

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #47 MAY 18, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 4.62 million with more than 311,000 deaths.

The total number of cases in the U.S. increased from 1,412,121 as reported on Friday 5/15/2020 to 1,480,349 reported today. The number of deaths increased from 85,990 to 89,407.

The California Area Indian Health Service (IHS) has reported that 85 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 5/16/2020.

The House of Representatives passed the latest iteration of COVID-19 legislation, the Health and Economic Recovery Omnibus Emergency Solutions (HEROES) Act. This new stimulus bill totals over \$3 trillion and includes additional state and local government funding, additional health care funding, and another round of direct payments to individuals.

Join the Directors of the 12 Tribal Epidemiology Centers, on 05/21/2020 at 2 p.m. EST (11 a.m. PST), in a roundtable discussion describing the roles of the Centers in Indian Country COVID-19 response efforts.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 1,480,349
- Total deaths: 89,407
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease. A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

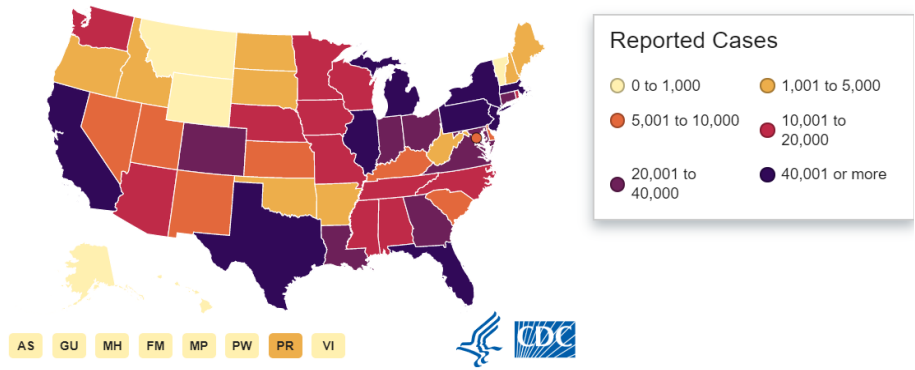

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Public Health Laboratory Testing

As of May 14, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 97. This includes one or more PHL in 50 states plus the District of Columbia, Guam and Puerto Rico.

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #47 MAY 18, 2020

COVID-19 CASES BY IHS AREA AS OF MAY 16, 2020*

	NEGATIVE CASES	POSITIVE CASES	TESTED
NAVAJO	13,373	4,172	18,623
ALBUQUERQUE	4,024	594	7,210
OKLAHOMA CITY	7,567	251	8,608
PORTLAND	2,318	254	2,681
PHOENIX	4,289	881	5,578
CALIFORNIA	1,896	85	2,461
GREAT PLAINS	2,839	146	3,339

BILLINGS	5,803	157	6,033
NASHVILLE	3,081	365	3,692
ALASKA	10,162	24	12,847
TUCSON	755	24	873

*as of 7PM EST May 16, 2020

CALIFORNIA

As of May 17, 2020, there are a total of 80,430 positive cases and 3,302 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 3,355 cases
- Age 18-49: 40,539 cases
- Age 50-64: 19,703 cases
- Age 65 and older: 16,727 cases
- Unknown/Missing: 106 cases

Gender of all confirmed positive cases:

- Female: 39,425 cases
- Male: 40,533 cases
- Unknown: 472 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

2,461 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 5/16/2020.

Of these, 85 patients have tested positive for COVID-19 and 1,896 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF May 18, 2020

Counties with most reported cases*

Los Angeles	38,011
Riverside	5,836
San Diego	5,618
Orange	4,376
San Bernardino	3,511

Counties with most reported deaths

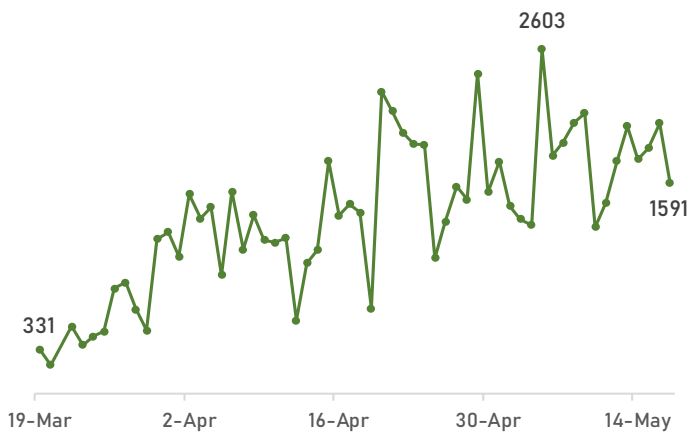

Los Angeles	1,821
Riverside	242
San Diego	209
San Bernardino	155
Santa Clara	135

New Confirmed Deaths in California by Date

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **108 cases** and **14 deaths** among American Indian and Alaska Native people in California.

31% of cases and 2% of deaths are of unknown race/ethnicity. As of 5/17/2020. Source: CDPH

CHARACTERISTICS OF CALIFORNIA COVID-19 POSITIVE CASES

In California:

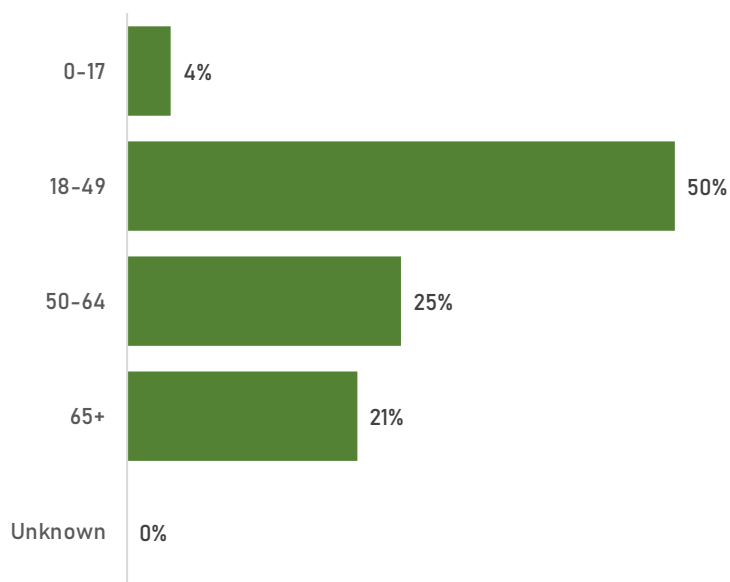

3.8% of confirmed cases have been admitted to a hospital

1.3% of confirmed cases have been admitted to an Intensive Care Unit

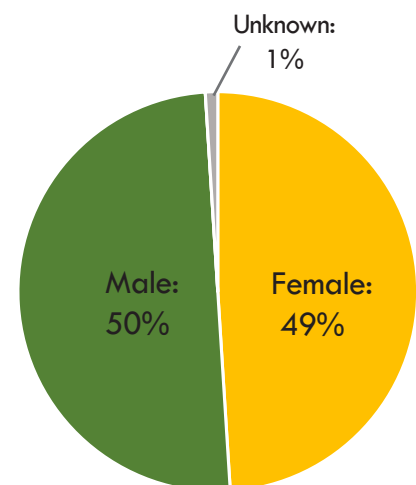

4.1% of cases have died

As of 5/17/2020. Source: CDPH

Positive Cases by Age Group

Positive Cases by Gender

Note: Percentages may not add up to 100% due to rounding.

As of 5/17/2020. Source: CDPH

Racial disparities:

- For all adults ages 18+, Latinos, African Americans, and Native Hawaiians and Pacific Islanders are dying at disproportionately high rates.
- For Native Hawaiians and Pacific Islanders, overall numbers are low, but the proportion of COVID-19 deaths is more than 3 times their population representation.
