DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 96 million with more than 2 million deaths.

In the United States as of January 17, 2021, the total number of cases stands at 24,512,618 and deaths at 408,697.

Joseph R. Biden has been officially sworn in as the 46th President of the United States. View his plan to combat COVID-19 HERE.

A more highly transmissible variant of SARS-CoV-2, B.1.1.7, has been detected in 10 U.S. states as of January 15, 2021. Modeling data indicate that B.1.1.7 has the potential to increase the U.S. pandemic trajectory in the coming months. The increased transmissibility of the B.1.1.7 variant warrants universal and increased compliance with mitigation strategies, including distancing and masking. Higher vaccination coverage might need to be achieved to protect the public. To view the full CDC MMWR report, click HERE.

As California continues its health first approach to fight the COVID-19 pandemic amid an unprecedented surge, CDPH issued a new public health order to reduce pressure on strained hospital systems and redistribute the responsibility of medical care across the state so patients can continue to receive lifesaving care. The entire News Release is available HERE.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 24,512,618
- Total deaths: 408,697
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data
- Total tests reported: 280,309,333
- Positive tests reported: 25,907,706
- Percent of positive tests: 9.2%
CALIFORNIA

60,779 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 1/20/2021.

Of these, 6,243 patients have tested positive for COVID-19 and 51,310 have tested negative for COVID-19.
CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases
- Los Angeles: 1,023,055
- San Bernardino: 257,754
- Riverside: 251,007
- San Diego: 219,729
- Orange: 218,867

Counties with most reported deaths
- Los Angeles: 14,641
- Riverside: 2,739
- Orange: 2,546
- San Diego: 2,222
- San Bernardino: 1,561

As of 1/22/2021. Source: CDPH
American Indians and Alaska Natives account for 0.5% percent of the population, 0.3% of COVID-19 cases, and 0.3% of deaths in California. This includes a total of 7,336 cases and 110 deaths among American Indian and Alaska Native people in California.

California Department of Public Health has nearly complete data on race and ethnicity for COVID-19 deaths, and are reporting the following trends: Latinos, African Americans and Native Hawaiians and Pacific Islanders are dying at disproportionately higher levels.

Note: 26% of cases and 2% of deaths are of unknown race/ethnicity. As of 1/22/2021. Source: CDPH
Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.

TRIBAL HEAD START
Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB’s COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.

If you have any questions or concerns please contact:
Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org
