

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 62.84 million with more than 1.46 million deaths.

In the United States, the total number of cases stands at 13,447,627 and deaths at 267,302.

COVID-19 is increasing at alarming rates in California and we all need to do our part to stop the surge. Effective November 21, stop non-essential activities between 10:00 pm to 5:00 am in counties in the Widespread (purple) tier. Read the order [HERE](#). To see the updated county tier list as of November 28, click [HERE](#).

All glove orders are being denied unless they are being requested for first responders, medical facilities, or COVID-19 testing sites. CAL OES is no longer able to fill any orders for nitrile gloves. Only vinyl gloves are available for those just mentioned. As of October 5, 2020, all PPE orders are subject to a prioritization review prior to allocation. Medical facilities, first responders, and COVID-19 testing sites will be prioritized over other requests. Please keep this in mind when ordering PPE through Cal OES.

The IHS has released the IHS COVID-19 Pandemic Vaccine Plan November 2020. The plan includes additional information about the IHS vaccine distribution process and requirements. The IHS Vaccine Task Force will continue to adapt the distribution planning process as new information and Federal guidance evolves. The IHS COVID-19 Pandemic Vaccine Plan is available on the IHS Web site [HERE](#).

Join the National Indian Council on Aging, National Alliance for Caregiving and the Diverse Elders Coalition for a webinar focused on the needs of American Indian and Alaska Native caregivers in the time of COVID-19. The webinar will take place December 3, 2020 from 12:30-2:00 PM EST. For more information, click [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 13,447,627
- Total deaths: 267,302
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

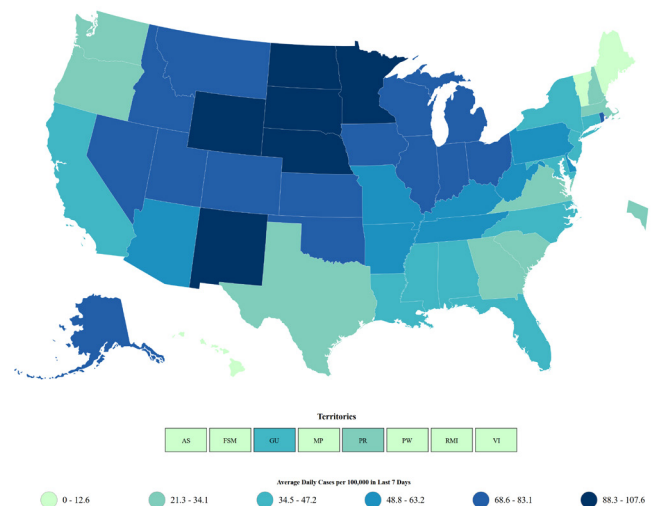

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
 - meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
 - meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 190,944,656
- Positive tests reported: 15,072,955
- Percent of positive tests: 7.9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #181 DECEMBER 01, 2020

*as of 11:59PM EST November 28, 2020

CALIFORNIA

As of November 30, 2020, there were more than 1.22 million positive cases and a total of 19,211 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 136,904 cases
- Age 18-49: 729,630 cases
- Age 50-64: 230,204 cases
- Age 65 and older: 127,432 cases
- Unknown/Missing: 1,019 cases

Gender of all confirmed positive cases:

- Female: 620,979 cases
- Male: 594,629 cases
- Unknown: 9,581 cases

Lab tests reported statewide: 24,161,313

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

32,312 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 11/29/2020.

Of these, 2,209 patients have tested positive for COVID-19 and 28,531 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	396,202
San Bernardino	92,704
Riverside	87,722
San Diego	82,045
Orange	78,711

Counties with most reported deaths

Los Angeles	7,655
Orange	1,577
Riverside	1,442
San Bernardino	1,129
San Diego	997

TRIBAL CASINOS

There are 66 tribal casinos in California. As of October 13, 2020, all of these casinos are open and operating.

TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
