

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #309 JUNE 28, 2021

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 180.8 million with more than 3.9 million deaths.

In the United States, the total number of cases stands at 33,451,748 and deaths at 601,506.

On behalf of the White House Covid Response Team, please join for a White House Tribal Covid-19 Update. The call will take place June 30 at 4:30 PM EST. Register [HERE](#).

Now you can show digital proof of your vaccination. If you were vaccinated in California, go to Digital COVID-19 Vaccine Record and enter your info to access it. Get your record [HERE](#).

Vaccinations open to all Californians aged 12 and up. Book your shots [HERE](#).

As the COVID-19 vaccination campaign slows in the U.S., officials are citing young adults as one of the biggest barriers to mass immunity, reports The New York Times. Recently, the U.S. has been reporting fewer than a million people a day getting a vaccine, down from a mid-April peak of more than 3.3 million. Last week, White House officials said they had expected 70 percent of people 27 and older to receive at least a first dose by July 4, but when accounting for Americans aged 18 and up, the U.S. is likely to fall short of President Joe Biden's goal. Nationwide, the seven-day average number of vaccines administered daily was 370,000 as of June 24, a 55.3 percent decrease from the previous week.

Based on an analysis of specimens collected in the two weeks ending June 19, the CDC estimates the alpha variant, also known as B.1.1.7, accounts for 52.2 percent of all U.S. COVID-19 cases. The delta variant, or B.1.617.2, comprises about 20.6 percent of all cases.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 33,451,748
- Total deaths: 601,506
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

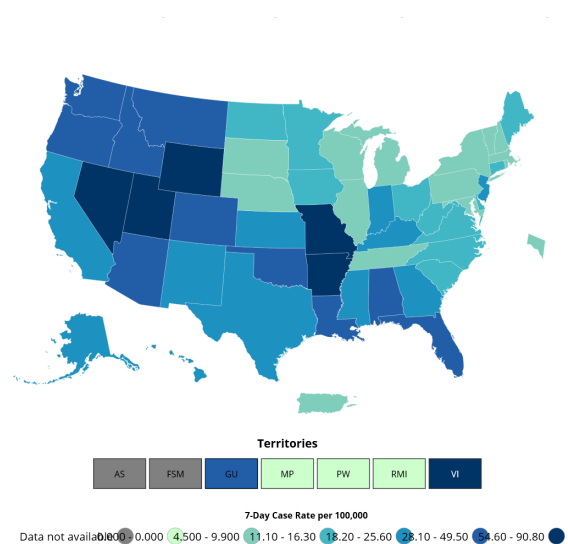

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 466,207,708
- Positive tests reported: 35,657,973
- Percent of positive tests (7-day): 2.0%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #309 JUNE 28, 2021

RISK FOR COVID-19 INFECTION, HOSPITALIZATION, & DEATH BY RACE/ETHNICITY, U.S.

As of June 17, 2021, the table to the right shows that AIAN still have higher rates of COVID-19 infection, hospitalization, and death from COVID-19 than any other race/ethnicity group.

Rate ratios compared to White, Non-Hispanic persons	American Indian or Alaska Native, Non-Hispanic persons	Asian, Non-Hispanic persons	Black or African American, Non-Hispanic persons	Hispanic or Latino persons
Cases ¹	1.6x	0.7x	1.1x	2.0x
Hospitalization ²	3.3x	1.0x	2.9x	2.8x
Death ³	2.4x	1.0x	2.0x	2.3x

COVID-19 CASES BY IHS AREA

CALIFORNIA

As of June 28, 2021, there were a total of 3,714,051 positive cases and 62,994 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 482,827
- Age 18-49: 2,117,009
- Age 50-64: 705,670
- Age 65 and older: 408,546

Gender of all confirmed positive cases:

- Female: 1,894,166
- Male: 1,782,744
- Unknown: 37,141

Lab tests reported statewide*: 69,442,426

*as of 6/27/21

Numerous public health labs in California are testing for COVID-19 samples. Click [HERE](#) to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

88,271 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 6/20/2021.

Of these, 8,324 patients have tested positive for COVID-19 and 76,615 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	1,207,461
San Bernardino	294,115

American Indian and Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

California Department of Public Health reports COVID-19 data on American Indian and Alaska Native (AIAN) people that only identify in one racial category. Below is a comparison using CDC's data on AIAN cases and deaths in California by racial classification, using a more restrictive definition (AIAN alone) versus a more comprehensive definition (AIAN in combination with other races/ethnicities).

	Cases	Deaths
AIAN alone	6,534	202
AIAN in combination	29,015	500

COVID-19 testing information from patients seen at a Tribal or Urban Indian Health Program in California

Note: This map shows patients by the regional location of the clinic where they were tested and NOT by the residence of the patients.

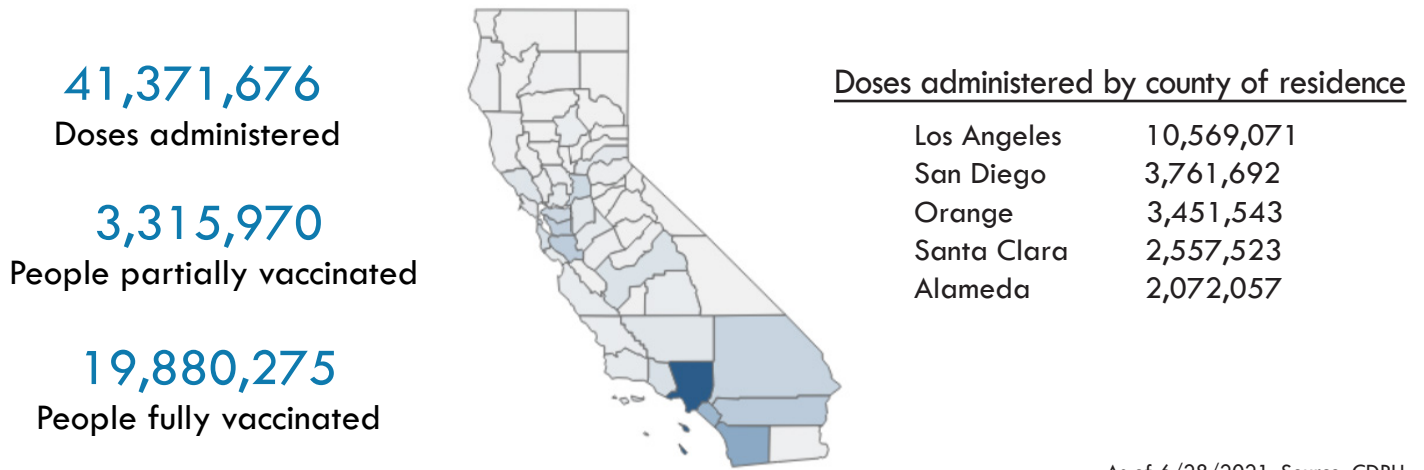

Number of positive cases identified by region

Two sources for tracking American Indian and Alaska Native (AIAN) vaccinations administered in California

Data from [California Department of Public Health \(CDPH\)](#) does not include vaccines administered by Federal entities such as **Indian Health Service**, Department of Defense, U.S. Federal Bureau of Prisons, and Veterans Affairs.
