

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #106 AUGUST 11, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 19.93 million with more than 732,000 deaths.

The total number of cases in the U.S. increased from 5,023,649 as reported on Monday 8/10/2020 to 5,064,171 reported today. The number of deaths in the U.S. increased from 161,842 to 162,407.

The California Area Indian Health Service (IHS) has reported that 519 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 8/9/2020.

On Thursday August 6, the National Indian Health Board (NIHB) submitted a letter to President Trump urging his Administration to endorse critical Tribal COVID-19 health priorities as negotiations continue on the next congressional pandemic relief package. The priorities outlined in NIHB's letter reflect many urgent priorities communicated by Tribal leaders in furtherance of federal treaty obligations and to address the disproportionate impact of COVID-19 on Tribal Nations and American Indian and Alaska Native people. The provisions outlined in NIHB's letter to the President can be found here: www.nihb.org/covid-19/updates.

Dr. Sonia Angell, California's Department of Public Health Director, resigned on Sunday August 9th. Her resignation comes just days after it was revealed that the state's computer system 'CalREDIE' was malfunctioning, causing an undercount of COVID-19 cases in the state. In her place, Sandra Shewry will serve as acting director of California Department of Public Health.

Secretary DeVos announced a \$15 million grant competition to promote tribally directed education choice for Native American students. Accessing Choices in Education (ACE) grants will allow tribes, or other education entities partnering with tribes, to set up a variety of education options and services from which parents or students can choose. For more information on the ACE grants, visit <https://oese.ed.gov>.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 5,064,171
- Total deaths: 162,407
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

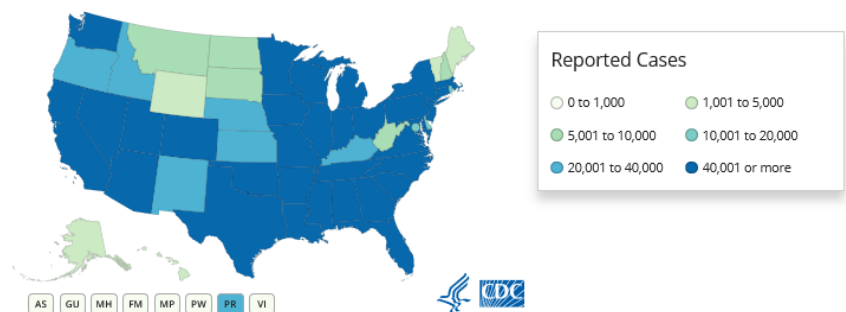

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

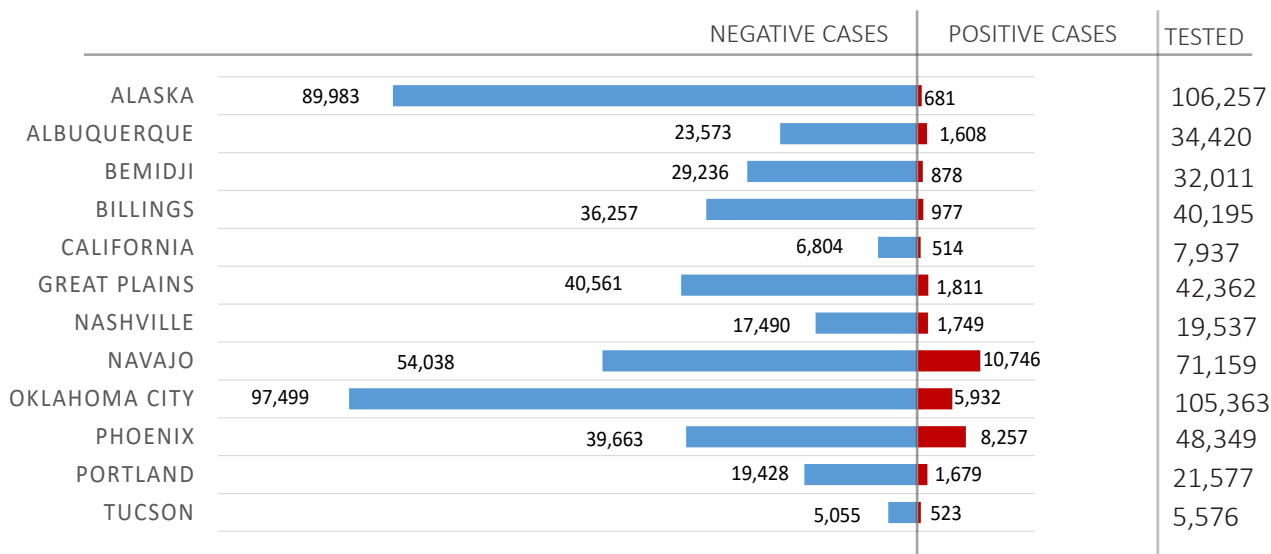

National Laboratory Testing Data (updated as of 8/10)

- Total tests reported: 65,756,307
- Positive tests reported: 5,888,400
- Percent of positive tests: 9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #106 AUGUST 11, 2020

*as of 11:59PM EST August 9, 2020

CALIFORNIA

As of August 10, 2020, there were a total of 574,411 positive cases and 10,468 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 54,778 cases
- Age 18-49: 346,637 cases
- Age 50-64: 109,714 cases
- Age 65 and older: 62,506 cases
- Unknown/Missing: 776 cases

Gender of all confirmed positive cases:

- Female: 287,810 cases
- Male: 279,981 cases
- Unknown: 6,620 cases

Lab tests reported statewide: 9,186,279

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

New Confirmed Cases in California by Date of Lab Confirmation

*Note: The issue with the state's electronic laboratory reporting system has been addressed and the system is now performing as expected. The backlog has been eliminated, and new cases attributed to the backlog will be reported over the next few days.

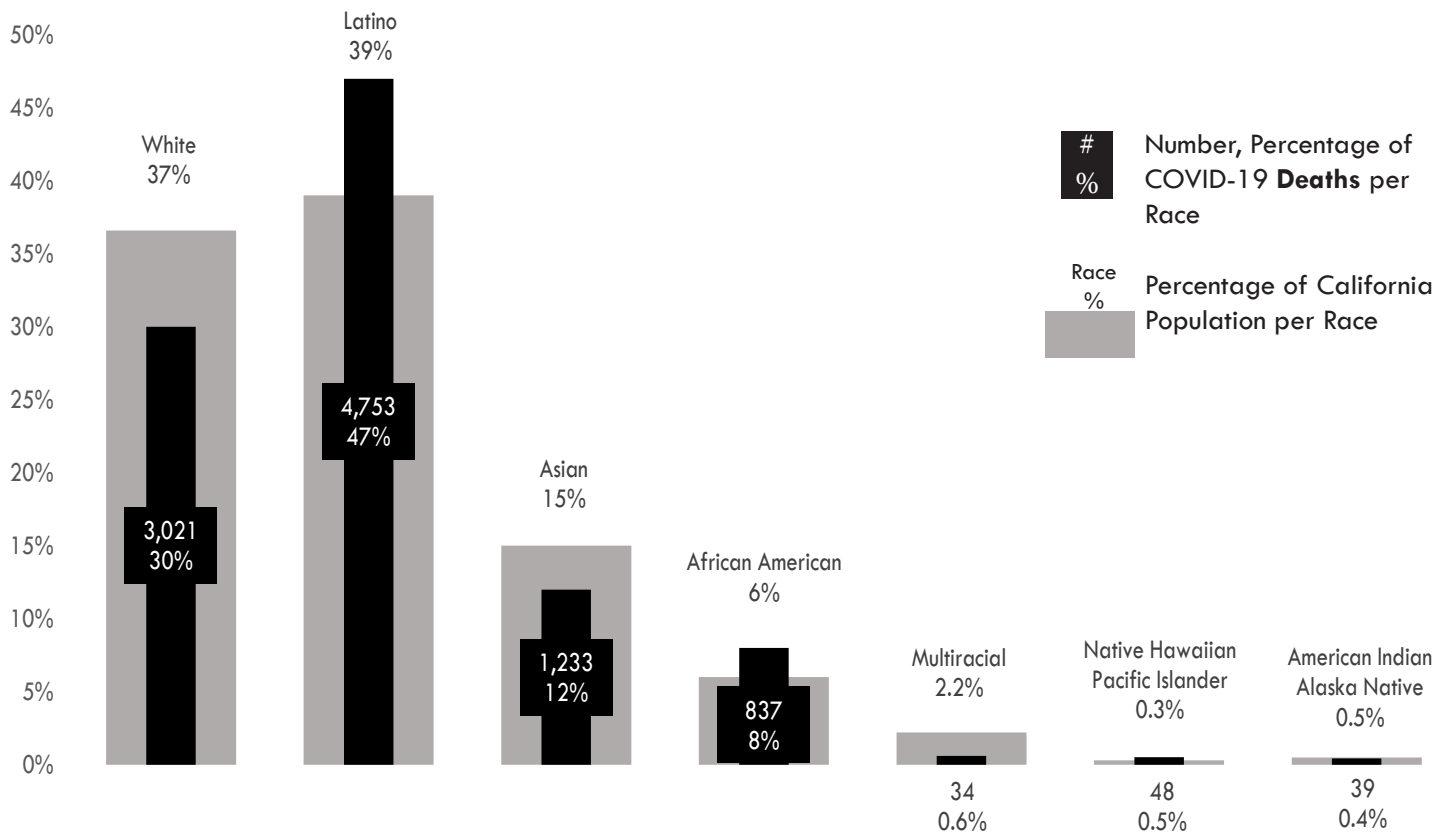

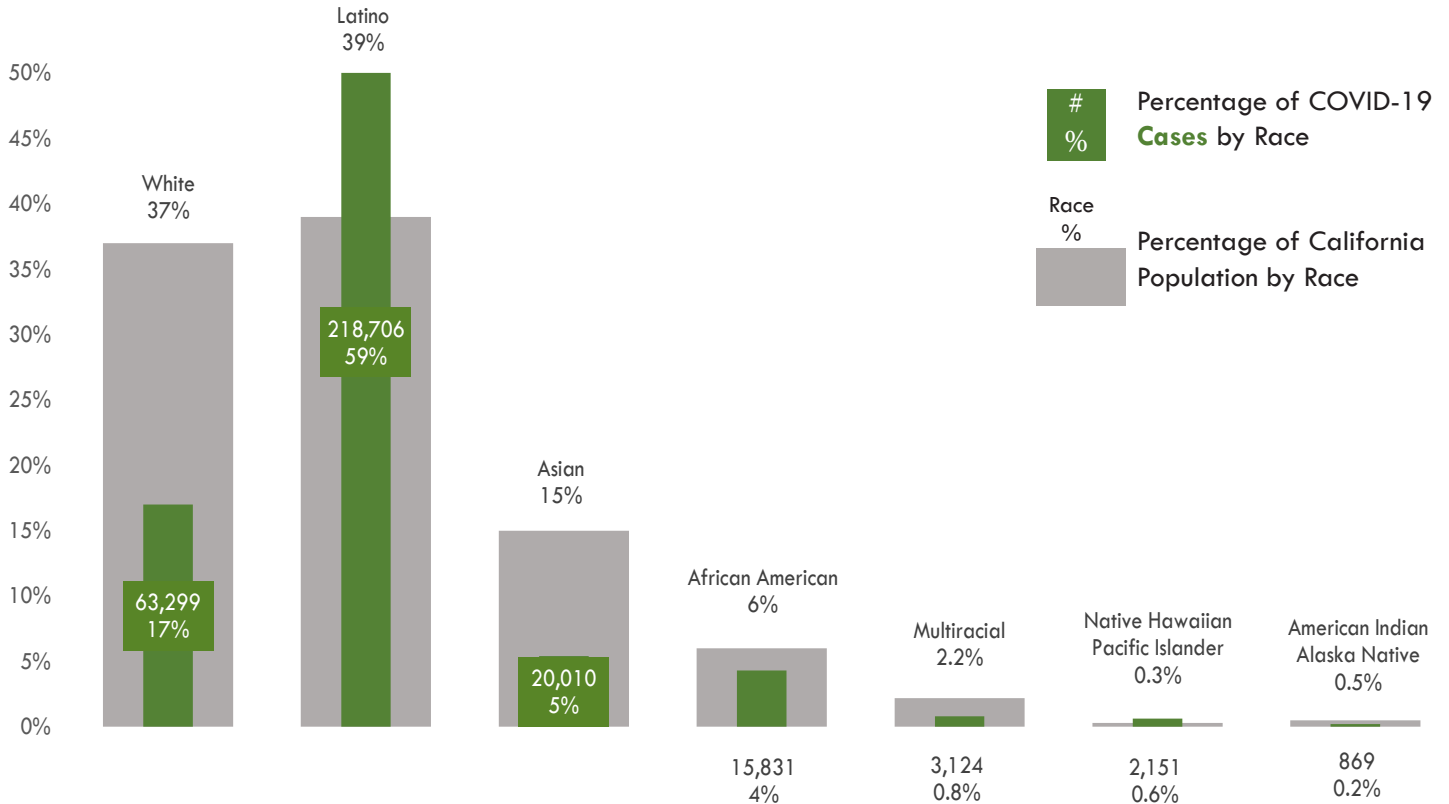

New Confirmed Deaths in California by Date

As of 08/11/2020. Source: CDPH

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

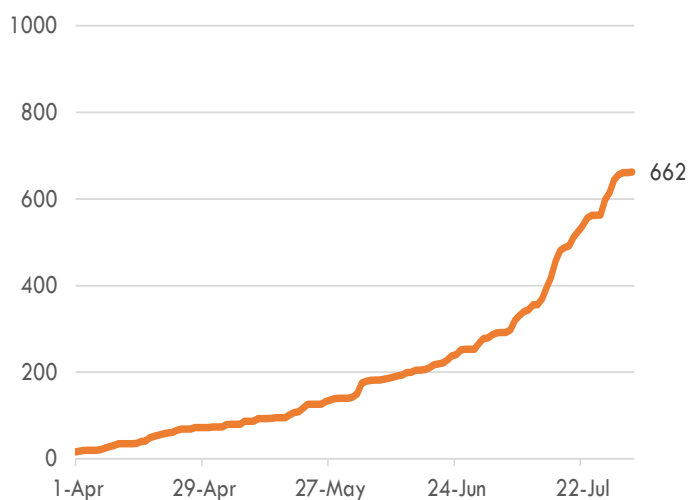

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **869 cases** and **39 deaths** among American Indian and Alaska Native people in California.

35% of cases and 2% of deaths are of unknown race/ethnicity. As of 8/11/2020. Source: CDPH

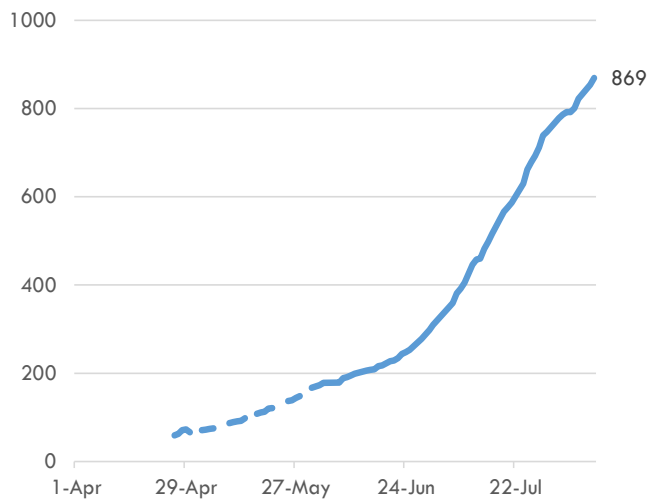

Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

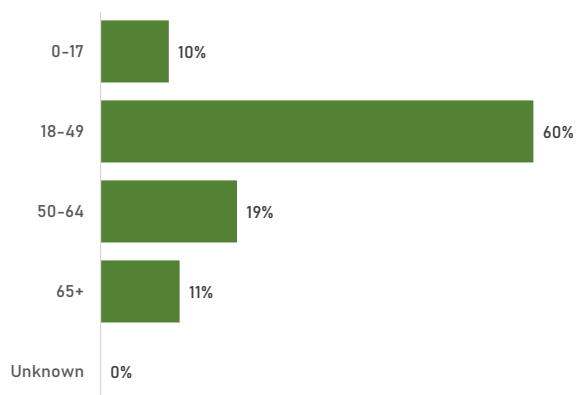

As of 7/31/2020. Source: IHS Data Portal.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

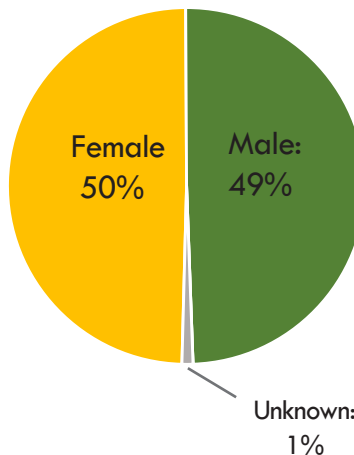

Note: Gaps in CDPH reported AIAN cases are due to intermittent data availability. As of 8/11/2020, Source: CDPH.

Positive Cases by Age Group among all California cases

Note: Percentages may not add up to 100% due to rounding.

Positive Cases by Gender among all California cases

As of 8/11/2020. Source: CDPH

In California:

1.0% of confirmed cases have been admitted to a hospital

0.2% of confirmed cases have been admitted to an Intensive Care Unit

1.8% of cases have died

As of 8/11/2020. Source: CDPH

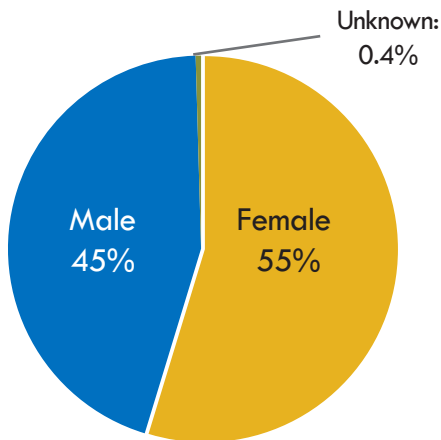

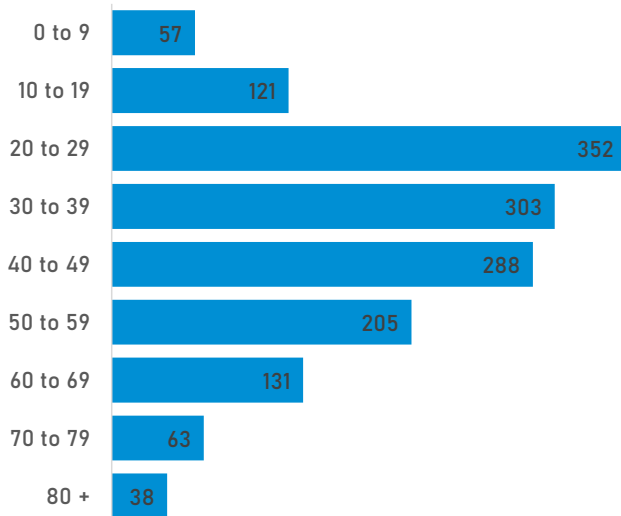

Racial disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- Almost half of all deaths continue to be in the 80+ age category.
