Globally, COVID-19 cases have surpassed 251.7 million with more than 5 million deaths.

In the United States, as of November 10, the total number of cases stands at 46,626,034 and deaths at 755,201.

California’s COVID-19 transmission rate is currently higher than much of the Deep South, including states with fewer pandemic restrictions, according to data from the Centers for Disease Control and Prevention. While statewide hospitalizations have fallen by about half since a summer peak at the end of August, they have started creeping up in some areas, particularly the Central Valley and portions of Southern California including Los Angeles and San Bernardino counties.

A lower-dose version of the Pfizer vaccine has been proven safe and effective in preventing COVID-19 in children. Your child can now be vaccinated if they are 5 or older. Book your child’s vaccination HERE.

Now you can get a booster shot of Pfizer, Moderna, or Johnson & Johnson. See if a booster is recommended for you, and book today via My Turn.

The Centers for Medicare & Medicaid Services (CMS) Division of Tribal Affairs, in collaboration with the CMS Center for Clinical Standards and Quality (CCSQ), will host an All Tribes Call on the Interim Final Rule (IFC) requiring COVID-19 vaccination of eligible staff at health care facilities that participate in Medicare and Medicaid programs. The purpose of this All Tribes Call is for CCSQ staff to provide an overview of the IFC and to answer any questions that Tribes might have. The call will take place on November 18, 2021 from 2:00–3:30 pm EST. Register HERE.
As of November 6, 2021, the graph to the right shows that AIAN nationwide have higher rates of COVID-19 hospitalization (23.4 per 100,000) than Whites (5.2 per 100,000).

Confirmed positive cases by gender:
- Female: 2,406,994
- Male: 2,265,406
- Unknown: 47,196

Confirmed positive cases by age:
- Age 0-17: 707,939
- Age 18-49: 2,690,170
- Age 50-64: 849,527
- Age 65 and older: 471,960

As of November 11, 2021, there were a total of 4,719,596 positive cases and 72,288 deaths in California.
As of November 10, 251,405 samples have been sequenced in California. In August 2021, 15% of cases in California have been sequenced so far. In July 2021, 22% of cases in California were sequenced. The table below shows the percent of specimens sequenced that are variants of concern or variants of interest statewide.
