

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #178 NOVEMBER 24, 2020

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 58.90 million with more than 1.39 million deaths.

In the United States, the total number of cases stands at 12,333,452 and deaths at 257,016.

COVID-19 is increasing at alarming rates in California and we all need to do our part to stop the surge. Effective November 21, stop non-essential activities between 10:00 pm to 5:00 am in counties in the Widespread (purple) tier. Read the order [HERE](#).

As many people in the United States begin to plan for fall and winter holiday celebrations, CDC offers the following considerations to help protect individuals and their families, friends, and communities from COVID-19. For this year's Thanksgiving guidance, please click [HERE](#).

All glove orders are being denied unless they are being requested for first responders, medical facilities, or COVID-19 testing sites. CAL OES is no longer able to fill any orders for nitrile gloves. Only vinyl gloves are available for those just mentioned. As of October 5, 2020, all PPE orders are subject to a prioritization review prior to allocation. Medical facilities, first responders, and COVID-19 testing sites will be prioritized over other requests. Please keep this in mind when ordering PPE through Cal OES.

The IHS has released the IHS COVID-19 Pandemic Vaccine Plan November 2020. The plan includes additional information about the IHS vaccine distribution process and requirements. The IHS Vaccine Task Force will continue to adapt the distribution planning process as new information and Federal guidance evolves. The IHS COVID-19 Pandemic Vaccine Plan is available on the IHS Web site [HERE](#).

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 12,333,452
- Total deaths: 257,016
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

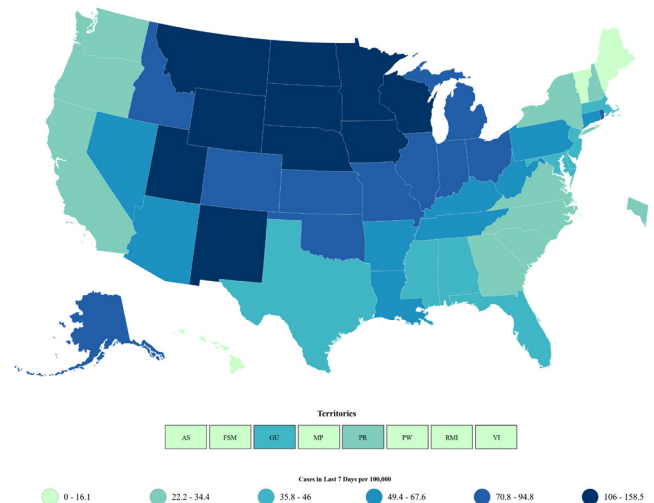

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:  
i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### National Laboratory Testing Data

- Total tests reported: 179,658,010
- Positive tests reported: 13,934,218
- Percent of positive tests: 7.8%

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #178 NOVEMBER 24, 2020

\*as of 11:59PM EST November 22, 2020

## CALIFORNIA

As of November 23, 2020, there were more than 1.12 million positive cases and a total of 18,769 deaths in California.

### Ages of all confirmed positive cases:

- Age 0-17: 124,712 cases
- Age 18-49: 671,494 cases
- Age 50-64: 211,185 cases
- Age 65 and older: 117,343 cases
- Unknown/Missing: 965 cases

### Gender of all confirmed positive cases:

- Female: 570,248 cases
- Male: 546,676 cases
- Unknown: 8,775 cases

Lab tests reported statewide: 22,741,363

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health’s Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

29,880 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 11/22/2020.

Of these, 2,002 patients have tested positive for COVID-19 and 26,577 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	366,374
San Bernardino	84,387
Riverside	82,175
San Diego	72,817
Orange	71,074

Counties with most reported deaths

Los Angeles	7,446
Orange	1,554
Riverside	1,413
San Bernardino	1,129
San Diego	968

## TRIBAL CASINOS

There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

## TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.
