Globally, COVID-19 cases have surpassed 88.8 million with more than 1.9 million deaths.

In the United States, the total number of cases stands at 22,322,956 and deaths at 373,167.

The Tribal Self-Governance Advisory Committee (TSGAC), will host a Webinar on Wednesday, January 13, 2021, from 1:00 pm to 2:30 pm (ET) on an overview and use of the funding included in the most recent COVID-19 legislation. The Coronavirus relief provisions were part of a larger 5,593-page bill under the “Consolidated Appropriations Act, 2021”. Panelists will summarize the main provisions and funding made available to Tribes and Tribal Organizations under the Act. Register HERE.

As California continues its health first approach to fight the COVID-19 pandemic amid an unprecedented surge, the California Department of Public Health (CDPH) today issued a new public health order to reduce pressure on strained hospital systems and redistribute the responsibility of medical care across the state so patients can continue to receive lifesaving care. The entire News Release is available HERE.

On January 19, 2021 from 3:00-4:00 PM EST, please join the National Indian Health Board (NIHB) for a Tribal infection control learning community (TICLC) webinar: EMS Response to COVID-19. This webinar will provide an overview of the best practices for EMS response to COVID-19 and strategies for implementing infection prevention and control measures to protect EMS staff. The COVID response model used by the Pueblo of Laguna Community Health and EMS program will be discussed. This webinar is open to any interested person, but is likely most relevant to Tribal healthcare personal, Tribal frontline healthcare workers, infection control officers and preventionists, and those who want to learn more about infection prevention and control measures for EMS response personnel. Register for the webinar HERE.

UNITED STATES

COVID-19: U.S. at a Glance*  
• Total cases: 22,322,956  
• Total deaths: 373,167  
• Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
  i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
  ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
  iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data  
• Total tests reported: 260,449,169  
• Positive tests reported: 23,509,794  
• Percent of positive tests: 9%
As of January 10, 2020, there were a total of 2,710,801 positive cases and 29,965 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 334,451
- Age 18-49: 1,578,202
- Age 50-64: 514,231
- Age 65 and older: 282,092
- Unknown/ Missing: 1,825

Gender of all confirmed positive cases:
- Female: 1,376,112
- Male: 1,293,614
- Unknown: 41,075

Lab tests reported statewide: 36,170,528

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health’s Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click HERE to find your nearest testing site.
Counties with most reported cases

- Los Angeles: 901,783
- San Bernardino: 232,171
- Riverside: 219,486
- Orange: 193,766
- San Diego: 191,886

Counties with most reported deaths

- Los Angeles: 12,250
- Riverside: 2,218
- Orange: 2,091
- San Diego: 1,857
- San Bernardino: 1,531

Racial distribution of confirmed COVID-19 cases and deaths in California

American Indians and Alaska Natives account for 0.5% percent of the population, 0.3% of COVID-19 cases, and 0.3% of deaths in California. This includes a total of 6,354 cases and 97 deaths among American Indian and Alaska Native people in California.

California Department of Public Health has nearly complete data on race and ethnicity for COVID-19 deaths, and are reporting the following trends: Latinos, African Americans and Native Hawaiians and Pacific Islanders are dying at disproportionately higher levels.
Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.

TRIBAL HEAD START
Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB’s COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.
