of 27,528 positive cases and 985 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 472 cases
- Age 18-49: 13,144 cases
- Age 50-64: 7,488 cases
- Age 65 and older: 6,360 cases
- Unknown/Missing: 64 cases

Gender of all confirmed positive cases:

- Female: 13,424 cases
- Male: 13,865 cases
- Unknown: 239 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

621 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 4/15/2020.

Of these, 43 patients have tested positive for COVID-19 and 496 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at Vcresci@crihb.org or Aurimar Ayala at Aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF 12PM ON APRIL 17, 2020

Counties with most reported Cases*

| | |
|-------------|--------|
| Los Angeles | 10,895 |
| Riverside | 2264 |
| San Diego | 2087 |
| Santa Clara | 1833 |
| Orange | 1425 |

Counties with most reported Deaths

| | |
|----------------|-----|
| Los Angeles | 457 |
| Santa Clara | 69 |
| San Diego | 63 |
| Riverside | 59 |
| San Bernardino | 47 |
