Globally, COVID-19 cases have surpassed 30.05 million with more than 943,000 deaths.

The total number of cases in the U.S. increased from 6,613,331 as reported on Thursday 9/17/2020 to 6,656,799 reported today. The number of deaths in the U.S. increased from 196,277 to 197,116.

The Assistant Secretary for Preparedness (ASPR) TRACIE and ASPR's Pediatric Centers of Excellence are collaborating on a webinar series focused on the impact of the COVID-19 pandemic on children. The first webinar is focused on child health and wellness. Panelists will discuss resumption of routine care, missed immunizations and lead poisoning screening, sleep, and child neglect and abuse. The webinar will take place Wednesday, September 30, from 1:30-2:45 PM ET. Register HERE.

Governor Gavin Newsom announced that Washington and Oregon, members of the Western States Pact, will participate with California in piloting a project to test promising exposure notification technology. These states join other members of the Western States Pact, Colorado and Nevada, along with states and universities across the country, in piloting this technology. To read the full article, visit HERE.

There has been a large increase in the need for healthcare personal protective equipment (PPE) and specialty supplies due to the COVID-19 pandemic. This increase in demand has led to shortages in PPE and changes in how PPE is used and optimized. ASPR TRACIE, in collaboration with the COVID-19 Healthcare Resilience Working Group, is hosting this webinar to highlight PPE preservation strategies, trends, challenges, and lessons learned/promising practices. Presenters from the public and private sectors will discuss strategies to optimize the healthcare supply of respirators and PPE, such as implementing crisis capacity strategies, respirator and mask testing programs, disinfection and decontamination procedures, and acquisition and distribution policies. The webinar will take place Thursday, September 24, 2020 from 2:30-4:00 PM ET. Register for the webinar HERE.

**UNITED STATES**

**COVID-19: U.S. at a Glance***
- Total cases: 6,656,799
- Total deaths: 197,116
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease. To read the full article, visit HERE.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**National Laboratory Testing Data**
- Total tests reported: 101,427,652
- Positive tests reported: 8,229,808
- Percent of positive tests: 8%

---

**DAILY HIGHLIGHTS**

CORONAVIRUS DISEASE 2019 (COVID-19)
SITUATIONAL REPORT #133 SEPTEMBER 18, 2020
As of September 17, 2020, there were a total of 769,831 positive cases and 14,812 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 78,946 cases
- Age 18-49: 462,003 cases
- Age 50-64: 145,439 cases
- Age 65 and older: 82,521 cases
- Unknown/Missing: 922 cases

Gender of all confirmed positive cases:
- Female: 388,633 cases
- Male: 374,676 cases
- Unknown: 6,552 cases

Lab tests reported statewide: 13,177,186

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click HERE to find your nearest testing site.

11,287 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 9/16/2020.

Of these, 694 patients have tested positive for COVID-19 and 9,869 have tested negative for COVID-19.
CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases
- Los Angeles: 257,246
- Riverside: 56,007
- San Bernardino: 50,770
- Orange: 50,537
- San Diego: 43,621

Counties with most reported deaths
- Los Angeles: 6,324
- Riverside: 1,143
- Orange: 1,115
- San Bernardino: 839
- San Diego: 754

American Indians and Alaska Natives account for 0.5% percent of the population, 0.2% of COVID-19 cases, and 0.3% of deaths in California. This includes a total of 1,358 cases and 45 deaths among American Indian and Alaska Native people in California.

Latinos and African Americans are dying at disproportionately high rates in California. The proportion of COVID-19 deaths in Latinos is 1.3 times their population representation across all adult age categories.

Note: 31% of cases and 1% of deaths are of unknown race/ethnicity. As of 9/18/2020. Source: CDPH
Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.
