

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #81 JULY 7, 2020

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 11.50 million with more than 535,700 deaths.

The total number of cases in the U.S. increased from 2,886,267 as reported on Monday 7/06/2020 to 2,932,596 reported today. The number of deaths in the U.S. increased from 129,811 to 130,133.

The California Area Indian Health Service (IHS) has reported that 209 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 7/05/2020.

The National Indian Health Board (NIHB) is hosting a webinar on July 10, at 12:00 pm (PST) regarding contact tracing in Indian Country. Case investigation and contact tracing are core methods used by Tribal, local, and state health departments for disease control and is a key strategy in preventing the spread of COVID-19. Contact tracing is used to identify and alert people of potential contact with a person infected with the novel coronavirus, which causes COVID-19. This webinar will explore how contact tracing is being carried out in Indian Country. Click [HERE](#) to register.

The COVID-19 pandemic has created challenges for us all. For individuals who have a Substance Use Disorder or who are in recovery, the pandemic poses additional risks (lack of treatment, lack of access to peer support groups, isolation, psychological stress, etc.). There is also concern that individuals who didn't have a substance use issue before the pandemic may develop a problem during or after the pandemic. Join the NIHB on July 23, at 9:00 am (PST) to discuss ways healthcare providers can help prevent and support patients dealing with Substance Use issues. Click [HERE](#) to register.

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 2,932,596
- Total deaths: 130,133
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

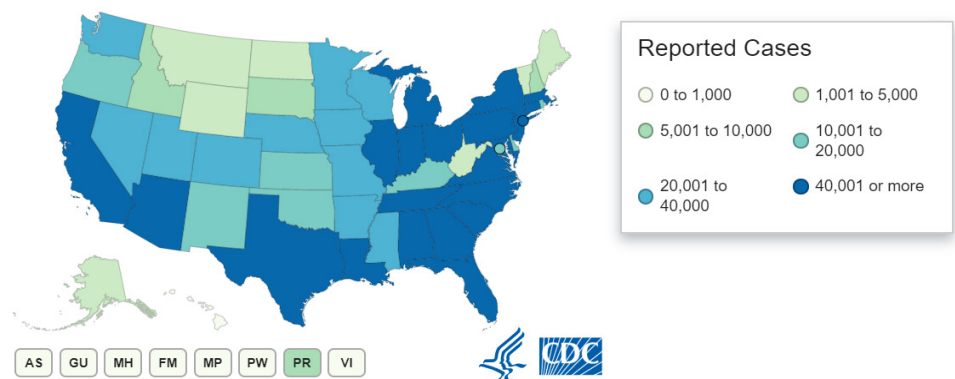

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or

ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or  
iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### National Laboratory Testing Data

- Total tests reported: 37,258,821
- Positive tests reported: 3,449,251
- Percent of positive tests: 9%

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #81 JULY 7, 2020

## COVID-19 CASES BY IHS AREA AS OF JULY 5, 2020

	NEGATIVE CASES	POSITIVE CASES	TESTED
NAVAJO	35,727	8,704	48,638
ALBUQUERQUE	14,696	1,133	21,331

\*as of 11:59PM EST July 5, 2020

## CALIFORNIA

As of July 6, 2020, there were a total of 277,774 positive cases and 6,448 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 22,861 cases
- Age 18-49: 162,714 cases
- Age 50-64: 55,931 cases
- Age 65 and older: 35,957 cases
- Unknown/Missing: 311 cases

Gender of all confirmed positive cases:

- Female: 137,284 cases
- Male: 139,007 cases
- Unknown: 1,413

Lab tests reported statewide: 4,869,370

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

4,686 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 7/05/2020.

Of these, 209 patients have tested positive for COVID-19 and 3,685 have tested negative for COVID-19.

If you have any questions or concerns please contact:

## CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF July 7, 2020

### Counties with most reported cases

Los Angeles	116,707
Riverside	22,485
Orange	20,167
San Diego	17,002
San Bernardino	15,346

### Counties with most reported deaths

Los Angeles	3,534
Riverside	486
San Diego	387
Orange	366
San Bernardino	269

**277,774** Cases  
in California

**6,448** Deaths  
in California

### New Confirmed Cases in California by Date of Lab Confirmation

### New Confirmed Deaths in California by Date

As of 7/6/2020. Source: CDPH

## RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **359 cases** and **23 deaths** among American Indian and Alaska Native people in California.

35% of cases and 1% of deaths are of unknown race/ethnicity. As of 7/06/2020. Source: CDPH

## Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

Note: IHS data source is the IHS Data Portal, as of 6/25/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

**Positive Cases by Age Group**  
among all California cases

**Positive Cases by Gender**  
among all California cases

Note: Percentages may not add up to 100% due to rounding.

As of 7/06/2020. Source: CDPH

### In California:

**2.2%** of confirmed cases have been admitted to a hospital

**0.6%** of confirmed cases have been admitted to an Intensive Care Unit

**2.3%** of cases have died

As of 7/06/2020. Source: CDPH

### Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
