

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 30.94 million with more than 959,000 deaths.

The total number of cases in the U.S. increased from 6,656,799 as reported on Friday 9/18/2020 to 6,786,352 reported today. The number of deaths in the U.S. increased from 197,116 to 199,024.

The U.S. Department of Health and Human Services (HHS) and Department of Defense (DoD) released two documents on September 16, 2020, outlining the Administration's detailed strategy to deliver safe and effective COVID-19 vaccine doses to the American people. The documents, developed by HHS in coordination with DoD and the Centers for Disease Control and Prevention (CDC), provide a strategic distribution overview along with an interim playbook for state, Tribal, territorial, and local public health programs and their partners on how to plan and operationalize a vaccination response to COVID-19 within their respective jurisdictions. Read the full press release [HERE](#) from the Department of Health and Human Services. Download the Strategy for Distributing a COVID-19 Vaccine PDF [HERE](#). Download the COVID-19 Vaccine Distribution Process Infographic PDF [HERE](#).

The Assistant Secretary for Preparedness (ASPR) TRACIE and ASPR's Pediatric Centers of Excellence are collaborating on a webinar series focused on the impact of the COVID-19 pandemic on children. The first webinar is focused on child health and wellness. Panelists will discuss resumption of routine care, missed immunizations and lead poisoning screening, sleep, and child neglect and abuse. The webinar will take place Wednesday, September 30, from 1:30-2:45 PM ET. Register [HERE](#).

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 6,786,352
- Total deaths: 199,024
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

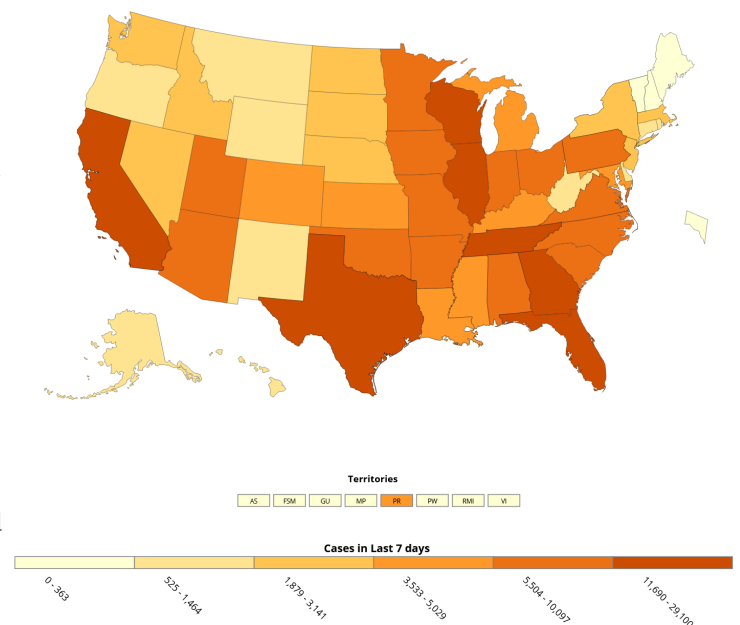

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### National Laboratory Testing Data

- Total tests reported: 104,184,580
- Positive tests reported: 8,362,461
- Percent of positive tests: 8%

## CALIFORNIA

As of September 20, 2020, there were a total of 781,694 positive cases and 15,018 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 80,508 cases
- Age 18-49: 468,969 cases
- Age 50-64: 147,624 cases
- Age 65 and older: 83,683 cases
- Unknown/Missing: 910 cases

Gender of all confirmed positive cases:

- Female: 394,632 cases
- Male: 380,480 cases
- Unknown: 6,582 cases

Lab tests reported statewide: 13,672,782

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

11,668 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 9/19/2020.

Of these, 705 patients have tested positive for COVID-19 and 10,215 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	260,770
Riverside	56,783
San Bernardino	51,559
Orange	51,233
San Diego	44,579

Counties with most reported deaths

Los Angeles	6,353
Riverside	1,153
Orange	1,128
San Bernardino	908
San Diego	760
