

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #107 AUGUST 12, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 20.16 million with more than 737,000 deaths.

The total number of cases in the U.S. increased from 5,064,171 as reported on Tuesday 8/11/2020 to 5,119,711 reported today. The number of deaths in the U.S. increased from 162,407 to 163,651.

The California Area Indian Health Service (IHS) has reported that 541 California Tribal or Urban Indian Health Program patients have tested positive for COVID-19 as of 8/10/2020.

With funding from the Indian Health Service, the National Indian Health Board (NIHB) is offering a funding opportunity for Tribes and Tribal Organizations seeking to strengthen school preparation and readiness for safe operations during the COVID pandemic. This funding is intended to fulfill immediate Tribal school readiness needs. NIHB will provide mini-grants to a maximum of 15 Tribes or Tribal organizations in amounts up to \$2,000 each. The completed application is due by 11:59 PM EDT on Friday, August 28, 2020. The project period will run from approximately September 1 through October 31, 2020. NIHB will offer an optional pre-application webinar on Tuesday, August 18, 2020 at 3:30 PM Eastern Time. Register for the webinar [here](#). Please contact Brett Weber at bweber@nihb.org with any questions.

On Thursday August 6, the National Indian Health Board (NIHB) submitted a letter to President Trump urging his Administration to endorse critical Tribal COVID-19 health priorities as negotiations continue on the next congressional pandemic relief package. The priorities outlined in NIHB's letter reflect many urgent priorities communicated by Tribal leaders in furtherance of federal treaty obligations and to address the disproportionate impact of COVID-19 on Tribal Nations and American Indian and Alaska Native people. The provisions outlined in NIHB's letter to the President can be found here: www.nihb.org/covid-19/updates.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 5,119,711
- Total deaths: 163,651
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

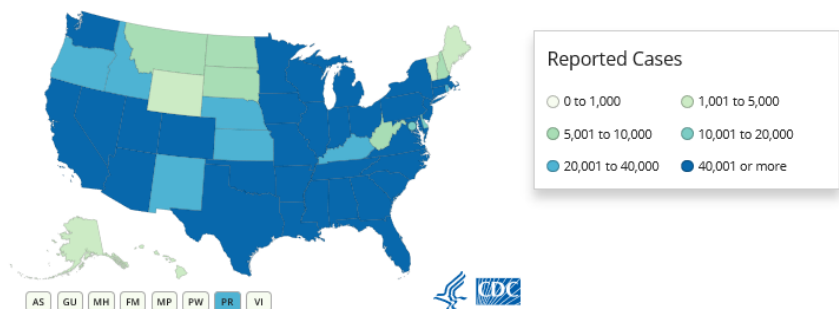

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 70,212,154
- Positive tests reported: 6,256,214
- Percent of positive tests: 9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #107 AUGUST 12, 2020

*as of 11:59PM EST August 10, 2020

CALIFORNIA

As of August 11, 2020, there were a total of 586,056 positive cases and 10,648 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 56,276 cases
- Age 18-49: 353,518 cases
- Age 50-64: 111,811 cases
- Age 65 and older: 63,617 cases
- Unknown/Missing: 834 cases

Gender of all confirmed positive cases:

- Female: 293,952 cases
- Male: 285,476 cases
- Unknown: 6,628 cases

Lab tests reported statewide: 9,303,467

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

8,180 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 8/10/2020.

Of these, 541 patients have tested positive for COVID-19 and 7,058 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF August 12, 2020

Counties with most reported cases

| | |
|----------------|---------|
| Los Angeles | 212,421 |
| Riverside | 44,237 |
| Orange | 41,205 |
| San Bernardino | 38,467 |
| San Diego | 33,159 |

Counties with most reported deaths

| | |
|----------------|-------|
| Los Angeles | 5,057 |
| Riverside | 824 |
| Orange | 734 |
| San Diego | 602 |
| San Bernardino | 549 |

in California

New Confirmed Cases in California by Date of Lab Confirmation

*Note: The issue with the state's electronic laboratory reporting system has been addressed and the system is now performing as expected. The backlog has been eliminated, and new cases attributed to the backlog will be reported over the next few days.

New Confirmed Deaths in California by Date

As of 08/12/2020. Source: CDPH

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **883** cases and **41** deaths among American Indian and Alaska Native people in California.

Note: 35% of cases and 2% of deaths are of unknown race/ethnicity. As of 8/12/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

As of 7/31/2020. Source: IHS Data Portal.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

Note: Gaps in CDPH reported AIAN cases are due to intermittent data availability. As of 8/12/2020, Source: CDPH.

Positive Cases by Age Group among all California cases

Note: Less than 1% of cases are of unknown age.

Positive Cases by Gender among all California cases

As of 8/12/2020. Source: CDPH

In California:

1.0% of confirmed cases have been admitted to a hospital

0.3% of confirmed cases have been admitted to an Intensive Care Unit

1.8% of cases have died

As of 8/12/2020. Source: CDPH

Case and death disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- More males (57%) are dying from COVID-19 than females (43%).

American Indian and Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

CDC Data show that AIAN in California are testing positive for COVID-19 at rates just below their proportion of California's population and dying at slightly higher than expected rates.

This includes a total of **1,559 cases** and **49 deaths**.
