

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #113 AUGUST 20, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 22.25 million with more than 782,000 deaths.

The total number of cases in the U.S. increased from 5,460,429 as reported on Wednesday 8/19/2020 to 5,506,929 reported today. The number of deaths in the U.S. increased from 171,012 to 172,416.

The National Institute for Health Care Management (NIHCM) Foundation is hosting a webinar on environmental health and COVID-19. Researchers in the US have suggested air pollution has significantly worsened the COVID-19 pandemic and potentially led to more deaths than if pollution-free skies were the norm. This webinar will explore how different neighborhoods in the same city can have vastly different air quality and what that means for their residents' short- and long-term health outcomes. The webinar will take place tomorrow, August 21, 2020, from 12:00-1:00 PM EST. Learn more and register for the webinar [here](#).

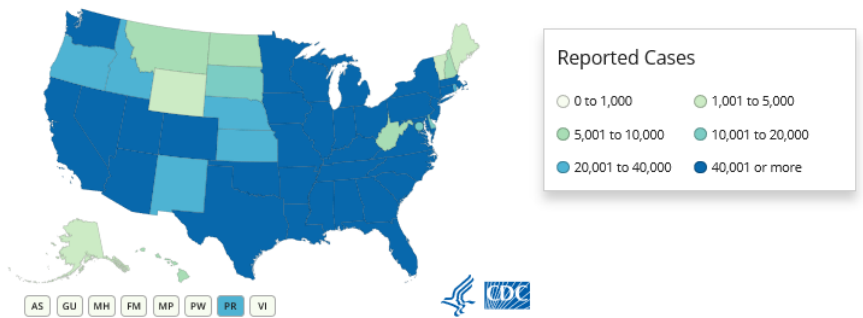

The Centers for Disease Control and Prevention (CDC) released yesterday their August 19th Morbidity and Mortality Weekly Report (MMWR). It is already known that American Indian and Alaska Native (AI/AN) persons appear to be disproportionately affected by the COVID-19 pandemic; however, limited data are available to quantify the disparity in COVID-19 incidence, severity, and outcomes among AI/AN persons compared with those among other racial/ethnic groups. This report shows that in 23 states with adequate race/ethnicity data, the cumulative incidence of laboratory-confirmed COVID-19 among AI/AN persons was 3.5 times that among non-Hispanic white persons. A large percentage of missing data precluded analysis of some characteristics and outcomes. To read the full report, visit [here](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 5,506,929
- Total deaths: 172,416
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data (as of 8/19/20)

- Total tests reported: 74,830,464
- Positive tests reported: 6,633,163
- Percent of positive tests: 9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #113 AUGUST 20, 2020

*as of 11:59PM EST August 18, 2020

CALIFORNIA

As of August 19, 2020, there were a total of 644,751 positive cases and 11,686 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 63,909 cases
- Age 18-49: 388,034 cases
- Age 50-64: 122,554 cases
- Age 65 and older: 69,380 cases
- Unknown/Missing: 874 cases

Gender of all confirmed positive cases:

- Female: 324,262 cases
- Male: 313,639 cases
- Unknown: 6,850 cases

Lab tests reported statewide: 10,227,966

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

8,853 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 8/18/2020.

Of these, 588 patients have tested positive for COVID-19 and 7,517 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

CURRENT AS OF August 20, 2020

Counties with most reported cases

Los Angeles	226,006
Riverside	48,741
Orange	43,938
San Bernardino	43,224
San Diego	35,378

Counties with most reported deaths

Los Angeles	5,392
Riverside	917
Orange	833
San Diego	638
San Bernardino	621

RACIAL DISTRIBUTION OF CONFIRMED COVID-19 CASES AND DEATHS IN CALIFORNIA

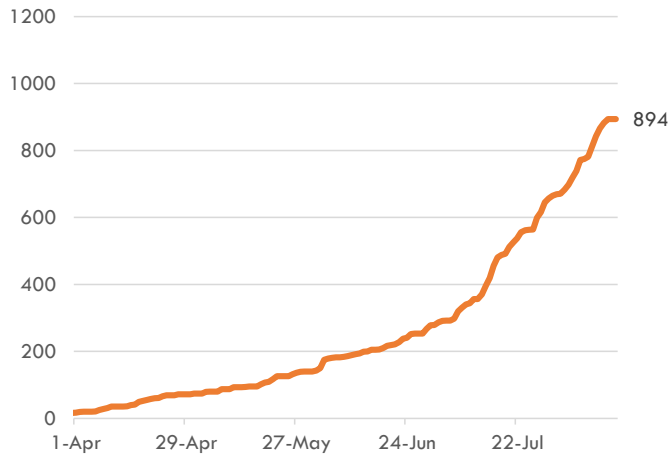

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.4% of deaths** in California. These include **1,014** cases and **40** deaths among American Indian and Alaska Native people in California.

Note: 35% of cases and 1% of deaths are of unknown race/ethnicity. As of 8/20/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

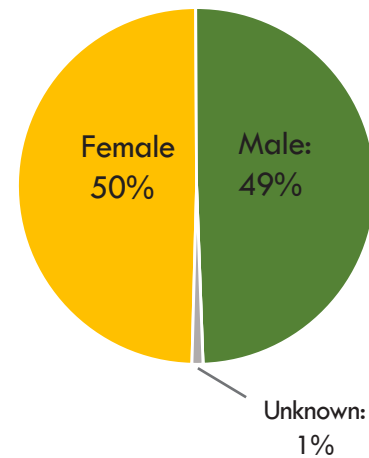

As of 8/18/2020. Source: IHS Data Portal. Note: Gaps in CDPH reported AIAN cases are due to intermittent availability. As of 8/20/2020. Source: CDPH

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

As of 8/20/2020. Source: CDPH

In California:

0.8% of confirmed cases have been admitted to a hospital

0.3% of confirmed cases have been admitted to an Intensive Care Unit

1.8% of cases have died

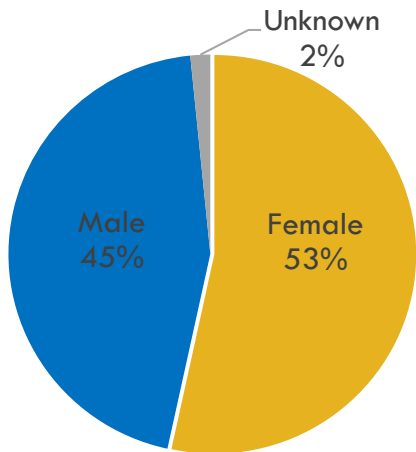

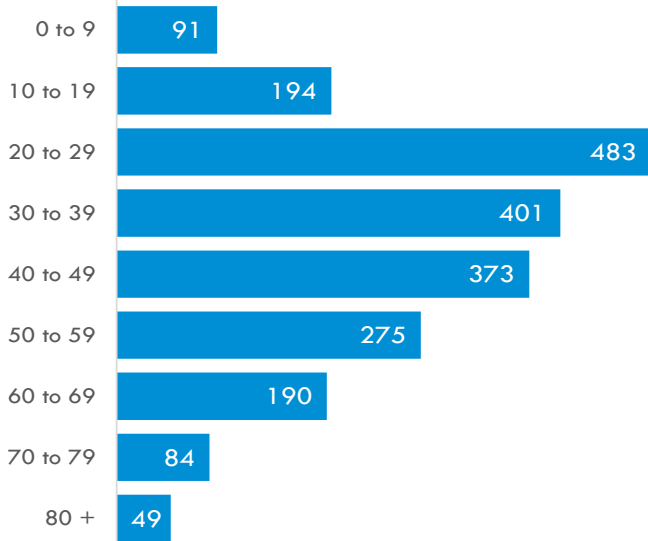

Case and death disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.5 times their population representation across all adult age categories.
- More males (57%) are dying from COVID-19 than females (43%).

As of 8/20/2020. Source: CDPH

American Indian and Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

CDC Data show that AIAN in California are testing positive for COVID-19 at rates equal to their proportion of California's population and dying at higher than expected rates. This includes a total of **2,140 cases** and **69 deaths**.
