

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #312 JULY 7, 2021

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 184.3 million with more than 3.9 million deaths.

In the United States, the total number of cases stands at 33,582,352 and deaths at 603,656.

As of June 30, 2021, 63,447 samples have been sequenced in California. As of June 21, 2021, the delta variant makes up 35.6% of specimens sequenced that are variants of concern or variants of interest. The alpha variant makes up 34.3% and the gamma variant makes up 19.7%. You can view CDPH track these variants HERE.

Join National Telecommunications and Information Administration (NTIA) Tribal broadband specialist team on July 21 and July 22, 2021, to hear more about the Tribal Broadband Connectivity Program (TBCP). The TBCP makes grants available to eligible entities, which include a Tribal Government, a Tribal College or University, the Department of Hawaiian Home Lands on behalf of the Native Hawaiian Community, including Native Hawaiian Education Programs, a Tribal organization, or an Alaska Native Corporation, for the deployment and adoption of broadband service on Tribal Land and for programs that promote the use of broadband to access remote learning, telework, or telehealth resources during the COVID-19 pandemic. On Wednesday, July 21, 2021, from 2:30 – 4:00 p.m. EST, NTIA will be hosting a webinar on the TBCP application process. During this webinar NTIA staff will guide potential applicants through the forms and documentation required for a complete TBCP grant application. At the conclusion of this webinar, NTIA staff will host a Q&A session for attendees. To register for this webinar, please click HERE. On Thursday, July 22, 2021, from 2:30 - 4:00 p.m. EST, NTIA and the Bureau of Indian Affairs (BIA), will be co-hosting a webinar on hot topics pertaining to the TBCP application. During this webinar the NTIA Tribal broadband specialist team will discuss workforce development, network sustainability, digital inclusion, technical and financial feasibility aspects of potential projects, NHPA, NEPA, and permitting. At the conclusion of this webinar, NTIA and BIA will host a Q&A session for attendees. To register for this webinar, please click **HERE**.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 33,582,352
- Total deaths: 603,656
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

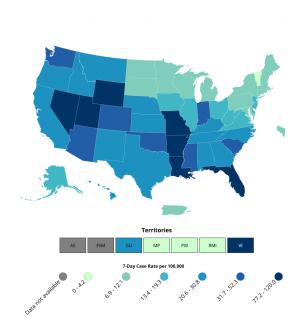

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 470,926,220
- Positive tests reported: 35,798,067
- Percent of positive tests (7-day): 2.9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #312 JULY 7, 2021

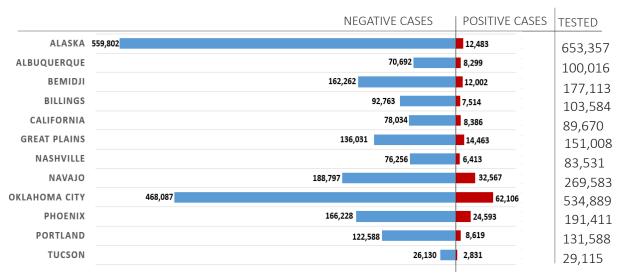

RISK FOR COVID-19 INFECTION, HOSPITALIZATION, & DEATH BY RACE/ETHNICITY, U.S.

As of June 17, 2021, the table to the right shows that AIAN still have higher rates of COVID-19 infection, hospitalization, and death from COVID-19 than any other race/ethnicity group.

Rate ratios compared to White, Non- Hispanic persons	American Indian or Alaska Native, Non-Hispanic persons	Asian, Non- Hispanic persons	Black or African American, Non- Hispanic persons	Hispanic or Latino persons
Cases ¹	1.6x	0.7x	1.1x	2.0x
Hospitalization ²	3.3x	1.0x	2.9x	2.8x
Death ³	2.4x	1.0x	2.0x	2.3x

COVID-19 CASES BY IHS AREA

*as of 11:59PM EST July 3, 2021

CALIFORNIA

As of July 7, 2021, there were a total of 3,721,006 positive cases and 63,259 deaths in California.

Ages of all confirmed positive cases:

• Age 0-17: 483,731

• Age 18-49: 2,120,973

• Age 50-64: 706,991

• Age 65 and older: 409,311

Gender of all confirmed positive cases:

• Female: 1,897,713

• Male: 1,786,083

• Unknown: 37,210

Lab tests reported statewide*: 70,392,011

*as of 7/6/21

Numerous public health labs in California are testing for COVID-19 samples. Click <u>HERE</u> to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

89,670 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 7/3/2021.

Of these, 8,386 patients have tested positive for COVID-19 and 78,034 have tested negative for COVID-19.
