

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 29.15 million with more than 926,000 deaths.

The total number of cases in the U.S. increased from 6,503,030 as reported on Monday 9/14/2020 to 6,537,627 reported today. The number of deaths in the U.S. increased from 193,705 to 194,092.

There has been a large increase in the need for healthcare personal protective equipment (PPE) and specialty supplies due to the COVID-19 pandemic. This increase in demand has led to shortages in PPE and changes in how PPE is used and optimized. ASPR TRACIE, in collaboration with the COVID-19 Healthcare Resilience Working Group, is hosting this webinar to highlight PPE preservation strategies, trends, challenges, and lessons learned/promising practices. Presenters from the public and private sectors will discuss strategies to optimize the healthcare supply of respirators and PPE, such as implementing crisis capacity strategies, respirator and mask testing programs, disinfection and decontamination procedures, and acquisition and distribution policies. The webinar will take place Thursday, September 24, 2020 from 2:30-4:00 PM ET. Register for the webinar [HERE](#).

The March 2020 CARES Act recognized that tribal governments are confronting extraordinary demands parallel to those faced by state and local governments. As Congress returns from their summer recess to debate additional coronavirus relief packages, the Harvard Kennedy School's Ash Center and the Harvard Project on American Indian Economic Development will host a diverse panel of Congressional and tribal leaders to look ahead and discuss how Congress might come together on a bipartisan basis to enhance support for Indian Country's pandemic recovery efforts. This event will take place September 17, 12:00 PM EST. Register for the event [HERE](#).

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 6,537,627
- Total deaths: 194,092
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

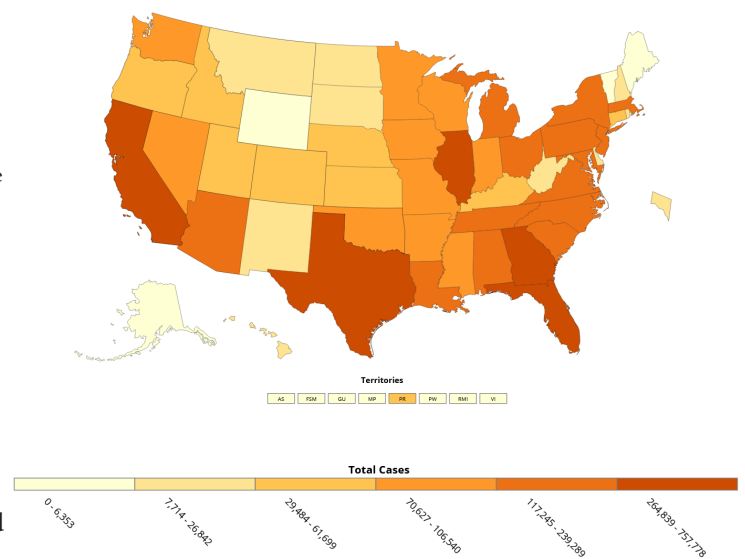

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Total Number of COVID-19 Cases in the US Reported to the CDC, by State/Territory

### National Laboratory Testing Data

- Total tests reported: 98,053,127
- Positive tests reported: 8,058,807
- Percent of positive tests: 8%

## CALIFORNIA

As of September 14, 2020, there were a total of 760,013 positive cases and 14,451 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 77,859 cases
- Age 18-49: 456,173 cases
- Age 50-64: 143,563 cases
- Age 65 and older: 81,506 cases
- Unknown/Missing: 912 cases

Gender of all confirmed positive cases:

- Female: 383,892 cases
- Male: 369,597 cases
- Unknown: 6,524 cases

Lab tests reported statewide: 12,928,170

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

10,818 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 9/13/2020.

Of these, 674 patients have tested positive for COVID-19 and 9,344 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	254,622
Riverside	55,488
San Bernardino	50,163
Orange	50,149
San Diego	42,889

Counties with most reported deaths

Los Angeles	6,231
Riverside	1,118
Orange	1,093
San Bernardino	832
San Diego	734

### Positive Cases by Age Group among all California cases

### Positive Cases by Gender among all California cases

Note: Demographic percentages may not add up to 100% due to rounding. As of 9/15/2020. Source: CDPH

### In California:

**0.4%** of confirmed cases are hospitalized

**0.1%** of confirmed cases are in the Intensive Care Unit

**1.9%** of cases have died

### Case and death disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.3 times their population representation across all adult age categories.
- More males (57%) are dying from COVID-19 than females (43%).
