

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 29.73 million with more than 937,000 deaths.

The total number of cases in the U.S. increased from 6,571,867 as reported on Wednesday 9/16/2020 to 6,613,331 reported today. The number of deaths in the U.S. increased from 195,053 to 196,277.

The Assistant Secretary for Preparedness (ASPR) TRACIE and ASPR's Pediatric Centers of Excellence are collaborating on a webinar series focused on the impact of the COVID-19 pandemic on children. The first webinar is focused on child health and wellness. Panelists will discuss resumption of routine care, missed immunizations and lead poisoning screening, sleep, and child neglect and abuse. The webinar will take place Wednesday, September 30, from 1:30-2:45 PM ET. Register [HERE](#).

Governor Gavin Newsom announced that Washington and Oregon, members of the Western States Pact, will participate with California in piloting a project to test promising exposure notification technology. These states join other members of the Western States Pact, Colorado and Nevada, along with states and universities across the country, in piloting this technology. To read the full article, visit [HERE](#).

There has been a large increase in the need for healthcare personal protective equipment (PPE) and specialty supplies due to the COVID-19 pandemic. This increase in demand has led to shortages in PPE and changes in how PPE is used and optimized. ASPR TRACIE, in collaboration with the COVID-19 Healthcare Resilience Working Group, is hosting this webinar to highlight PPE preservation strategies, trends, challenges, and lessons learned/promising practices. Presenters from the public and private sectors will discuss strategies to optimize the healthcare supply of respirators and PPE, such as implementing crisis capacity strategies, respirator and mask testing programs, disinfection and decontamination procedures, and acquisition and distribution policies. The webinar will take place Thursday, September 24, 2020 from 2:30-4:00 PM ET. Register for the webinar [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 6,613,331
- Total deaths: 196,277
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

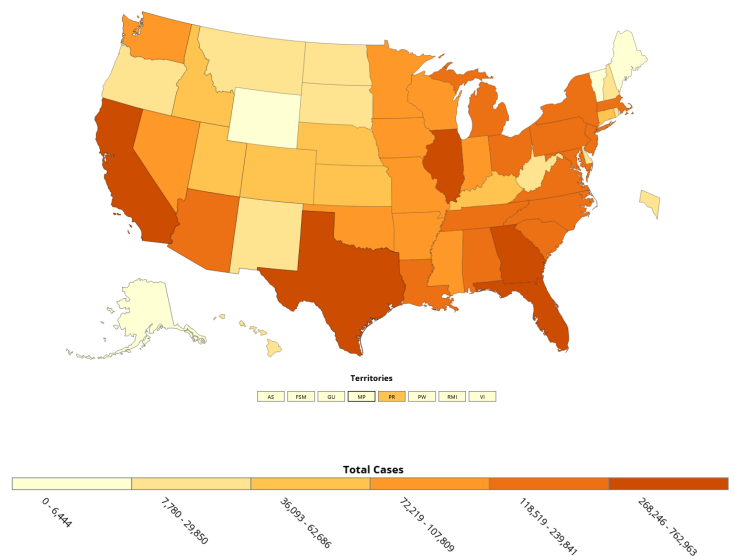

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

Total Number of COVID-19 Cases in the US Reported to the CDC, by State/Territory

National Laboratory Testing Data

- Total tests reported: 100,269,291
- Positive tests reported: 8,166,086
- Percent of positive tests: 8%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #132 SEPTEMBER 17, 2020

*as of 11:59PM EST September 15, 2020

CALIFORNIA

As of September 16, 2020, there were a total of 766,201 positive cases and 14,721 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 78,506 cases
- Age 18-49: 459,903 cases
- Age 50-64: 144,721 cases
- Age 65 and older: 82,148 cases
- Unknown/Missing: 923 cases

Gender of all confirmed positive cases:

- Female: 386,895 cases
- Male: 372,752 cases
- Unknown: 6,554 cases

Lab tests reported statewide: 13,080,037

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.
