Globally, COVID-19 cases have surpassed 246.9 million with more than 5 million deaths.

In the United States as of November 2, the total number of cases stands at 46,024,349 and deaths at 745,274.

The U.S. Food and Drug Administration (FDA) has authorized the emergency use of the Pfizer-BioNTech COVID-19 Vaccine for the prevention of COVID-19 to include children 5-11 years old. Immune responses of children 5-11 years old were comparable to those of individuals 16-25 years old. In addition, the vaccine was found to be 90.7% effective in children ages 5-11. The vaccine's safety was studied in over 3,000 children ages 5-11 who received the vaccine and no serious side effects have been detected in the ongoing study. The Centers for Disease Control and Prevention's (CDC) Advisory Committee on Immunization Practices (ACIP) will meet on November 2-3 to discuss further clinical recommendations. Once ACIP recommends the vaccine, Indian Health Service (IHS) and Tribal healthcare providers can begin to vaccinate Native children. Pfizer’s COVID-19 vaccine for youth ages 5-11 is administered as a two-dose primary series, 21 days apart, but is a lower dose (10 micrograms) than the one used for individuals 12 years of age and older (30 micrograms). The FDA has determined this Pfizer vaccine has met the criteria for emergency use authorization (EUA). Based on the evidence available, the known and potential benefits of Pfizer’s COVID-19 vaccine for children ages 5-11 far outweigh the potential risks.

Now you can get a booster shot of Pfizer, Moderna, or Johnson & Johnson. See if a booster is recommended for you, and book today via My Turn. Check your eligibility HERE.
As of October 23, 2021, the graph to the right shows that AIAN nationwide have higher rates of COVID-19 hospitalization (15.9 per 100,000) than Whites (5.7 per 100,000).

As of November 3, 2021, there were a total of 4,674,665 positive cases and 71,646 deaths in California.

Confirmed positive cases by gender:
- Female: 2,384,079
- Male: 2,243,839
- Unknown: 46,747

Confirmed positive cases by age:
- Age 0-17: 701,200
- Age 18-49: 2,664,559
- Age 50-64: 841,440
- Age 65 and older: 467,467

Racial distribution of confirmed COVID-19 cases and deaths in California

American Indians and Alaska Natives account for 0.5% percent of the population, 0.4% of COVID-19 cases, and 0.4% of deaths in California. This includes a total of 15,528 cases and 302 deaths among American Indian and Alaska Native people in California.
California Department of Public Health reports COVID-19 data on American Indian and Alaska Native (AIAN) people that only identify in one racial category. Below is a comparison using CDC’s data on AIAN cases and deaths in California by racial classification, using a more restrictive definition (AIAN alone) versus a more comprehensive definition (AIAN in combination with other races/ethnicities).
