

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #149 OCTOBER 13, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 37.70 million with more than 1.07 million deaths.

The total number of cases in the U.S. increased from 7,740,934 as reported on Monday 10/12/2020 to 7,787,548 reported today. The number of deaths in the U.S. increased from 214,108 to 214,446.

The National Institutes of Health, working in collaboration with the Biomedical Advanced Research and Development Authority (BARDA), announced on October 6, 2020, a third round of contract awards for scale-up and manufacturing of new COVID-19 testing technologies. The six new Rapid Acceleration of Diagnostics (RADx) initiative contracts total \$98.35 million for point-of-care and other novel test approaches that provide new modes of sample collection, processing and return of results. Innovations in these new technologies include integration with smart devices, mobile-lab processing that can be deployed to COVID-19 hot spots, and test results available within minutes. According to CNBC and other credible news sources, a 25-year-old man in the U.S. state of Nevada has contracted the coronavirus on two separate occasions, a study in the Lancet Infectious Diseases journal showed, with the patient becoming seriously ill following the second infection. It is the first confirmed case of a U.S. patient becoming re-infected with Covid-19, and the fifth known case reported worldwide. He has now since recovered. To read the full article, click [HERE](#).

The World Health Organization (WHO) released an article today talking about the impact of COVID-19 on people's livelihoods, their health, and our food systems. To read the full article, click [HERE](#).

Simultaneous outbreaks of flu and COVID-19 will drain the state's health care resources. Getting a flu shot protects you and your family. To find a flu shot near you, click [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 7,787,548
- Total deaths: 214,446
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

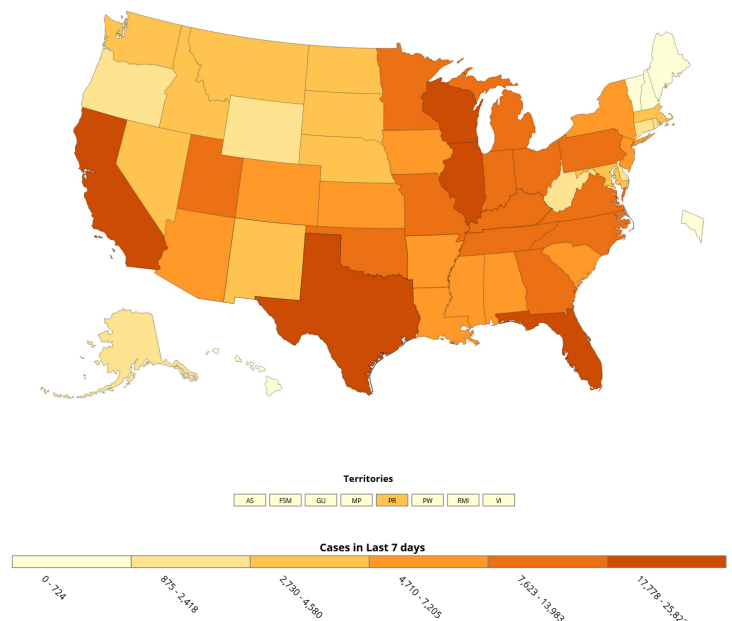

- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 127,537,603
- Positive tests reported: 9,585,033
- Percent of positive tests: 8%

US COVID-19 Cases Reported to the CDC in the Last 7 Days, by State/Territory

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #149 OCTOBER 13, 2020

*as of 11:59PM EST October 11, 2020

CALIFORNIA

As of October 12, 2020, there were a total of 852,406 positive cases and 16,581 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 89,498 cases
- Age 18-49: 510,413 cases
- Age 50-64: 160,823 cases
- Age 65 and older: 90,787 cases
- Unknown/Missing: 885 cases

Gender of all confirmed positive cases:

- Female: 430,237 cases
- Male: 415,294 cases
- Unknown: 6,875 cases

Lab tests reported statewide: 16,333,717

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

21,014 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 10/11/2020.

Of these, 1,343 patients have tested positive for COVID-19 and 19,248 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	280,961
Riverside	62,279
San Bernardino	57,235
Orange	55,373
San Diego	50,748

Counties with most reported deaths

Los Angeles	6,773
Orange	1,341
Riverside	1,256
San Bernardino	986
San Diego	826
