

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 44.88 million with more than 1.17 million deaths.

In the United States, the total number of cases stands at 8,924,548 and deaths at 228,100.

There were 87,164 COVID-19 cases reported in the United States yesterday, according to data from Johns Hopkins University, by far the most new cases in a single day since the pandemic began. Across the country, 41 states had at least 10% more new COVID-19 cases this past week compared to the previous week, according to data from Johns Hopkins. No states saw a decline of cases that was 10% or more. Read the full CNN Health article [HERE](#).

To help prepare yourself for another potential COVID-19 surge this upcoming winter season, CNN Health released an article detailing what you may need. These range from household cleaning products to a disaster preparedness kit. Read the full article [HERE](#).

As many people in the United States begin to plan for fall and winter holiday celebrations, CDC offers the following considerations to help protect individuals and their families, friends, and communities from COVID-19. When planning to host a holiday celebration, you should assess current COVID-19 levels in your community to determine whether to postpone, cancel, or limit the number of attendees. For this year's Halloween guidance, please click [HERE](#).

On October 16, the State of California released an interim draft of their COVID-19 Vaccination Plan. This document can be viewed [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 8,924,548
- Total deaths: 228,100
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

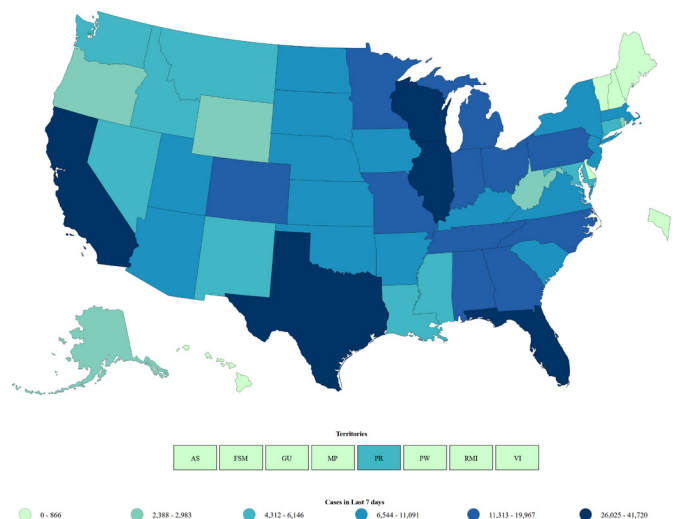

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 146,346,296
- Positive tests reported: 10,731,968
- Percent of positive tests: 7%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #162 OCTOBER 30, 2020

*as of 11:59PM EST October 28, 2020

CALIFORNIA

As of October 29, 2020, there were a total of 916,918 positive cases and 17,571 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 97,994 cases
- Age 18-49: 547,963 cases
- Age 50-64: 172,862 cases
- Age 65 and older: 97,247 cases
- Unknown/Missing: 852 cases

Gender of all confirmed positive cases:

- Female: 463,411 cases
- Male: 446,320 cases
- Unknown: 7,187 cases

Lab tests reported statewide: 18,444,523

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

TRIBAL CASINOS

There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
