Globally, COVID-19 cases have surpassed 154.8 million with more than 3.2 million deaths.

In the United States as of May 5, the total number of cases stands at 32,313,016 and deaths at 575,491.

Data from six models indicate that with high vaccination coverage and moderate NPI adherence, hospitalizations and deaths will likely remain low nationally, with a sharp decline in cases projected by July 2021. To view this Centers for Disease Control and Prevention (CDC) Morbidity and Mortality Weekly Report (MMWR) for May 5, click HERE.

The COVID-19 Health Equity Playbook for Communities is intended to support local communities in achieving their Health Equity Measure as part of the California’s Blueprint for a Safer Economy and building an equitable recovery. Counties can use this document to inform Targeted Equity Investment Plans. This living document will continue to be updated as the pandemic progresses and as more is learned about what strategies are working on the ground. It can be viewed HERE.

Vaccinations open to all Californians aged 16 and up. Book your shots HERE.
As of April 23, 2021, the table to the right shows that AIAN have higher rates of COVID-19 hospitalization and death from COVID-19 than any other race/ethnicity group.

COVID-19 MAPS: May 6, 2021
American Indians and Alaska Natives account for 0.5% percent of the population, 0.3% of COVID-19 cases, and 0.3% of deaths in California. This includes a total of 9,627 cases and 215 deaths among American Indian and Alaska Native people in California.
Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the Indian Health Service (IHS) include positive cases reported by Tribal and Urban Indian Health Programs.

Data from California Department of Public Health (CDPH) include all positive cases of AIAN diagnosed in California.
