Globally, COVID-19 cases have surpassed 11.30 million with more than 531,800 deaths.

The total number of cases in the U.S. increased from 2,679,230 as reported on Thursday 7/02/2020 to 2,886,267 reported today. The number of deaths in the U.S. increased from 128,024 to 129,811.

The California Area Indian Health Service (IHS) has reported that 208 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 7/04/2020.

The National Indian Health Board (NIHB) is hosting a webinar on July 10, at 12:00 pm (PST) regarding contact tracing in Indian Country. Case investigation and contact tracing are core methods used by Tribal, local, and state health departments for disease control and is a key strategy in preventing the spread of COVID-19. Contact tracing is used to identify and alert people of potential contact with a person infected with the novel coronavirus, which causes COVID-19. This webinar will explore how contact tracing is being carried out in Indian Country. Click HERE to register.

Join The University of Maryland School of Public Health seminar held on July 7, at 3:00 pm (PST). This seminar will address the epidemiology of the COVID-19 pandemic among AI/AN Tribes. Fourth in the second series from the Department of Epidemiology and Biostatistics on the epidemiology of the COVID-19 pandemic, this seminar includes a presentation from Delight E. Satter, MPH, Senior Health Scientist in the Office of Tribal Affairs and Strategic Alliances in CDC’s Center for State, Tribal, Local and Territorial Support and Kalinda Griffiths, PhD, Scientia Lecturer at the Centre for Big Data Research at the University of New South Wales in Australia. Click HERE to register.

COVID-19: U.S. at a Glance*

- Total cases: 2,886,267
- Total deaths: 129,811
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or

iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 36,255,888
- Positive tests reported: 3,282,484
- Percent of positive tests: 9%
CALIFORNIA

As of July 5, 2020, there were a total of 271,684 positive cases and 6,337 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 22,332 cases
- Age 18-49: 158,767 cases
- Age 50-64: 54,836 cases
- Age 65 and older: 35,441 cases
- Unknown/Missing: 308 cases

Gender of all confirmed positive cases:
- Female: 134,224 cases
- Male: 136,050 cases
- Unknown: 1,410

Lab tests reported statewide: 4,793,353

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click HERE to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

4,665 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 7/04/2020.

Of these, 208 patients have tested positive for COVID-19 and 3,645 have tested negative for COVID-19.

Note: LA county suspended data processing over the holiday weekend. Case counts for July 5th include a three-day total of cases from LA county for July 3-5.

New Confirmed Deaths in California by Date

As of 7/5/2020. Source: CDPH
RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

American Indians and Alaska Natives account for 0.5% percent of the population, 0.2% of COVID-19 cases, and 0.4% of deaths in California. These include 349 cases and 23 deaths among American Indian and Alaska Native people in California.

35% of cases and 1% of deaths are of unknown race/ethnicity. As of 7/05/2020. Source: CDPH
Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.

Note: IHS data source is the IHS Data Portal, as of 6/25/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

- 0-17: 8%
- 18-49: 58%
- 50-64: 20%
- 65+: 13%
- Unknown: 0%

Note: Percentages may not add up to 100% due to rounding.

As of 7/05/2020. Source: CDPH

Positive Cases by Gender among all California cases

- Female: 49%
- Male: 50%
- Unknown: 1%

As of 7/05/2020. Source: CDPH

In California:

- 2.1% of confirmed cases have been admitted to a hospital
- 0.6% of confirmed cases have been admitted to an Intensive Care Unit
- 2.3% of cases have died

As of 6/30/2020. Source: CDPH

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.

- Almost half of all deaths continue to be in the 80+ age category.

As of 6/30/2020. Source: CDPH
