Globally, COVID-19 cases have surpassed 253.1 million with more than 5 million deaths. In the United States, the total number of cases stands at 46,993,724 and deaths at 760,266.

A lower-dose version of the Pfizer vaccine has been proven safe and effective in preventing COVID-19 in children. Your child can now be vaccinated if they are 5 or older. Book your child’s vaccination HERE.

Now you can get a booster shot of Pfizer, Moderna, or Johnson & Johnson. See if a booster is recommended for you, and book today via My Turn.

The Centers for Medicare & Medicaid Services (CMS) Division of Tribal Affairs, in collaboration with the CMS Center for Clinical Standards and Quality (CCSQ), will host an All Tribes Call on the Interim Final Rule (IFC) requiring COVID-19 vaccination of eligible staff at health care facilities that participate in Medicare and Medicaid programs. The purpose of this All Tribes Call is for CCSQ staff to provide an overview of the IFC and to answer any questions that Tribes might have. The call will take place on November 18, 2021 from 2:00–3:30 pm EST. Register HERE.

**COVID-19: U.S. at a Glance**

- Total cases: 46,993,724
- Total deaths: 760,266
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
- ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
- iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

**National Laboratory Testing Data**

- Total tests reported: 642,687,108
- Positive tests reported: 48,511,338
- Percent of positive tests (7-day): 6.5%
RATES FOR COVID-19 HOSPITALIZATION BY RACE/ETHNICITY, U.S.

As of November 6, 2021, the graph to the right shows that AIAN nationwide have higher rates of COVID-19 hospitalization (23.4 per 100,000) than Whites (5.2 per 100,000).

CALIFORNIA

As of November 15, 2021, there were a total of 4,740,002 positive cases and 72,570 deaths in California.

Confirmed positive cases by gender:
- Female: 2,417,401
- Male: 2,275,201
- Unknown: 47,400

Confirmed positive cases by age:
- Age 0-17: 711,000
- Age 18-49: 2,701,801
- Age 50-64: 853,200
- Age 65 and older: 474,000
