

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 81.4 million with more than 1.7 million deaths.

In the United States, the total number of cases stands at 19,663,976 and deaths at 341,199.

The Centers for Disease Control and Prevention (CDC) released COVID-19 vaccination considerations for people with underlying medical conditions. To view the guide, click [HERE](#).

At-home testing and collection allow you to collect a specimen at home and either send it to a testing facility or perform the test at home. You and your healthcare provider might consider either an at-home collection kit or an at-home test if you have signs and symptoms of COVID-19 or if you can't get tested at a local healthcare facility. To view the CDC's latest guidance on at-home testing, click [HERE](#).

California Health Officials announced a Regional Stay at Home Order triggered by ICU capacity. The public health order took effect at 12:59 p.m. on December 5. Under the new order, if a region falls below the 15 percent ICU threshold it will have 23 hours to implement the Stay at Home Order. Learn more about the actual ICU capacity remaining in each region [HERE](#).

“Vaccinate All 58” is California’s campaign to equitably distribute a safe and effective vaccine to all 58 counties in the state. Learn about the state’s plan and when you can get vaccinated [HERE](#).

Gov. Gavin Newsom on Wednesday announced California’s first known case of an apparently more contagious COVID-19 variant that’s been seen in the United Kingdom. To learn more about this developing story, click [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

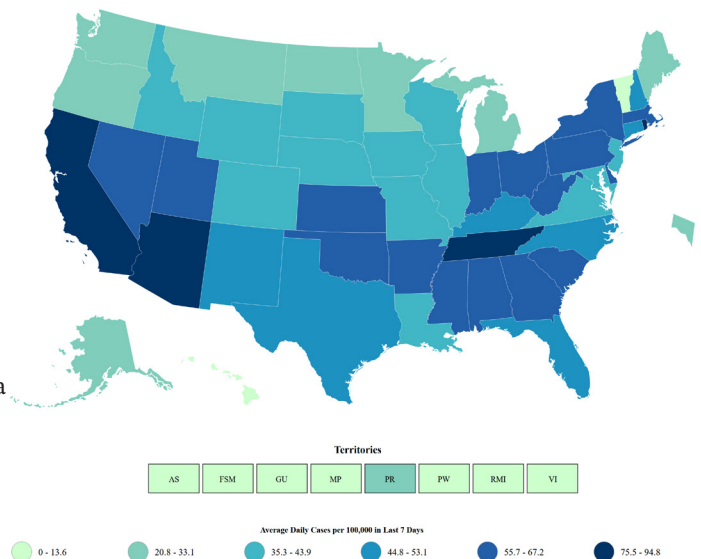

- Total cases: 19,663,976
- Total deaths: 341,199
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
 - meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
 - meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 242,478,904
- Positive tests reported: 20,916,429
- Percent of positive tests: 8.6%

CALIFORNIA

As of December 30, 2020, there were a total of 2,245,379 positive cases and 25,386 deaths in California.

Ages of all confirmed positive cases*:

- Age 0-17: 268,121
- Age 18-49: 1,298,364
- Age 50-64: 420,482
- Age 65 and older: 229,656
- Unknown/Missing: 1,519

Gender of all confirmed positive cases*:

- Female: 1,121,071
- Male: 1,064,781
- Unknown: 32,290

*as of 12/29/2020

Lab tests reported statewide: 32,855,482

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

52,648 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 12/29/2020.

Of these, 4,395 patients have tested positive for COVID-19 and 45,937 have tested negative for COVID-19.

TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
