Globally, COVID-19 cases have surpassed 55.06 million with more than 1.32 million deaths.

In the United States, the total number of cases stands at 11,300,635 and deaths at 247,834.

California is responding to rapidly rising case rates with an updated tier assignment framework. Learn about the changes HERE.

California has released guidance for people traveling into and out of the state. Learn more HERE.

As many people in the United States begin to plan for fall and winter holiday celebrations, CDC offers the following considerations to help protect individuals and their families, friends, and communities from COVID-19. For this year’s Thanksgiving guidance, please click HERE.

The Food and Drug Administration has authorized the first Covid-19 test designed for users to take and develop at home for results within an hour. The agency announced the emergency use authorization for the Lucira COVID-19 All-In-One Test Kit on Tuesday night. Learn more about this test HERE.

The Centers for Disease Control and Prevention (CDC) Office of Equal Employment Opportunity and the CDC American Indian, Alaska Native and Native Hawaiian Coalition is hosting a webinar where Dr. Temet, the EIS officer assigned to Public Health in Seattle & King County discussions his journey through his academic and professional career. The webinar will cover his professional journey stemming from a young age, his work with polio in West Africa, and applying his experience and expertise to the current COVID-19 pandemic. Join the webinar HERE.

COVID-19: U.S. at a Glance*

- Total cases: 11,300,635
- Total deaths: 247,834
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

1) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
2) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
3) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 169,725,061
- Positive tests reported: 12,943,639
- Percent of positive tests: 8%
CALIFORNIA

As of November 17, 2020, there were more than 1.04 million positive cases and a total of 18,360 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 114,812 cases
- Age 18-49: 625,550 cases
- Age 50-64: 196,717 cases
- Age 65 and older: 109,763 cases
- Unknown/Missing: 947 cases

Gender of all confirmed positive cases:
- Female: 530,421 cases
- Male: 509,304 cases
- Unknown: 8,064 cases

Lab tests reported statewide: 21,418,543

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

INDIAN HEALTH SERVICE CALIFORNIA AREA

28,081 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 11/16/2020.

Of these, 1,814 patients have tested positive for COVID-19 and 25,351 have tested negative for COVID-19.
Counties with most reported cases:
- Los Angeles: 340,933
- Riverside: 77,079
- San Bernardino: 76,134
- San Diego: 66,321
- Orange: 65,757

Counties with most reported deaths:
- Los Angeles: 7,299
- Orange: 1,526
- Riverside: 1,374
- San Bernardino: 1,098
- San Diego: 933

Updated 10/21/2020
TRIBAL CASINOS
There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

TRIBAL HEAD START
Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB’s COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
