

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #317 JULY 19, 2021

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 190.5 million with more than 4 million deaths.

In the United States, the total number of cases stands at 33,896,296 and deaths at 606,618.

As of July 14, 2021, 80,118 samples have been sequenced in California. The delta variant makes up 48.8% of specimens sequenced that are variants of concern or variants of interest. The alpha variant makes up 29.4% and the gamma variant makes up 12.6%. You can view CDPH track these variants [HERE](#).

If California was still using its four-color reopening blueprint for ranking counties by infection rates, at least a dozen, including Los Angeles, Alameda, Contra Costa and Solano now would be in the most restrictive purple tier. This comes a little over a month since California authorities on June 15 dropped the reopening blueprint and its color-coded restrictions on gatherings and business activities, and eased requirements for face masks in public to slow the virus' spread. California was one of the slowest states to reopen its economy during the pandemic and has one of the higher vaccination rates, especially among large states, with almost 52% of its population fully inoculated. But like much of the United States, California is seeing rapid spread of COVID-19 driven by the highly infectious Delta variant, nearly all of it among those who haven't been vaccinated. According to the California Department of Public Health, the virus is spreading statewide at a 7-day average daily rate of 6.3 cases per 100,000 people among the unvaccinated, but at a rate of 1.1 per 100,000 people among the vaccinated.

Covid-19 cases, hospitalizations and deaths in the U.S. are rising again. The most recent seven-day average of new Covid-19 cases was roughly 26,300 — a nearly 70% increase compared to the previous average. New hospital admissions increased 36% to about 2,790 per day. Daily deaths increased 26% to 211 per day.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 33,896,296
- Total deaths: 606,618
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

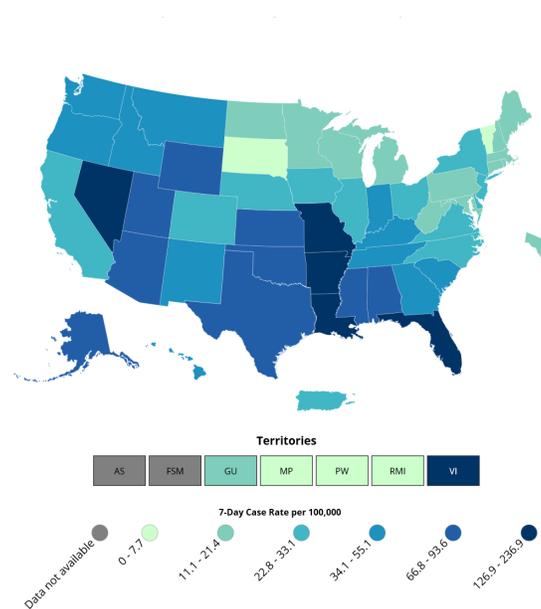

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:

- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 478,457,652
- Positive tests reported: 36,120,489
- Percent of positive tests (7-day): 5.3%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #317 JULY 19, 2021

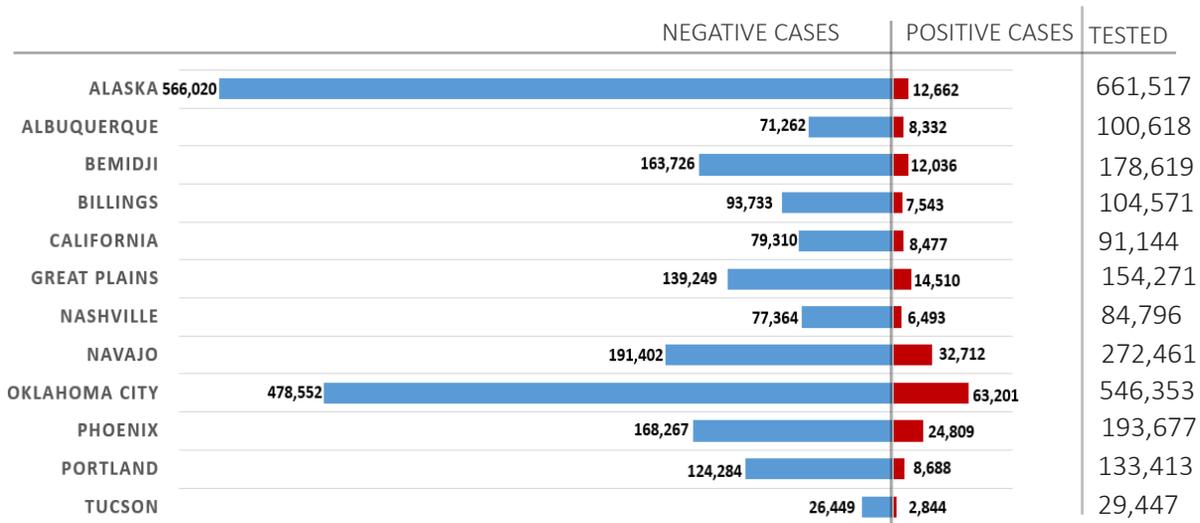

RISK FOR COVID-19 INFECTION, HOSPITALIZATION, & DEATH BY RACE/ETHNICITY, U.S.

As of July 16, 2021, the table to the right shows that AIAN still have higher rates of COVID-19 hospitalization and death than any other race/ethnicity group.

Rate ratios compared to White, Non-Hispanic persons	American Indian or Alaska Native, Non-Hispanic persons	Asian, Non-Hispanic persons	Black or African American, Non-Hispanic persons	Hispanic or Latino persons
Cases ¹	1.7x	0.7x	1.1x	1.9x
Hospitalization ²	3.4x	1.0x	2.8x	2.8x
Death ³	2.4x	1.0x	2.0x	2.3x

COVID-19 CASES BY IHS AREA

*as of 11:59PM EST July 17, 2021

CALIFORNIA

As of July 19, 2021, there were a total of 3,762,462 positive cases and 63,649 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 489,120
- Age 18-49: 2,182,228
- Age 50-64: 714,868
- Age 65 and older: 413,871

Gender of all confirmed positive cases:

- Female: 1,918,856
- Male: 1,805,982
- Unknown: 37,645

Lab tests reported statewide*: 71,939,853

*as of 7/18/21

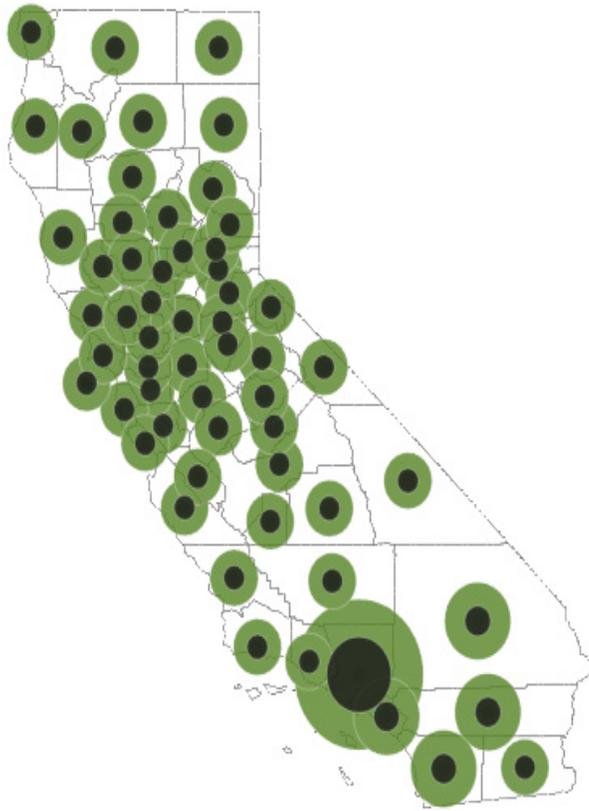

Numerous public health labs in California are testing for COVID-19 samples. Click [HERE](#) to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

91,144 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 7/17/2021.

Of these, 8,477 patients have tested positive for COVID-19 and 79,310 have tested negative for COVID-19.

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	1,224,691
San Bernardino	296,739
Riverside	295,522
San Diego	286,287
Orange	258,724

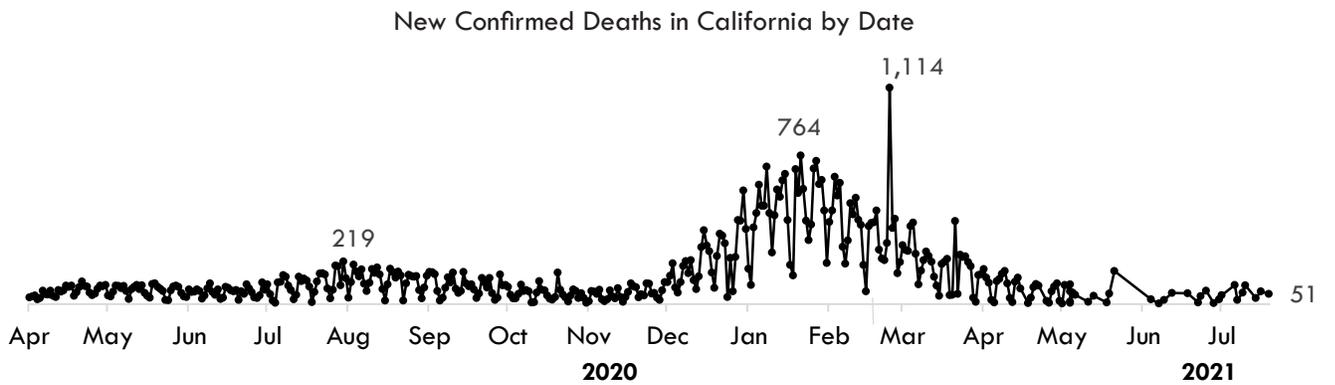

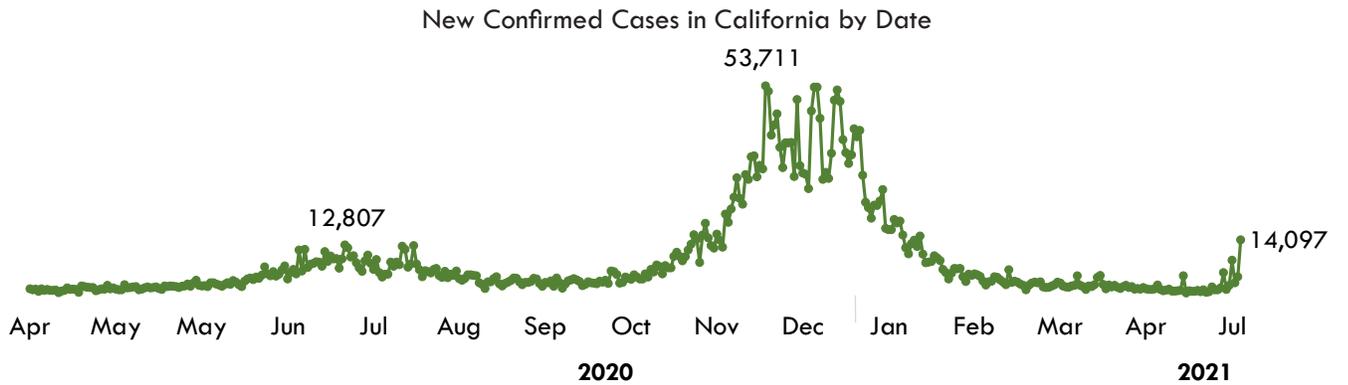

Counties with most reported deaths

Los Angeles	24,598
Orange	5,233
San Bernardino	5,138
Riverside	4,543
San Diego	3,786

American Indian and Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

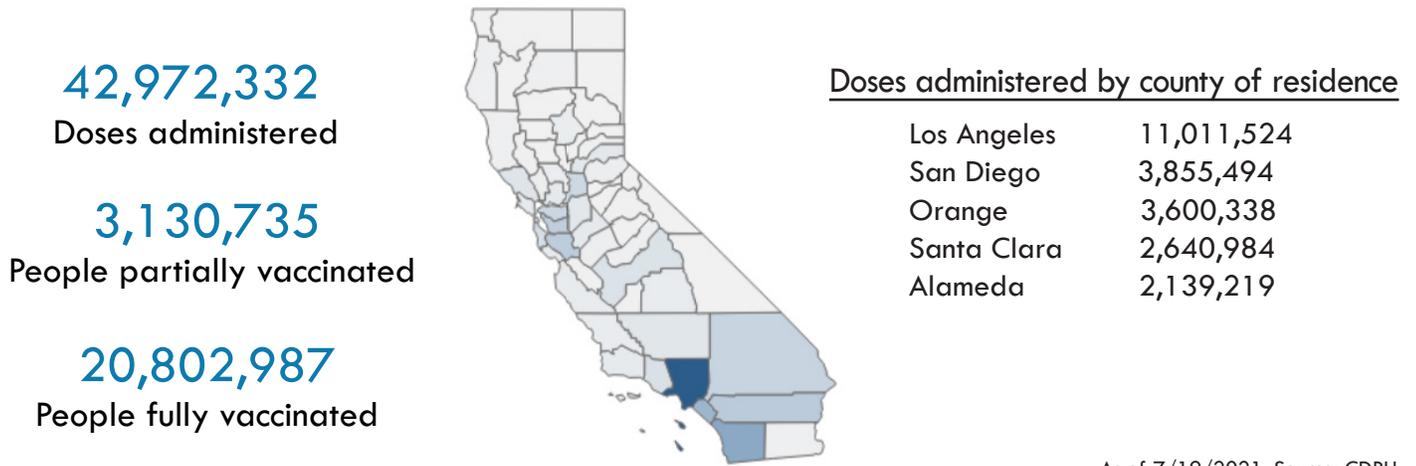

California Department of Public Health reports COVID-19 data on American Indian and Alaska Native (AIAN) people that only identify in one racial category. Below is a comparison using CDC's data on AIAN cases and deaths in California by racial classification, using a more restrictive definition (AIAN alone) versus a more comprehensive definition (AIAN in combination with other races/ethnicities).

	Cases	Deaths
AIAN alone	6,686	203
AIAN in combination	29,631	512

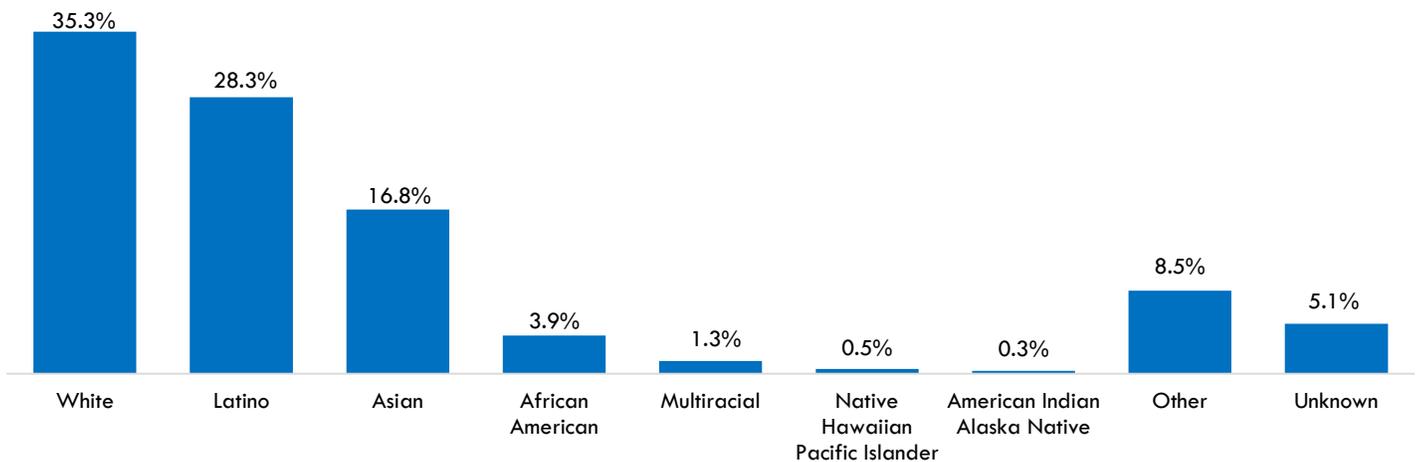

Two sources for tracking American Indian and Alaska Native (AIAN) vaccinations administered in California

Data from [California Department of Public Health \(CDPH\)](#) does not include vaccines administered by Federal entities such as **Indian Health Service**, Department of Defense, U.S. Federal Bureau of Prisons, and Veterans Affairs.

As of 7/19/2021. Source: CDPH

Racial distribution of people with at least one dose of vaccine administered in California

Note: "Other" means those who don't fall under any race or ethnicity. "Unknown" includes those who declined to state or whose race and ethnicity information is missing. As of 7/14/2021. Source: CDPH

Data from the [Indian Health Service \(IHS\)](#) shows the total number of vaccine doses (Pfizer, Moderna, and Johnson & Johnson/Janssen) distributed and administered by IHS Area to date

Area	Total Doses Distributed	Total Doses Administered
Albuquerque	131,165	133,678
Bemidji	152,885	123,796
Billings	61,795	45,690
California	221,605	154,454
Great Plains	127,080	90,493
