Globally, COVID-19 cases have surpassed 6.93 million with more than 400,000 deaths.

The total number of cases in the U.S. increased from 1,862,656 as reported on Friday 6/5/2020 to 1,938,823 reported today. The number of deaths in the U.S. increased from 108,064 to 110,375.

The California Area Indian Health Service (IHS) has reported that 133 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 6/6/2020.

The Administration for Children and Families (ACF) announced its 2020 Tribal Consultation is taking place virtually on Wednesday, June 10 and Thursday, June 11, 2020 from 10:00am – 3:00pm (PST) each day. For more information and to register for the 2020 Tribal Consultation please click here: https://www.nihb.org/covid-19/upcoming-events/administration-for-children-and-families-virtual-tribal-consultation/

Join the Health and Human Services Office of the Assistant Secretary for Preparedness and Response, and the U. S. Public Health Service for a webinar held on June 10th at 1:00 p.m. to discuss Personal Protective Equipment (PPE) use, disinfection, decontamination, and the use of the Battelle Decontamination system for PPE disinfection. For the webinar link click here: https://fema.connectsolutions.com/tribal_6-10/

The National Native Health Network is hosting a webinar presentation on June 17th at 10:00am (PST). Keynote speaker Dr. Suzanne Stewart will be discussing “Indigenous Health, Healing, and Research: COVID-19 Challenges & Strategies for Moving Forward” Click here to join: https://us02web.zoom.us/j/8318417

COVID-19: U.S. at a Glance*

- Total cases: 1,938,823
- Total deaths: 110,375
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease. A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or

iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Public Health Laboratory Testing
As of May 14, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 97. This includes one or more PHL in 50 states plus the District of Columbia, Guam and Puerto Rico. As of May 20, over 12 million tests have been performed nationwide, with 13% of those tests being positive.
CALIFORNIA

As of June 7, 2020, there are a total of 131,319 positive cases and 4,653 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 8,248 cases
- Age 18-49: 69,915 cases
- Age 50-64: 30,025 cases
- Age 65 and older: 22,939 cases
- Unknown/Missing: 192 cases

Gender of all confirmed positive cases:
- Female: 64,392 cases
- Male: 66,303 cases
- Unknown: 624 cases

In order to better focus public health resources on the changing needs of California communities, beginning on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Twenty-two public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health’s Laboratory in Richmond, Alameda, Contra Costa, Humboldt, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

3,247 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 6/6/2020.

Of these, 133 patients have tested positive for COVID-19 and 2,541 have tested negative for COVID-19.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
CONFIRMED CASES AND DEATHS BY COUNTY
CURRENT AS OF June 8, 2020

Counties with most reported cases
- Los Angeles   63,750
- Riverside     9,105
- San Diego    8,478
- Orange     7,643
- San Bernardino  6,033

Counties with most reported deaths
- Los Angeles 2,645
- Riverside 355
- San Diego 312
- San Bernardino 224
- Orange 177

29% of cases and 2% of deaths are of unknown race/ethnicity. As of 6/7/2020. Source: CDPH
Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California:

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.

Note: Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

- 0-17: 6%
- 18-49: 53%
- 50-64: 23%
- 65+: 18%

Positive Cases by Gender among all California cases

- Male: 51%
- Female: 49%
- Unknown: 1%

Note: Percentages may not add up to 100% due to rounding.

As of 6/7/2020, Source: CDPH

In California:

- 2.4% of confirmed cases have been admitted to a hospital
- 0.8% of confirmed cases have been admitted to an Intensive Care Unit
- 3.5% of cases have died

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
