

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 76.8 million with more than 1.7 million deaths.

In the United States, the total number of cases stands at 18,170,062 and deaths at 321,734.

CA Notify lets you know if you might have been exposed to COVID-19 while preserving your privacy. You can add it to your phone [HERE](#).

California Health Officials announced a Regional Stay at Home Order triggered by ICU capacity. The public health order took effect at 12:59 p.m. on December 5. Under the new order, if a region falls below the 15 percent ICU threshold it will have 23 hours to implement the Stay at Home Order. Learn more about the actual ICU capacity remaining in each region [HERE](#).

The Indian Health Service is expecting to receive an initial allocation of 68,425 doses of COVID-19 vaccines. IHS supports CDC and the Advisory Committee on Immunization Practices recommendations for vaccine release, including prioritization of healthcare workers and residents of long-term care facilities. To view the allocation numbers by IHS area, click [HERE](#).

“Vaccinate All 58” is California’s campaign to equitably distribute a safe and effective vaccine to all 58 counties in the state. Learn about the state’s plan and when you can get vaccinated [HERE](#).

New variants of the coronavirus have been seen almost since the virus was first detected in China nearly a year ago. Recently, a new variant has emerged in England with several countries barring flights from the United Kingdom. However, scientists are urging concern, not alarm over new virus strains. [HERE](#) are some questions and answers on what’s known about the virus so far.

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 18,170,062
- Total deaths: 321,734
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

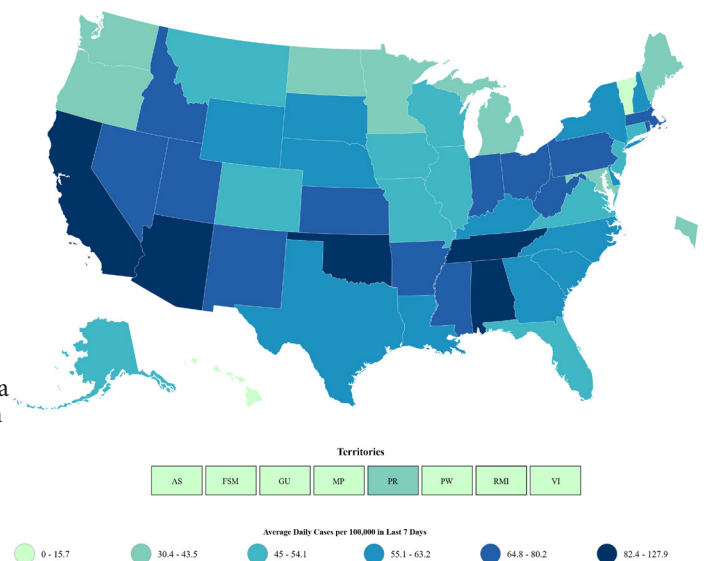

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### National Laboratory Testing Data

- Total tests reported: 229,858,005
- Positive tests reported: 19,430,630
- Percent of positive tests: 8.5%

## CALIFORNIA

As of December 22, 2020, there were a total of 1,964,076 positive cases and 23,284 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 234,174
- Age 18-49: 1,156,574
- Age 50-64: 370,623
- Age 65 and older: 201,338
- Unknown/Missing: 1,367

Gender of all confirmed positive cases:

- Female: 993,649
- Male: 945,758
- Unknown: 24,669

Lab tests reported statewide: 30,468,560

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

## INDIAN HEALTH SERVICE CALIFORNIA AREA

48,756 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 12/21/2020.

Of these, 3,826 patients have tested positive for COVID-19 and 42,433 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

## TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.
