Globally, COVID-19 cases have surpassed 177.1 million with more than 3.8 million deaths.

In the United States, the total number of cases stands at 33,341,986 and deaths at 598,713.

Now you can show digital proof of your vaccination. If you were vaccinated in California, go to Digital COVID-19 Vaccine Record and enter your info to access it. Get your record [HERE](#).

Fully vaccinated Californians won't have to wear masks in the workplace after state regulators voted to end mask requirements and the governor immediately signed an executive order to allow the changes to quickly take effect. The new rule was adopted by the state Division of Occupational Safety and Health (Cal/OSHA). No face coverings will be required outdoors, regardless of vaccination status. While it is not required for employers to retain copies of vaccination cards, employers must document vaccination status. Self-attestation by employees will be allowed. Physical distancing requirements were also eliminated under the new rule.

Vaccinations open to all Californians aged 12 and up. Book your shots [HERE](#).

**COVID-19: U.S. at a Glance**

- Total cases: 33,341,986
- Total deaths: 598,713
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

1. meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
2. meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
3. meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**National Laboratory Testing Data**

- Total tests reported: 460,118,682
- Positive tests reported: 35,532,920
- Percent of positive tests (7-day): 1.7%
INDIAN HEALTH SERVICE CALIFORNIA AREA

87,230 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 6/13/2021.

Of these, 8,296 patients have tested positive for COVID-19 and 75,389 have tested negative for COVID-19.

As of June 17, 2021, the table to the right shows that AIAN still have higher rates of COVID-19 infection, hospitalization, and death from COVID-19 than any other race/ethnicity group.

As of June 18, 2021, there were a total of 3,700,750 positive cases and 62,622 deaths in California.

Ages of all confirmed positive cases:
- Age 0-17: 481,098
- Age 18-49: 2,109,428
- Age 50-64: 703,143
- Age 65 and older: 407,083

Gender of all confirmed positive cases:
- Female: 1,887,383
- Male: 1,776,360
- Unknown: 37,008

Lab tests reported statewide*: 68,254,378

*as of 11:59PM EST June 13, 2021

Numerous public health labs in California are testing for COVID-19 samples. Click HERE to find your nearest testing site.
