

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #75 JUNE 26, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 9.47 million with more than 484,000 deaths.

The total number of cases in the U.S. increased from 2,374,282 as reported on Thursday 6/25/2020 to 2,414,870 reported today. The number of deaths in the U.S. increased from 121,809 to 124,325.

The California Area Indian Health Service (IHS) has reported that 171 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 6/24/2020.

Governor Gavin Newsom today released tools, technology, and data that will allow scientists, researchers, technologists, and all Californians to better understand the impact of COVID-19. This includes the California COVID Assessment Tool, or CalCAT, a “model of models” that contains assessments of the spread of COVID-19, short-term forecasts of disease trends, and scenarios of the course of the disease from modeling groups across the country. Click here to learn more: <https://calcat.covid19.ca.gov/cacovidmodels/>

The fourth National Indian Health Board (NIHB) Mental and Behavioral Health webinar held on 6/30/2020 at 12:00pm will explore intimate partner violence (IPV) and child abuse (CA) during the COVID-19 pandemic in American Indian and Alaska Natives (AI/AN) communities. The discussion will include general background on IPV and CA in Indian Country; what is unique about COVID-19 that may contribute to IPV and CA risk; resources and suggestions that may help during these extraordinary and stressful times; as well as time for questions and answers with all attendees. This webinar is designed for community members, Tribal health and behavioral health professionals, Tribal leaders, and partners alike. Register for the webinar [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 2,414,870
- Total deaths: 124,325
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or

iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 31,281,178
- Positive tests reported: 2,953,997
- Percent of positive tests: 9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #75 JUNE 26, 2020

COVID-19 CASES BY IHS AREA AS OF JUNE 23, 2020*

	NEGATIVE CASES	POSITIVE CASES	TESTED
NAVAJO	30,485	8,042	41,918

*as of 7PM EST June 24, 2020

CALIFORNIA

As of June 25, 2020, there are a total of 200,461 positive cases and 5,812 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 15,449 cases
- Age 18-49: 112,47 cases
- Age 50-64: 42,721 cases
- Age 65 and older: 29,544 cases
- Unknown/Missing: 200 cases

Gender of all confirmed positive cases:

- Female: 98,564 cases
- Male: 101,070 cases
- Unknown: 827 cases

Lab tests reported statewide: 3,771,314

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.3% of deaths** in California. These include **253** cases and **17** deaths among American Indian and Alaska Native people in California.

31% of cases and 2% of deaths are of unknown race/ethnicity. As of 6/25/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

Note: IHS data source is the IHS Data Portal, as of 6/18/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

Note: Percentages may not add up to 100% due to rounding.

As of 6/25/2020. Source: CDPH

In California:

2.2% of confirmed cases have been admitted to a hospital

0.7% of confirmed cases have been admitted to an Intensive Care Unit

2.9% of cases have died

As of 6/24/2020. Source: CDPH

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
