Globally, COVID-19 cases have surpassed 43.76 million with more than 1.16 million deaths. In the United States, the total number of cases stands at 8,752,794 and deaths at 225,985.

To help prepare yourself for another potential COVID-19 surge this upcoming winter season, CNN Health released an article detailing what you may need. These range from household cleaning products to a disaster preparedness kit. Read the full article HERE.

As many people in the United States begin to plan for fall and winter holiday celebrations, CDC offers the following considerations to help protect individuals and their families, friends, and communities from COVID-19. When planning to host a holiday celebration, you should assess current COVID-19 levels in your community to determine whether to postpone, cancel, or limit the number of attendees. For this year’s Halloween guidance, please click HERE.

The official COVID-19 mortality figures might be dramatically underestimating the real death toll of the pandemic in the U.S., according to a new report from the Centers for Disease Control and Prevention (CDC). From late January to early October, nearly 300,000 “excess deaths” occurring in America, the report authors estimate. Find the full report HERE.

On October 16, the State of California released an interim draft of their COVID-19 Vaccination Plan. This document can be viewed HERE.

**UNIFIED STATES**

**COVID-19: U.S. at a Glance***
- Total cases: 8,752,794
- Total deaths: 225,985
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**National Laboratory Testing Data**
- Total tests reported: 144,293,207
- Positive tests reported: 10,589,537
- Percent of positive tests: 7%

CALIFORNIA

As of October 27, 2020, there were a total of 908,713 positive cases and 17,475 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 96,978 cases
- Age 18-49: 543,262 cases
- Age 50-64: 171,333 cases
- Age 65 and older: 96,305 cases
- Unknown/Missing: 835 cases

Gender of all confirmed positive cases:
- Female: 459,278 cases
- Male: 442,321 cases
- Unknown: 7,114 cases

Lab tests reported statewide: 18,223,596

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

23,791 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 10/26/2020.

Of these, 1,493 patients have tested positive for COVID-19 and 21,724 have tested negative for COVID-19.
Racial distribution of confirmed COVID-19 cases and deaths in California

American Indians and Alaska Natives account for 0.5% percent of the population, 0.3% of COVID-19 cases, and 0.3% of deaths in California. This includes a total of 1,828 cases and 57 deaths among American Indian and Alaska Native people in California.

Latinos and African Americans are dying at disproportionately high rates in California. The proportion of COVID-19 deaths in Latinos is 1.3 times their population representation across all adult age categories.

Note: 29% of cases and 1% of deaths are of unknown race/ethnicity. As of 10/28/2020. Source: CDPH
Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.

Updated 10/21/2020
TRIBAL CASINOS
There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

TRIBAL HEAD START
Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
