

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 36.36 million with more than 1.05 million deaths.

The total number of cases in the U.S. increased from 7,528,313 as reported on Thursday 10/8/2020 to 7,583,200 reported today. The number of deaths in the U.S. increased from 211,132 to 212,111.

According to CNBC and other credible news sources, the Centers for Disease Control and Prevention (CDC) revised its coronavirus guidance Monday, acknowledging that it can sometimes spread through airborne particles that can “linger in the air for minutes to hours” and among people who are more than 6 feet apart. To review the current CDC’s guidelines on how COVID-19 spreads, click [HERE](#).

Older adults and adults with chronic conditions, including many people dually eligible for Medicare and Medicaid, face increased risk of adverse outcomes related to the flu, including hospitalization and death. Dually eligible individuals are also at greater risk for severe outcomes due to COVID-19. Flu vaccination uptake may reduce health care system burden during the COVID-19 pandemic. In this panel discussion, health plans will share promising practices for promoting flu vaccinations, including establishing flu vaccine committees, developing effective communication and outreach strategies with the input of member advisory councils, and partnering with community organizations in vaccination delivery. Panelists will also discuss how they are adapting these strategies during COVID-19. This webinar will be held on October 13, 2020 from 3:00-4:00 PM EDT. Register for the webinar [HERE](#).

Simultaneous outbreaks of flu and COVID-19 will drain the state’s health care resources. Getting a flu shot protects you and your family. To find a flu shot near you, click [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 7,583,200
- Total deaths: 212,111
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

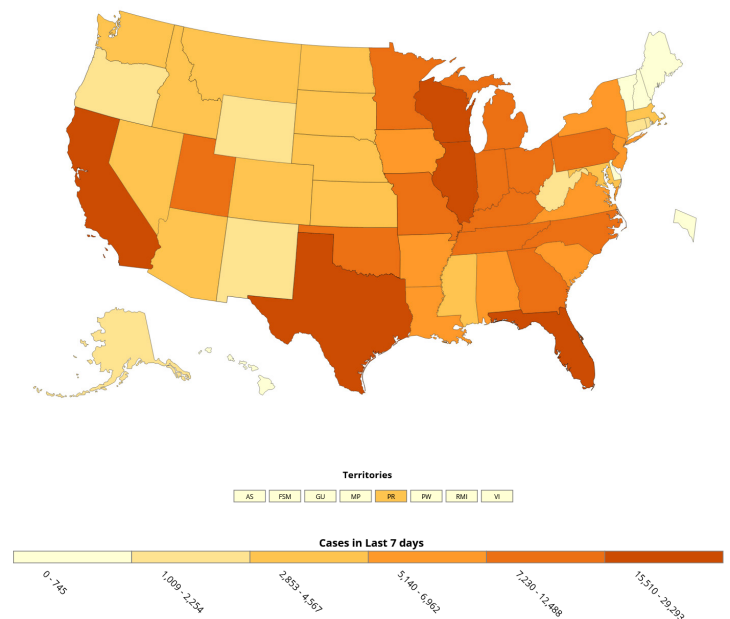

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 123,094,477
- Positive tests reported: 9,364,189
- Percent of positive tests: 8%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #147 OCTOBER 09, 2020

*as of 11:59PM EST October 7, 2020

CALIFORNIA

As of October 8, 2020, there were a total of 838,606 positive cases and 16,428 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 87,657 cases
- Age 18-49: 502,291 cases
- Age 50-64: 158,233 cases
- Age 65 and older: 89,535 cases
- Unknown/Missing: 890 cases

Gender of all confirmed positive cases:

- Female: 423,126 cases
- Male: 408,687 cases
- Unknown: 6,793 cases

Lab tests reported statewide: 15,736,497

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.
