

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 8.06 million with more than 440,200 deaths.

The total number of cases in the U.S. increased from 2,104,346 as reported on Tuesday 6/16/2020 to 2,132,321 reported today. The number of deaths in the U.S. increased from 116,140 to 116,862.

The California Area Indian Health Service (IHS) has reported that 148 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 6/15/2020.

The National Indian Health Board is hosting a webinar focused on suicide in Indian Country; intervention, and prevention; what is unique about COVID-19 that may contribute to suicide risk; resources and suggestions that may help during these extraordinary and stressful times; as well as time for questions and answers with all attendees. This webinar is designed for community members, Tribal health and behavioral health professionals, Tribal leaders, and partners alike. The webinar is June 25th at 10:00am, to register please click [HERE](#).

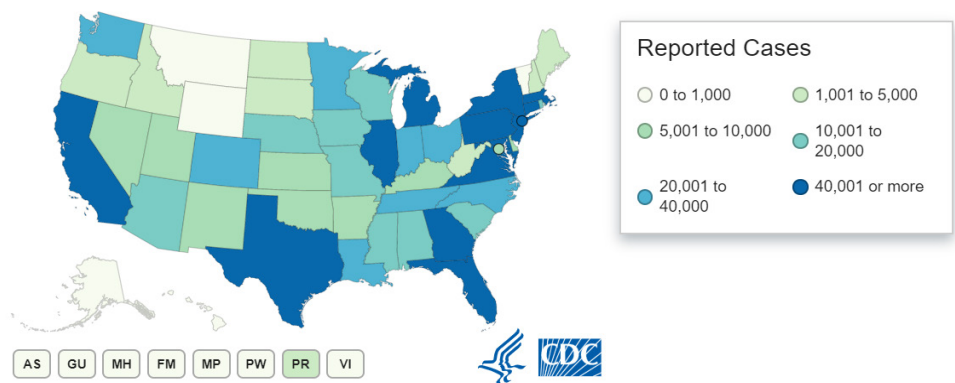

The National Institute for Health Care Management (NIHCM) is hosting a webinar on homelessness and COVID-19 on June 18th at 10:00 a.m. (PST). This webinar will discuss the state of homelessness in the US and its critical impact on health and provide strategies to improve outcomes for homeless individuals both in the short and long term. Please click here to register for this webinar: <https://www.nihcm.org/event-registration>

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 2,132,321
- Total deaths: 116,862
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease. A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or

iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Public Health Laboratory Testing

As of May 14, the total number of public health laboratories (PHL) that have completed verification and are offering testing is 97. This includes one or more PHL in 50 states plus the District of Columbia, Guam and Puerto Rico. As of May 20, over 12 million tests have been performed nationwide, with 13% of those tests being positive.

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #68 JUNE 17, 2020

COVID-19 CASES BY IHS AREA AS OF JUNE 15, 2020*

	NEGATIVE CASES	POSITIVE CASES	TESTED
NAVAJO	25,747	7,493	35,591

*as of 7PM EST June 15, 2020

CALIFORNIA

As of June 16, 2020, there are a total of 157,015 positive cases and 5,208 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 11,064 cases
- Age 18-49: 85,325 cases
- Age 50-64: 34,922 cases
- Age 65 and older: 25,503 cases
- Unknown/Missing: 201 cases

Gender of all confirmed positive cases:

- Female: 77,199 cases
- Male: 79,128 cases
- Unknown: 688 cases

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

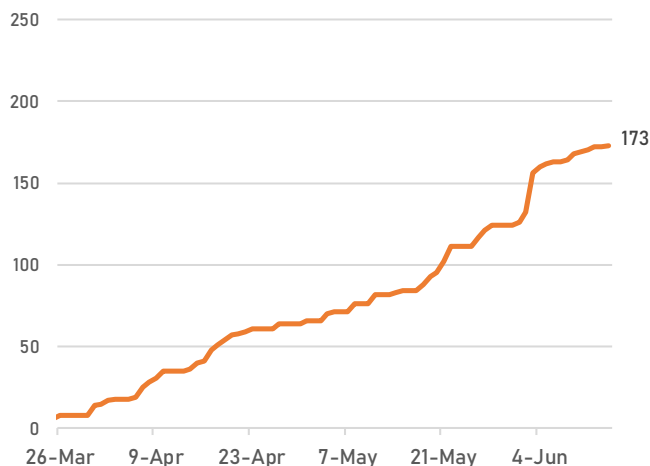

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.3% of deaths** in California. These include **209 cases** and **14 deaths** among American Indian and Alaska Native people in California.

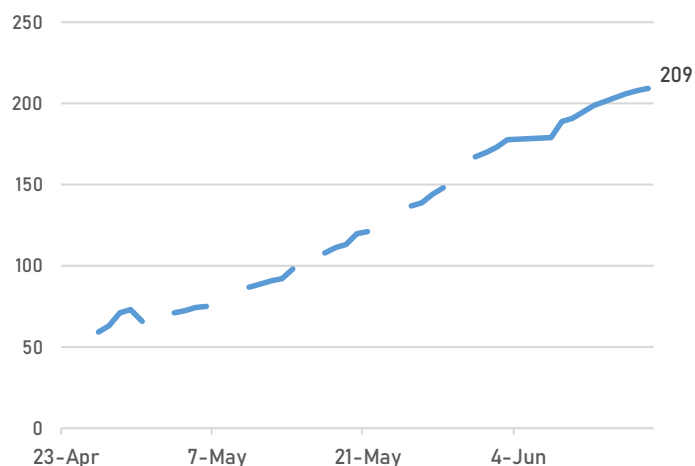

29% of cases and 1% of deaths are of unknown race/ethnicity. As of 6/16/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

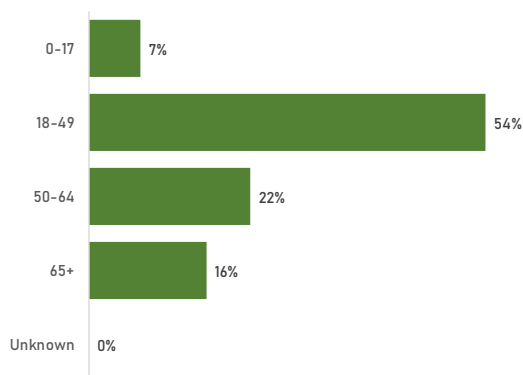

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

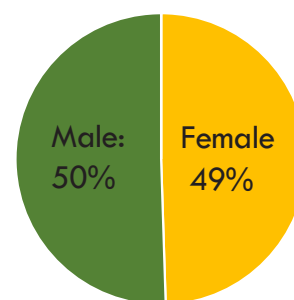

Note: IHS data source is the IHS Data Portal, as of 6/13/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

Note: Percentages may not add up to 100% due to rounding.

As of 6/16/2020. Source: CDPH

In California:

2.2% of confirmed cases have been admitted to a hospital

0.7% of confirmed cases have been admitted to an Intensive Care Unit

3.3% of cases have died

As of 6/16/2020. Source: CDPH

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
