

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 33.03 million with more than 996,000 deaths.

The total number of cases in the U.S. increased from 6,916,292 as reported on Thursday 9/24/2020 to 7,095,422 reported today. The number of deaths in the U.S. increased from 201,411 to 204,328.

On Thursday, September 24, U.S. Department of Health and Human Services (HHS) Deputy Secretary Hargan sent a Dear Tribal Leader Letter (DTLL) announcing the initiation of Tribal Consultation to seek input from Tribal Leaders on COVID-19 vaccination planning for Indian Country. This Tribal Consultation complements the state planning process that began last week with the publication of the CDC's COVID-19 Vaccination Program Interim Playbook for Jurisdiction Operations. This playbook guides Immunization Program Awardees (e.g., state and local jurisdictions with routine immunization programs) in planning and operationalizing their COVID-19 vaccination response. Tribal Leaders will have several forums to discuss vaccination planning for distribution and allocation. Please see the following details to join the call: October 1, 2020; 3:00 PM – 4:00 PM ET; HHS Region 9 (Dial-In: (415) 527-5035; Passcode: 199 650 2728). In addition to feedback during conference calls, Tribal leaders can provide input and recommendations in writing by submitting comments to consultation@hhs.gov. The deadline for written comments on this Tribal Consultation is Friday, October 9, 2020

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 7,095,422
- Total deaths: 204,328
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

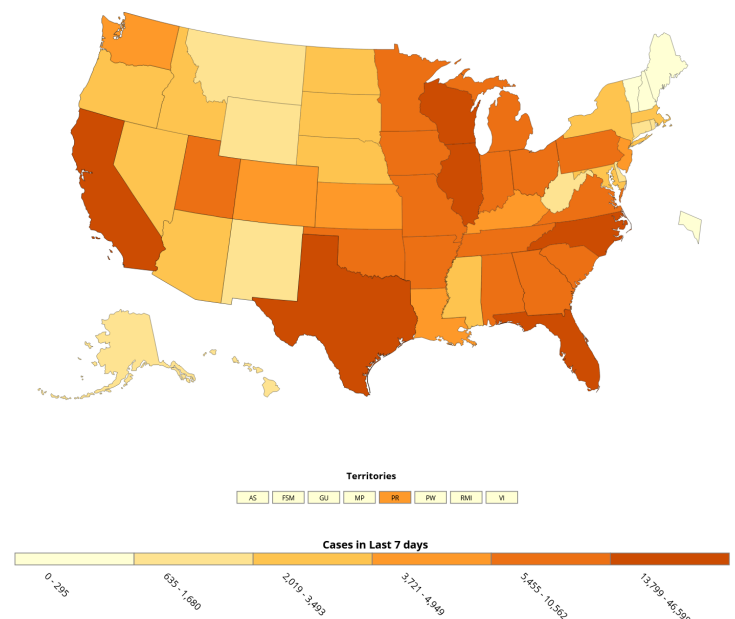

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 111,348,492
- Positive tests reported: 8,717,762
- Percent of positive tests: 8%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #138 SEPTEMBER 28, 2020

*as of 11:59PM EST September 26, 2020

CALIFORNIA

As of September 27, 2020, there were a total of 805,263 positive cases and 15,608 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 83,407 cases
- Age 18-49: 482,861 cases
- Age 50-64: 152,059 cases
- Age 65 and older: 86,053 cases
- Unknown/Missing: 883 cases

Gender of all confirmed positive cases:

- Female: 406,263 cases
- Male: 392,328 cases
- Unknown: 6,672 cases

Lab tests reported statewide: 14,484,852

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.
