Globally, COVID-19 cases have surpassed 168.6 million with more than 3.5 million deaths.

In the United States, the total number of cases stands at 32,869,009 and deaths at 586,890.

On June 15, capacity and distancing restrictions will be lifted for most businesses and activities. Large-scale indoor events will have vaccination or negative test requirements for attendees through at least October 1. Click HERE to find out what else will change as the state plans to fully reopen on that day.

Vaccinations open to all Californians aged 12 and up. Book your shots HERE.

The National Indian Health Board (NIHB), in coordination with the Centers for Disease Control and Prevention (CDC), will be hosting a Community Based Organization (CBO)Vaccine Toolkit Discussion Group on Tuesday, June 8, 2021 from 2:00pm to 3:00pm ET. This discussion group will feature an overview of the CBO Vaccine Toolkit and new communication tools for adolescent vaccination. Following the overview there will be an opportunity for discussion and community feedback. This discussion group is open to any interested person, but is likely most relevant to Tribal public health professionals, Tribal health departments, staff of Tribal organizations and those working at social service organizations, schools, or work with elders. Register for the webinar HERE. If you were previously registered to attend the CBO Vaccination Toolkit Discussion Group on Thursday, May 20, 2021 you have automatically be registered for the reschedule discussion group. You will not have to register again.

COVID-19: U.S. at a Glance*

- Total cases: 33,041,551
- Total deaths: 590,212
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
  i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 442,407,002
- Positive tests reported: 35,206,497
- Percent of positive tests (7-day): 2.7%
As of April 23, 2021, the table to the right shows that AIAN have higher rates of COVID-19 hospitalization and death from COVID-19 than any other race/ethnicity group.

**CALIFORNIA**

As of May 26, 2021, there were a total of 3,675,817 positive cases and 61,824 deaths in California.

- Ages of all confirmed positive cases:
  - Age 0-17: 478,672
  - Age 18-49: 2,098,796
  - Age 50-64: 699,598
  - Age 65 and older: 405,030

- Gender of all confirmed positive cases:
  - Female: 1,877,870
  - Male: 1,767,407
  - Unknown: 36,820

Lab tests reported statewide*: 65,152,136

Numerous public health labs in California are testing for COVID-19 samples. Click [HERE](#) to find your nearest testing site.

**INDIAN HEALTH SERVICE CALIFORNIA AREA**

85,674 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 5/28/2021.

Of these, 8,220 patients have tested positive for COVID-19 and 74,056 have tested negative for COVID-19.
### Counties with most reported cases

- **Los Angeles**: 1,201,927
- **San Bernardino**: 292,755
- **Riverside**: 288,835
- **San Diego**: 279,960
- **Orange**: 254,438

### Counties with most reported deaths
