Globally, COVID-19 cases have surpassed 176.3 million with more than 3.8 million deaths.

In the United States, the total number of cases stands at 33,315,272 and deaths at 597,965.

California has reached over 40 million vaccinations and has reopened. The state has ended capacity limits and relaxed mask rules for vaccinated people. See what else has changed HERE.

The Centers for Disease Control and Prevention announced that it will convene an “emergency meeting” of its advisers on June 18th to discuss rare but higher-than-expected reports of heart inflammation following doses of the mRNA-based Pfizer and Moderna COVID-19 vaccines. So far, the CDC has identified 226 reports that might meet the agency’s “working case definition” of myocarditis and pericarditis following the shots. The vast majority have recovered. The reports represent just a tiny fraction of the nearly 130 million Americans who have been fully vaccinated with either Pfizer or Moderna's doses. The CDC previously disclosed that reports of heart inflammation were detected mostly in younger men and teenage boys following their second dose, and that there was a “higher number of observed than expected” cases in 16- to 24-year-olds.

Vaccinations open to all Californians aged 12 and up. Book your shots HERE.

Join the Johns Hopkins Center for American Indian Health on June 17 at 3:00 PM EST for an informational session with Dr. Sophina Calderon, who will share examples from her own practice as well as address audience concerns related to the COVID-19 vaccine for youth in Tribal communities. Register HERE.
As of May 26, 2021, the table to the right shows that AIAN have higher rates of COVID-19 hospitalization and death from COVID-19 than any other race/ethnicity group.

**COVID-19 CASES BY IHS AREA**

As of June 16, 2021, there were a total of 3,698,626 positive cases and 62,534 deaths in California.

**Ages of all confirmed positive cases:**
- Age 0-17: 480,821
- Age 18-49: 2,108,217
- Age 50-64: 702,739
- Age 65 and older: 406,849

**Gender of all confirmed positive cases:**
- Female: 1,886,299
- Male: 1,775,340
- Unknown: 36,986

**Lab tests reported statewide**: 67,989,072

Numerous public health labs in California are testing for COVID-19 samples. Click [HERE](#) to find your nearest testing site.

**INDIAN HEALTH SERVICE CALIFORNIA AREA**

87,230 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 6/13/2021.

Of these, 8,296 patients have tested positive for COVID-19 and 75,389 have tested negative for COVID-19.
CONFIRMED CASES AND DEATHS BY COUNTY
