

### DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 46.84 million with more than 1.20 million deaths.

In the United States, the total number of cases stands at 9,268,818 and deaths at 230,893.

As many people in the United States begin to plan for fall and winter holiday celebrations, CDC offers the following considerations to help protect individuals and their families, friends, and communities from COVID-19. When planning to host a holiday celebration, you should assess current COVID-19 levels in your community to determine whether to postpone, cancel, or limit the number of attendees. For this year's Thanksgiving guidance, please click [HERE](#).

The Department of Health and Human Services (HHS) announced on a national webinar hosted by the National Indian Health Board (NIHB), that Operation Warp Speed has approved a one week extension for Tribes with healthcare facilities to determine their vaccine distribution preference. HHS sent a Dear Tribal Leader Letter urging that Tribes with healthcare facilities now have until November 6 to contact the Indian Health Service (IHS) to indicate if they would like to be included in IHS' distribution or contact their state health authority if they want to be included in the state's distribution. To learn more, click [HERE](#).

The deadline for Tribes to determine their COVID-19 vaccine distribution preference has been extended to this Friday, November 6th. CRIHB is hosting a call on Thursday, November 5th at 11am/PST with the Indian Health Service to provide an update and to answer any questions that will help you in determining your preference. The California Department of Public Health has also been invited to participate. Join the Zoom meeting [HERE](#).

### UNITED STATES

#### COVID-19: U.S. at a Glance\*

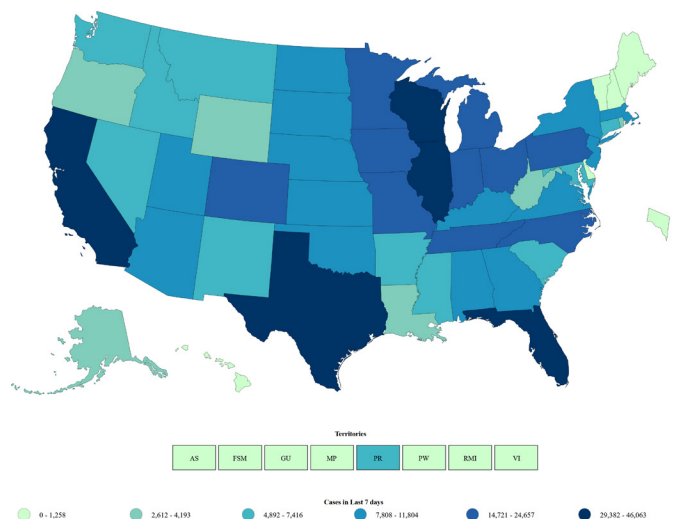

- Total cases: 9,268,818
- Total deaths: 230,893
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

#### National Laboratory Testing Data

- Total tests reported: 151,056,893
- Positive tests reported: 11,090,009
- Percent of positive tests: 7%

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #164 NOVEMBER 03, 2020

\*as of 11:59PM EST October 31, 2020

## CALIFORNIA

As of November 2, 2020, there were a total of 934,672 positive cases and 17,686 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 100,239 cases
- Age 18-49: 558,194 cases
- Age 50-64: 176,308 cases
- Age 65 and older: 99,065 cases
- Unknown/Missing: 866 cases

Gender of all confirmed positive cases:

- Female: 472,513 cases
- Male: 454,850 cases
- Unknown: 7,309 cases

Lab tests reported statewide: 19,074,921

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

24,802 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 11/1/2020.

Of these, 1,551 patients have tested positive for COVID-19 and 22,606 have tested negative for COVID-19.

## CONFIRMED CASES AND DEATHS BY COUNTY

### Counties with most reported cases

Los Angeles	307,620
Riverside	68,833
San Bernardino	64,629
Orange	59,996
San Diego	57,429

### Counties with most reported deaths

Los Angeles	7,076
Orange	1,483
Riverside	1,322
San Bernardino	1,079
San Diego	891

## TRIBAL CASINOS

There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

## TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.
