

# CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #230 FEBRUARY 11, 2021

## DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 106.9 million with more than 2.3 million deaths.

In the United States, the total number of cases stands at 27,127,858 and deaths at 470,110.

The Centers for Disease Control and Prevention (CDC) released their February 10 Morbidity and Mortality Weekly Report (MMWR) on maximizing the fit for cloth and medical procedure masks to improve performance and reduce SARS-CoV-2 transmission and exposure. CDC conducted experiments to assess two ways of improving the fit of medical procedure masks: fitting a cloth mask over a medical procedure mask, and knotting the ear loops of a medical procedure mask and then tucking in and flattening the extra material close to the face. Each modification substantially improved source control and reduced wearer exposure. View the full report [HERE](#). To view the CDC's updated guidance on mask wearing, click [HERE](#).

In response to recent judicial rulings, the state guidance for places of worship has been updated. This interim guidance is effective immediately. Read the guidance [HERE](#).

## UNITED STATES

### COVID-19: U.S. at a Glance\*

- Total cases: 27,127,858
- Total deaths: 470,110
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

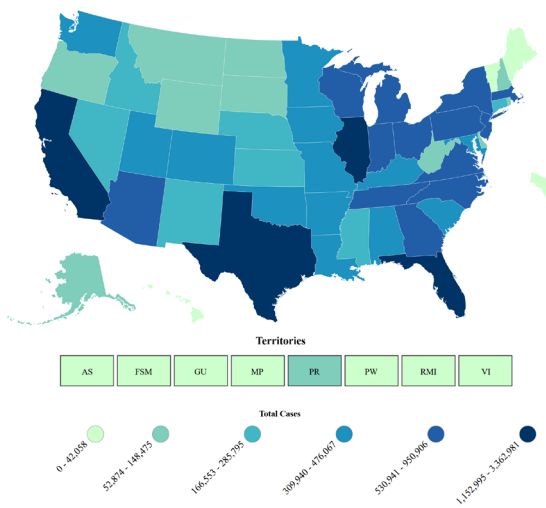

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

### National Laboratory Testing Data

- Total tests reported: 312,438,896
- Positive tests reported: 28,632,074
- Percent of positive tests: 9.2%

#### TRIBAL HEAD START

Beginning in early September 2020, some Tribal early childhood education programs, such as Head Start, will begin reopening either in person, virtually, or in combination of both (i.e. hybrid program). Please check with local school districts, Tribes, or Lead Agencies for start dates.

Note: CRIHB's COVID response team will continue to monitor these tribal programs and facilities as the situation progresses.
