

### HIGHLIGHTS

Globally, COVID-19 cases have surpassed 255.3 million with more than 5.1 million deaths.

In the United States, the total number of cases stands at 47,352,367 and deaths at 764,473.

You can get a booster if you're 18 and older, at risk of being exposed to COVID-19, and your second dose of Pfizer or Moderna was at least 6 months ago. If you got Johnson & Johnson, you can get a booster if your first shot was at least 2 months ago. You can mix and match vaccines. Book your booster at [My Turn](#).

This week, the White House hosted the first Summit of Tribal Nations since 2016. Tribal leaders convened virtually with leaders from the Biden-Harris Administration, including Interior Secretary Deb Haaland, President Joe Biden and First Lady Jill Biden, United States Department of Health and Human Services (HHS) Secretary Xavier Becerra, and Dr. Anthony Fauci. President Biden highlighted that despite these systemic challenges, Tribal nations have led the way on getting their citizens vaccinated.

California maintains the lowest test positivity rate for COVID-19 than any other state nationwide. The daily numbers of newly recorded infections and those hospitalized with the disease have declined in recent weeks, but officials have been warning that the combination of holiday travel, colder weather, and increasing indoor gatherings could threaten to fuel the still-potent pandemic. Throughout the pandemic, California has reported about 12,775 coronavirus cases per 100,000 residents, the 10th-lowest of any state. Over the last week, the state has reported an average of about 4,800 new coronavirus cases per day — down nearly 22% from the level seen two weeks ago. The number of coronavirus-positive patients hospitalized statewide Wednesday was 3,409, a 28% decrease since the start of October. Over the last seven days, California has reported 94.6 new coronavirus cases per 100,000 residents — the ninth-lowest rate of any state.

### UNITED STATES

#### COVID-19: U.S. at a Glance\*

- Total cases: 47,352,367
- Total deaths: 764,473
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

\*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

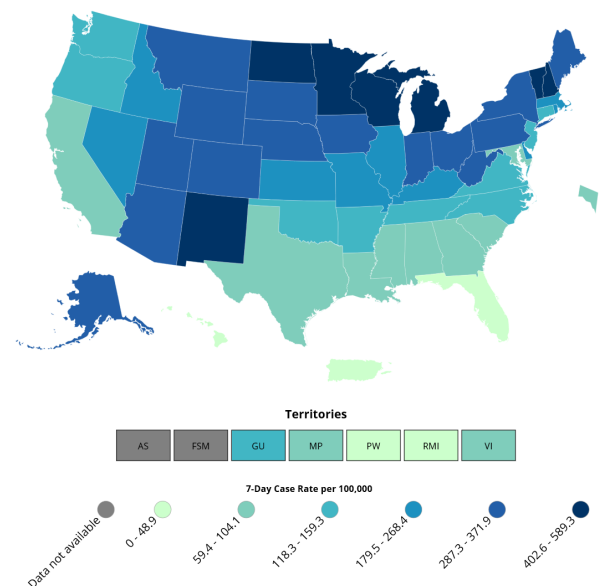

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or
  - meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or
  - meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.
- State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

#### National Laboratory Testing Data (as of 11/18/21)

- Total tests reported: 647,335,547
- Positive tests reported: 48,762,476
- Percent of positive tests (7-day): 6.0%

## CALIFORNIA

As of November 19, 2021, there were a total of 4,758,297 positive cases and 73,000 deaths in California.

Confirmed positive cases by gender:

- Female: 2,426,731
- Male: 2,283,983
- Unknown: 47,583

Confirmed positive cases by age:

- Age 0-17: 713,745
- Age 18-49: 2,712,229
- Age 50-64: 856,493
- Age 65 and older: 475,830

## COVID-19 CASES BY VARIANTS OF INTEREST, CALIFORNIA

As of November 17, 261,001 samples have been sequenced in California. In August 2021, 15% of cases in California have been sequenced so far. In July 2021, 22% of cases in California were sequenced. The table below shows the percent of specimens sequenced that are variants of concern or variants of interest statewide.

Specimen Collection Month	Alpha	Beta	Gamma	Delta	Epsilon	Zeta	Eta	Iota	Kappa	Mu
21-Nov	0.0%	0.0%	0.0%	100.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%

The following table shows the number of COVID-19 cases by variants of interest among the California counties with the most COVID-19 cases reported.

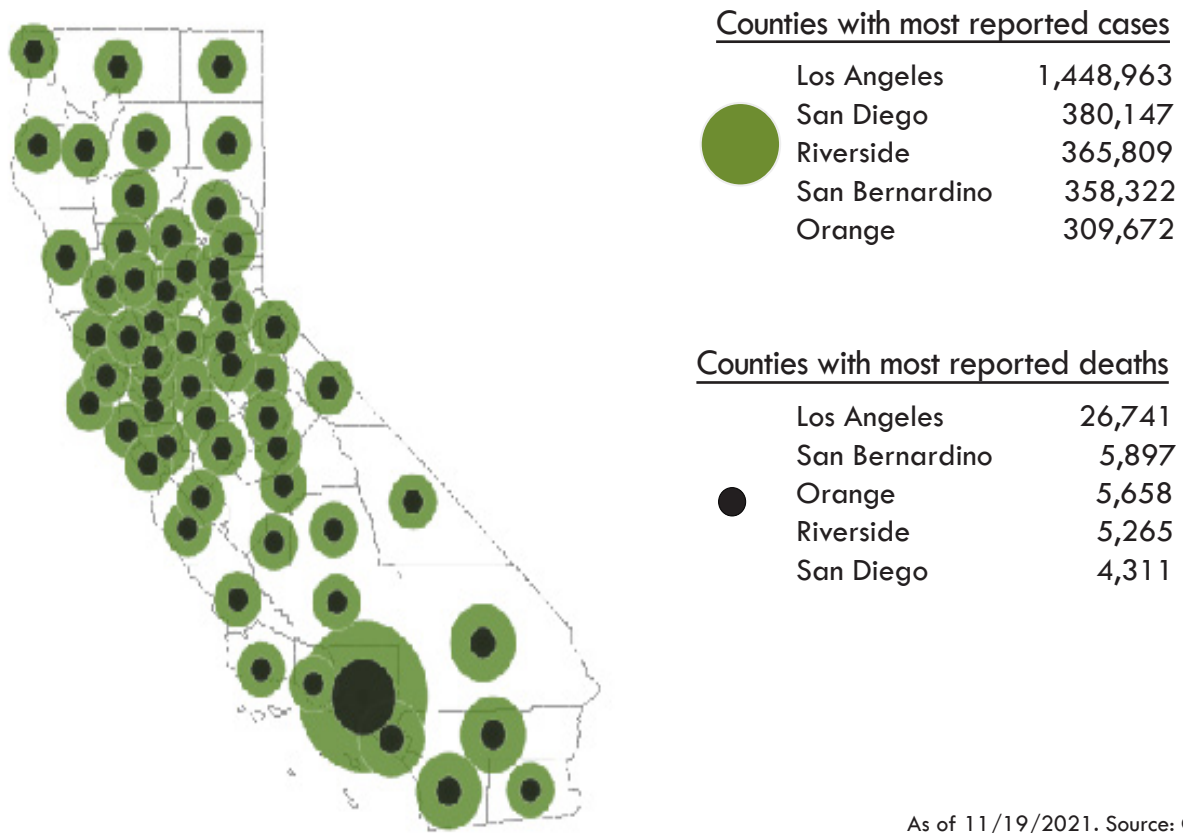

County	Number of Cases by Variants of Interest			Total COVID-19 Cases
	Alpha	Delta	Delta among AI/AN	
Los Angeles	N/A*	N/A*	N/A*	1,515,324
San Diego	N/A*	10,950	48	378,917
Riverside	N/A*	1,034	N/A*	371,878
