

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #73 JUNE 24, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 9.29 million with more than 479,000 deaths.

The total number of cases in the U.S. increased from 2,336,615 as reported on Wednesday 6/24/2020 to 2,374,282 reported today. The number of deaths in the U.S. increased from 121,117 to 121,809.

The California Area Indian Health Service (IHS) has reported that 168 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 6/23/2020.

State Superintendent of Public Instruction Tony Thurmond today, announced a new collaborative online campaign, "Advance SEL in California," to engage educators, school leaders, and families in a wider conversation about how to advance, elevate, and spur action on Social and Emotional Learning (SEL) in California. The initiative will first gather large-scale input through a forum called WikiWisdom, a virtual resource where educators, school leaders, and families can collaborate, interact with peers, and share best SEL practices to support students dealing with the impact of the COVID-19 pandemic and over the long term. Learn more [HERE](#).

The fourth National Indian Health Board (NIHB) Mental and Behavioral Health webinar held on 6/30/2020 at 12:00pm will explore intimate partner violence (IPV) and child abuse (CA) during the COVID-19 pandemic in American Indian and Alaska Natives (AI/AN) communities. The discussion will include general background on IPV and CA in Indian Country; what is unique about COVID-19 that may contribute to IPV and CA risk; resources and suggestions that may help during these extraordinary and stressful times; as well as time for questions and answers with all attendees. This webinar is designed for community members, Tribal health and behavioral health professionals, Tribal leaders, and partners alike. Register for the webinar [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 2,374,282
- Total deaths: 121,809
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

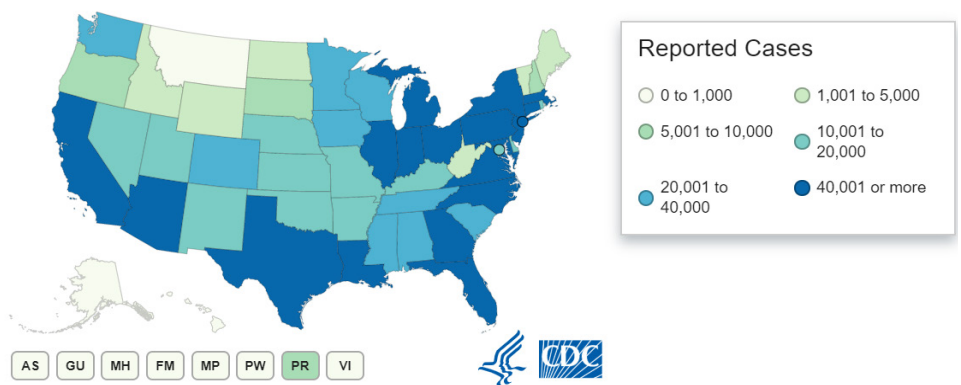

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or

iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 30,110,061
- Positive tests reported: 2,874,748
- Percent of positive tests: 10%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #73 JUNE 24, 2020

COVID-19 CASES BY IHS AREA AS OF JUNE 23, 2020*

CALIFORNIA

As of June 24, 2020, there are a total of 195,571 positive cases and 5,733 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 14,968 cases
- Age 18-49: 109,489 cases
- Age 50-64: 41,870 cases
- Age 65 and older: 29,048 cases
- Unknown/Missing: 196 cases

Gender of all confirmed positive cases:

- Female: 96,068 cases
- Male: 98,718 cases
- Unknown: 785 cases

Lab tests reported statewide: 3,694,345

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

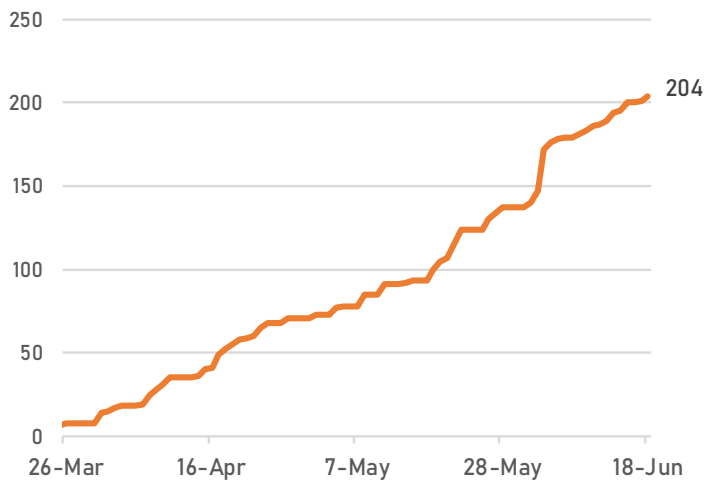

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.3% of deaths** in California. These include **248 cases** and **18 deaths** among American Indian and Alaska Native people in California.

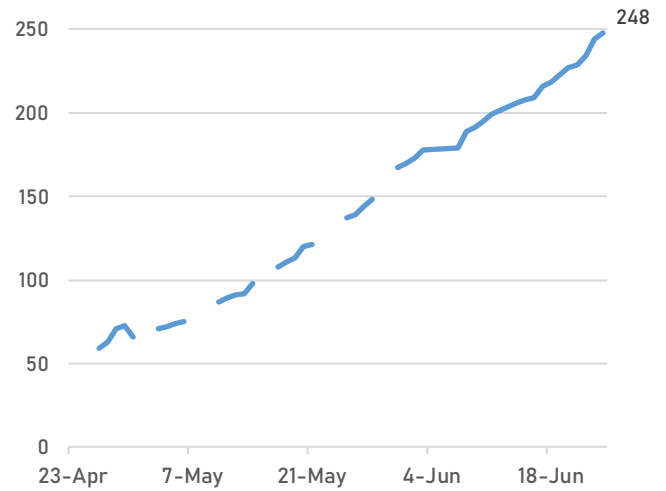

31% of cases and 1% of deaths are of unknown race/ethnicity. As of 6/24/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

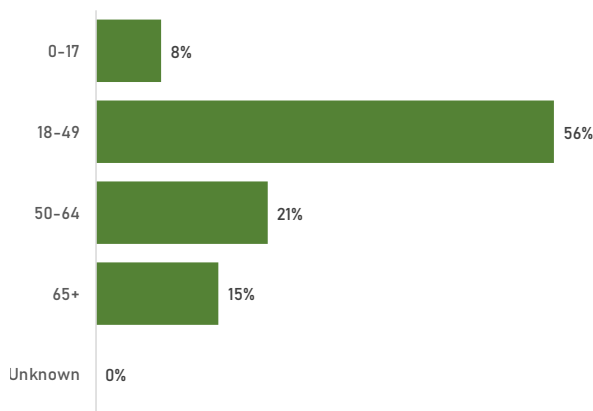

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

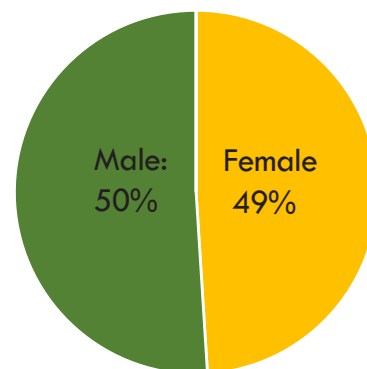

Note: IHS data source is the IHS Data Portal, as of 6/18/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

Note: Percentages may not add up to 100% due to rounding.

As of 6/24/2020. Source: CDPH

In California:

2.2% of confirmed cases have been admitted to a hospital

0.7% of confirmed cases have been admitted to an Intensive Care Unit

2.9% of cases have died

As of 6/24/2020. Source: CDPH

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
