Globally, COVID-19 cases have surpassed 204.6 million with more than 4.3 million deaths.

In the United States as of August 12, the total number of cases stands at 36,268,057 and deaths at 617,096.

The National Indian Health Board (NIHB), is hosting the first webinar in the #ACTOFLOVE COVID-19 Vaccine Webinar Series co-hosted with the Association of American Indian Physicians (AAIP). The Delta variant is now the predominant strain of COVID-19 circulating in Tribal communities. The new surge in cases is prompting Tribes to re-evaluate current public health measures like mask mandates and vaccine requirements. Join the webinar to hear about various Tribal responses and current data from policymakers and experts. The webinar will take place August 16 from 1:00-2:30 PM EST. Register HERE.

Governor Newsom announced new requirements for K-12 teachers and school staff to be vaccinated against COVID-19 or tested regularly. The move is meant to protect students and school employees returning to in-person instruction. Find out more HERE.

Today, the U.S. Food and Drug Administration amended the emergency use authorizations (EUAs) for both the Pfizer-BioNTech COVID-19 Vaccine and the Moderna COVID-19 Vaccine to allow for the use of an additional dose in certain immunocompromised individuals, specifically, solid organ transplant recipients or those who are diagnosed with conditions that are considered to have an equivalent level of immunocompromise. Today’s action does not apply to people who are not immunocompromised. Read the full FDA press release HERE.

UNITED STATES

COVID-19: U.S. at a Glance* (as of 8/12/21)
- Total cases: 36,268,057
- Total deaths: 617,096
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data
- Total tests reported: 499,711,732
- Positive tests reported: 38,062,721
- Percent of positive tests (7-day): 9.7%
As of July 16, 2021, the table to the right shows that AIAN still have higher rates of COVID-19 hospitalization and death than any other race/ethnicity group.

As of August 13, 2021, there were a total of 3,994,271 positive cases and 64,098 deaths in California.

Confirmed positive cases by gender:
- Female: 2,037,078
- Male: 1,917,250
- Unknown: 39,943

Confirmed positive cases by age:
- Age 0-17: 519,255
- Age 18-49: 2,316,677
- Age 50-64: 758,911
- Age 65 and older: 399,427

As of August 13, 2021, there were a total of 3,994,271 positive cases and 64,098 deaths in California.
98,172 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 8/10/2021.

Of these, 9,409 patients have tested positive for COVID-19 and 84,664 have tested negative for COVID-19. The 7-day rolling average positivity rate is 16.1%.
CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

- Los Angeles: 1,291,875
- San Bernardino: 311,304
