

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #97 JULY 29, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 16.55 million with more than 656,000 deaths.

The total number of cases in the U.S. increased from 4,280,135 as reported on Tuesday 7/28/2020 to 4,339,997 reported today. The number of deaths in the U.S. increased from 147,672 to 148,866.

The California Area Indian Health Service (IHS) has reported that 395 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 7/27/2020.

The California Department of Public Health (CDPH) has taken action to require better, more timely collection of data on race, ethnicity, gender identity, and sexual orientation to better understand the impact of COVID-19 on the state's diverse communities. The regulations require providers and labs to continue to collect and report race and ethnicity and patient's gender identity and sexual orientation data.

The Centers for Medicare & Medicaid Services released its first monthly update of data that provides a snapshot of the impact of COVID-19 on the Medicare population. For the first time, the snapshot includes data for American Indian/Alaskan Native Medicare beneficiaries. The new data indicate that American Indian/Alaskan Native beneficiaries have the second highest rate of hospitalization for COVID-19 among racial/ethnic groups after Blacks. Previously, the number of hospitalizations of American Indian/Alaskan Native beneficiaries was too low to be reported. The updated data confirm that the COVID-19 public health emergency is disproportionately affecting vulnerable populations, particularly racial and ethnic minorities.

The National Indiana Health Board is hosting a webinar for health insurance enrollment during COVID-19 targeted towards enrollment assisters and patient registration and benefits coordinators. The webinar will take place Thursday, July 30, 2020 from 2:00-3:30 PM ET. Register using the following: <https://bit.ly/EnrollmentAssisterWebinar>. Forward any questions regarding the webinar to the following email: kbitsuie@nihb.org.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 4,339,997
- Total deaths: 148,866
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

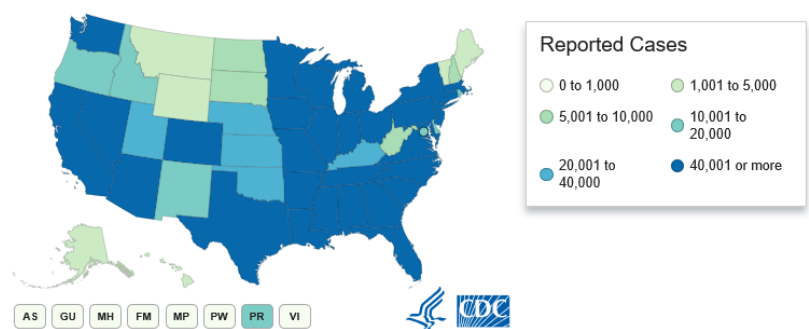

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 52,942,145
- Positive tests reported: 5,046,506
- Percent of positive tests: 10%

CALIFORNIA

As of July 28, 2020, there were a total of 475,305 positive cases and 8,715 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 42,697 cases
- Age 18-49: 287,413 cases
- Age 50-64: 91,465 cases
- Age 65 and older: 53,138 cases
- Unknown/Missing: 592 cases

Gender of all confirmed positive cases:

- Female: 238,049 cases
- Male: 234,575 cases
- Unknown: 2,681 cases

Lab tests reported statewide: 7,517,466

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

6,669 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 7/27/2020.

Of these, 395 patients have tested positive for COVID-19 and 5,373 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF July 29, 2020

Counties with most reported cases

Los Angeles	179,107
Riverside	36,458
Orange	34,832
San Bernardino	30,493
San Diego	28,007

Counties with most reported deaths

Los Angeles	4,426
Riverside	672
Orange	581
San Diego	547
San Bernardino	395

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

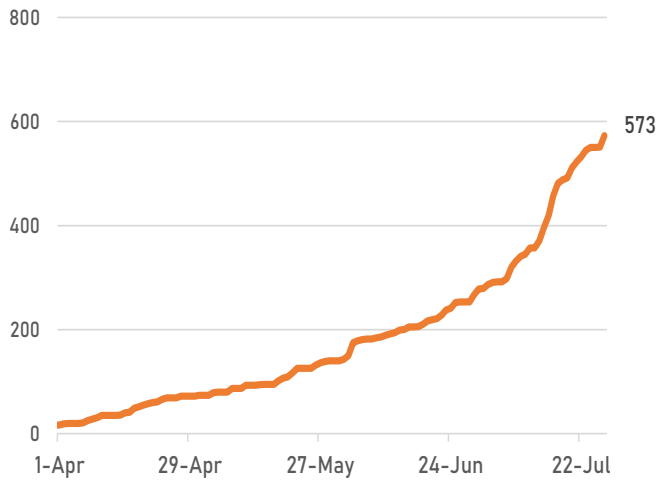

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **713 cases** and **32 deaths** among American Indian and Alaska Native people in California.

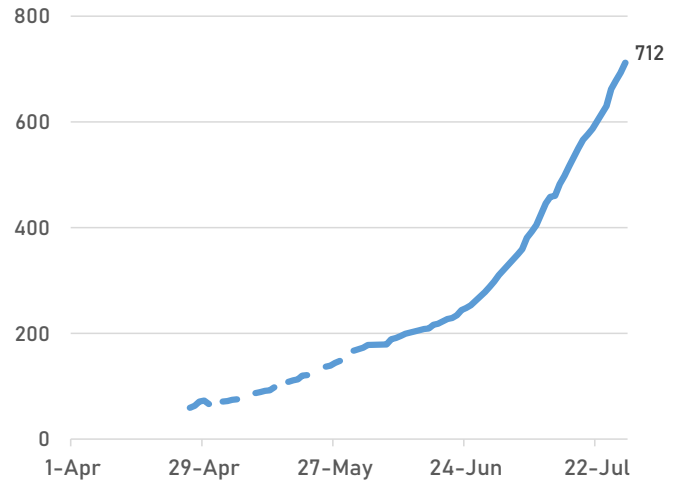

36% of cases and 2% of deaths are of unknown race/ethnicity. As of 7/28/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) Cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

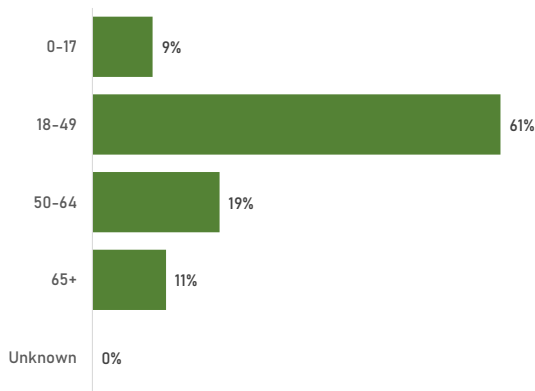

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

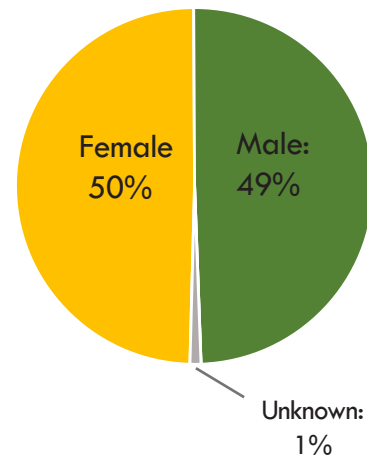

Note: IHS data source is the IHS Data Portal, as of 7/26/2020. Gaps in CDPH reported AIAN cases are due to intermittent data availability.

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

Note: Percentages may not add up to 100% due to rounding.

As of 7/29/2020. Source: CDPH

In California:

1.5% of confirmed cases have been admitted to a hospital

0.4% of confirmed cases have been admitted to an Intensive Care Unit

1.8% of cases have died

As of 7/29/2020. Source: CDPH

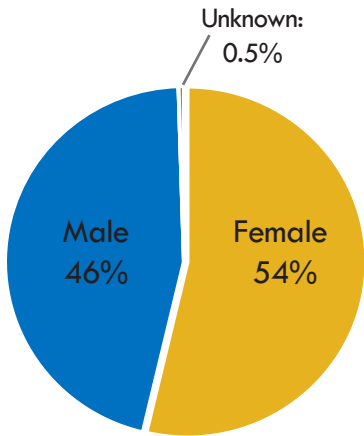

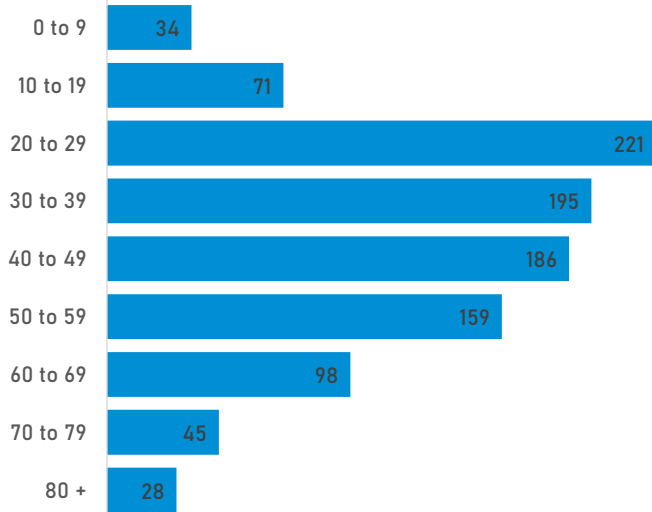

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.

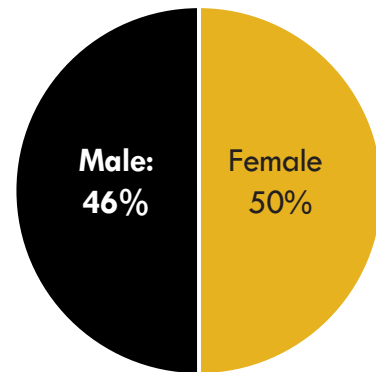

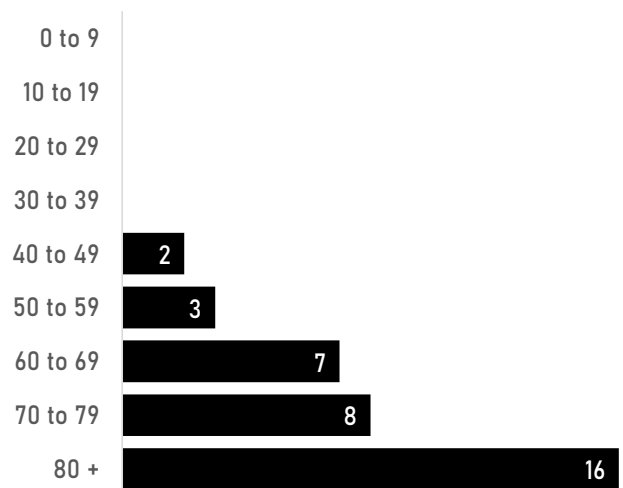

Source: CDPH

American Indian Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

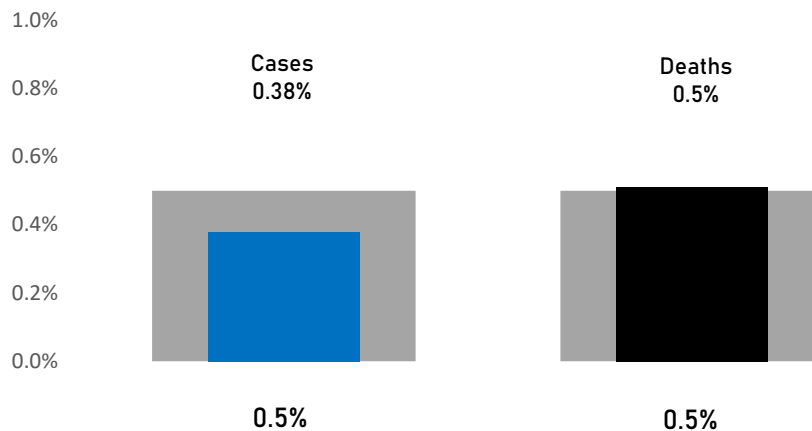

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

CDC Data show that AIAN in California are testing positive for COVID-19 and dying at rates that are nearly equal to their proportion of California's population. This includes a total of **1,028 cases** and **36 deaths**.

COVID-19 Testing Information from Patients Seen at a Tribal or Urban Indian Health Program in California.

Note: This map shows patients by the regional location of the clinic where they were tested and NOT by the residence of the patients.
