

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #240 FEBRUARY 26, 2021

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 112.6 million with more than 2.5 million deaths.

In the United States, the total number of cases stands at 28,212,548 and deaths at 506,834.

The state will dedicate 10% of vaccines to K-12 school staff and childcare workers starting March 1. These workers will get special codes that let them schedule expedited appointments through myturn.ca.gov. See the allocation plan [HERE](#).

The Centers for Disease Control and Prevention (CDC), in partnership with Boston Children's Hospital and Castlight Health, is launching a new tool that allows Americans to search for COVID-19 vaccine providers with stock of vaccine where they live. The tool, which builds on the existing VaccineFinder.org platform, will capture inventory data from vaccine providers around the country. To use the tool, click [HERE](#).

Get notified when it's your turn to get the COVID-19 vaccine at myturn.ca.gov.

CRIHB has launched its #CovidVaccineSavesLives campaign. The campaign includes posters, public service announcements, and informational flyers. These posters include Tribal community member from across California. You are welcome to download the posters [HERE](#). Our COVID vaccine informational flyers can be found [HERE](#). Our existing COVID-related PSAs can be found on our YouTube channel [HERE](#).

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 28,212,548
- Total deaths: 506,834
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

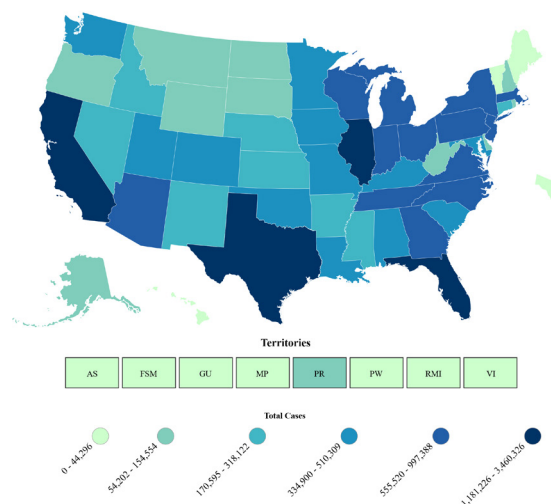

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 329,861,245
- Positive tests reported: 29,642,590
- Percent of positive tests: 9%
